The Stories We Tell Ourselves J. Mark Thompson, Richard Tuch, 2013-09-23 *The Stories We Tell Ourselves: Mentalizing Tales of Dating and Marriage* is about the dynamics of intimate interpersonal relationships (dating and marriage) - how and why human pairings occur, what helps them function optimally and how therapists can intervene when they don't. J. Mark Thompson and Richard Tuch employ a multidimensional perspective that provides a variety of lenses through which intimate relationships can be viewed. The authors also offer a new model of couples therapy based on the mentalization model of treatment developed by Peter Fonagy and his colleagues. This book is aimed at those interested in the nature of intimate relationships as well as those wishing to expand their clinical skills, whether they are conducting one-on-one therapy with individuals struggling to establish and maintain intimate relations or are conducting conjoint treatment with troubled couples who have sought the therapist's assistance. Thompson and Tuch view relationships from a wide array of different perspectives: mentalization, attachment theory, evolutionary psychology, psychoanalysis, pattern recognition (neuroscience), and role theory. A mentalization based approach to couples therapy is clearly explained in a how to fashion, with concrete suggestions about how the therapist goes about clinically intervening given their expanded understanding of the dynamics of intimate relations outlined in the book. *The Stories We Tell Ourselves: Mentalizing Tales of Dating and Marriage* will appeal to psychoanalysts, psychotherapists, psychiatrists, psychologists, clinical social workers, marriage therapists, and all those interested in both learning more about the dynamics of one-on-one intimate relationships (dating and marriage) from a truly multidimensional perspective and in learning how to conduct mentalization-based couples therapy.

Changing Self-Destructive Habits Matthew D. Selekman, Mark Beyebach, 2014-09-25 For the first time in one volume self-harm, substance abuse, eating-disordered behavior, gambling, and Internet and cyber sex abuse—five crippling, self-destructive behaviors—are given a common conceptual framework to help with therapeutic intervention. Matthew Selekman and Mark Beyebach, two internationally-recognized therapists, know first-hand that therapists see clients who have problems with several of these habits in varying contexts. They maintain an optimistic, positive, solution-focused approach while carefully addressing problems and risks. The difficulties of change, the risk of slips and relapses, and the ups-and-downs of therapeutic processes are widely acknowledged and addressed. Readers will find useful, hands-on therapeutic strategies and techniques that they can use in both individual and conjoint sessions during couple, family, and one-on-one therapy. Detailed case examples provide windows to therapeutic processes and the complexities in these cases. Clinical interventions are put in a wider research context, while research is reviewed and used to extract key implications of empirical findings. This allows for a flexible and open therapeutic approach that therapists can use to integrate techniques and procedures from a variety of approaches and intervention programs.

Positive Couple Therapy Jefferson A. Singer, Karen Skerrett, 2014-03-05 Positive Couple Therapy: Using We-Stories to Enhance Resilience is a significant step forward in the couple literature. Utilizing a strengths-based approach, it teaches therapists and couples a unique method for uncovering positive potential within a relationship. The authors demonstrate how "We stories"—created, recovered and made anew—provide essential elements of connection. With vivid imagery, these stories capture the couple's sense of "We-ness," highlighting memorable moments of compassion, acceptance, and respect. A shared commitment to the "We" simultaneously builds the relationship and enables each individual in the partnership to feel a greater degree of both accountability and autonomy. Couples that can find their stories, share them with each other, and then carry them forward to family, friends, and a larger community are likely to preserve a sense of mutuality that will thrive over a lifetime of partnership. Positive Couple Therapy provides simple and practical instruction for reclaiming positive stories that can catalyze hope in relationships that have become stressed and strained. The authors weave together cutting edge thinking and research in attachment theory, narrative therapy, neuroscience, and adult development, as well as their own research and clinical experience to present vivid case histories, step-by-step strategies, exercises, questionnaires, and interview techniques. They cover a range of contemporary couple experiences: couples in conflict, LGBT partnerships, deployed and discharged military couples, and couples at various points across the life span. The authors' unique Me (to US) Scale, a 10-item tool that assesses the degree of mutuality a couple possesses at the start of treatment, gives therapists of any theoretical orientation the ability to put this intervention to immediate use.

The Ring Makes All the Difference Glenn T. Stanton, 2011-09-01 Why not cohabitate? Many believe nothing is better for their future marriage than a trial period—cohabitation. It's the fastest growing family type in the U.S. So how's that working out? Are people truly happier? Author Glenn Stanton offers a compelling factual case that nearly every area of health and

happiness is increased by marriage and decreased by cohabitation. With credible data and compassion, Stanton explores the reasons why the cohabitation trend is growing; outlines its negative outcomes for men, women, and children; and makes a case for why marriage is still the best arrangement for the flourishing of couples and society. This resource is ideal for those who are cohabitating or considering it, as well as pastors and counselors who need to be able to engage this issue.
