Book Banning in 21st-Century America Emily J. M. Knox, 2015-01-16 Requests for the removal, relocation, and restriction of books—also known as challenges—occur with some frequency in the United States. *Book Banning in 21st-Century American Libraries*, based on thirteen contemporary book challenge cases in schools and public libraries across the United States argues that understanding contemporary reading practices, especially interpretive strategies, is vital to understanding why people attempt to censor books in schools and public libraries. Previous research on censorship tends to focus on legal frameworks centered on Supreme Court cases, historical case studies, and bibliographies of texts that are targeted for removal or relocation and is often concerned with how censorship occurs. The current project, on the other hand, is focused on the why of censorship and posits that many censorship behaviors and practices, such as challenging books, are intimately tied to the how one understands the practice of reading and its effects on character development and behavior. It discusses reading as a social practice that has changed over time and encompasses different physical modalities and interpretive strategies. In order to understand why people challenge books, it presents a model of how the practice of reading is understood by challengers including “what it means” to read a text, and especially how one constructs the idea of “appropriate” reading materials. The book is based on three different kinds sources. The first consists of documents including requests for reconsideration and letters, obtained via Freedom of Information Act requests to governing bodies, produced in the course of challenge cases. Recordings of book challenge public hearings constitute the second source of data. Finally, the third source of data is interviews with challengers themselves. The book offers a model of the reading practices of challengers. It demonstrates that challengers are particularly influenced by what might be called a literal “common sense” orientation to text wherein there is little room for polysemic interpretation (multiple meanings for text). That is, the meaning of texts is always clear and there is only one avenue for interpretation. This common sense interpretive strategy is coupled with what Cathy Davidson calls “undisciplined imagination” wherein the reader is unable to maintain distance between the events in a text and his or her own response. These reading practices broaden our understanding of

why people attempt to censor books in public institutions.

Constructing the Adolescent Reader in Contemporary Young Adult Fiction Elisabeth Rose Gruner, 2019-05-17 This book examines the way young adult readers are constructed in a variety of contemporary young adult fictions, arguing that contemporary young adult novels depict readers as agents. Reading, these novels suggest, is neither an unalloyed good nor a dangerous ploy, but rather an essential, occasionally fraught, by turns escapist and instrumental, deeply pleasurable, and

highly contentious activity that has value far beyond the classroom skills or the specific content it conveys. After an introductory chapter that examines the state of reading and young adult fiction today, the book examines novels that depict reading in school, gendered and racialized reading, reading magical and religious books, and reading as a means to developing civic agency. These examinations reveal that books for teens depict teen readers as doers, and suggest that their ability to read deeply, critically, and communally is crucial to the development of adolescent agency.
