

Negative Impact Of Globalisation

Ann Marie Bissessar

Economics of Globalisation Partha Gangopadhyay,Manas Chatterji,2005-01-01 Globalisation has evolved to become the dominant economic, cultural, environmental and political phenomenon of our time. In economic terms, debates now extend beyond concepts of 'winners and losers', to key questions of how to deal with the problems unleashed by globalisation while preserving its benefits. This book will be indispensable in addressing these vital issues.

The Impact of Globalization on Infectious Disease Emergence and Control Institute of Medicine,Board on Global Health,Forum on Microbial Threats,2006-03-01 Globalization is by no means a new phenomenon; transcontinental trade and the movement of people date back at least 2,000 years, to the era of the ancient Silk Road trade route. The global spread of infectious disease has followed a parallel course. Indeed, the emergence and spread of infectious disease are, in a sense, the epitome of globalization. Although some experts mark the fall of the Berlin Wall as the beginning of this new era of globalization, others argue that it is not so new. The future of globalization is still in the making. Despite the successful attempts of the developed world during the course of the last century to control many infectious diseases and even to eradicate some deadly afflictions, 13 million people worldwide still die from such diseases every year. On April 16 and 17, 2002, the Forum on Emerging Infections held a working group discussion on the influence of globalization on the emergence and control of infectious diseases. The contents of the unattributed sections are based on the presentations and discussions that took place during the workshop. The Impact of Globalization on Infectious Disease Emergence and Control report summarizes the presentations and discussions related to the increasing cross-border and cross-continental movements of people and how this could exacerbate the emergence and global spread of infectious diseases. This report also summarizes the means by which sovereign states and nations must adopt a global public health mind-set and develop a new organizational framework to maximize the opportunities and overcome the challenges created by globalization and build the necessary capacity to respond effectively to emerging infectious disease threats.

The Turning World Guido Bertucci,Michael Duggett,2002 It is the task of the IIAS and the UNDESA to track and focus on changes in the atmosphere of world governance and public administration. This work shows that a new prestige has been earned by public servants, who are performing a public good, and who are in the centre of the turning world.

Development & Growth: Economic Impacts of Globalization Farhang Morady, Hakan Kapucu, Ömer

Yalçınkaya, 2017-04-14 The growth paradigm or the economic growth generally been presented as a positive, limitless and good for social problems. The term was hardly touched in pre-capitalism by any academic research. With the rise of capitalism and industrial revolution it became an important tool to measure production quantitatively and qualitatively. Industrialisation also encouraged the expansion of trade and gradual breakdown of the pre-capitalist order in 18th century in Britain. The spread of market had facilitated the specialisation, encouraging division of labour. Whilst for The Classical Political Economists; Adam Smith, David Ricardo and Thomas Malthus; economic growth is self-reinforcing. Marx pointed out importance of forces and relations of production and significance of social classes within it (Marx, 1863). Smith, Ricardo and Malthus were writing at a time when capitalist development was expanding fast and growth was a central in the process. The gradual impact of the West on the rest of world became part of a wider process of change in the World Economy. European capital increased its domination of the world trade through expansionist commercial policies (Wallerstein, 1979). The economic growth encouraged commerce. The necessity to export, and other technological changes formed part of the reason for the decline of feudalism. This transition from feudalism to capitalism began in the West and soon made an impact on the rest of the World. T Farhang Morady, Hakan Kapucu, Ömer Yalçınkaya (Development & Growth: Economic Impacts of Globalization) 12 In 1932 Simon Kuznets, the US economist identified Gross Domestic Product (GDP) to measure the national output of a country within a period. It has continued to be an important indicator to measure economic growth, but it has also been under considerable criticisms. For example; GDP treats resources as income without excluding depletion or depression of the resources. Moreover, GDP has been criticised for disregarding income distribution. Despite all the criticism, GDP has been the most significant indicator of growth and development. With the Post War-II reconstruction of devastated countries and in order to kick-start the World Economy, the state in both developed and developing countries became the important agency to facilitate economic growth. The establishment of the Bretton Woods institutions, the Keynesian model of government intervention and the US implementation of "New Deal" facilitated growth. This was deliberate strategy to reconstruct and create networks of international cooperation. This was pointed out by President Truman in 1949: A program of development based on the concepts of democratic fair-dealing. All countries, including our own, will greatly benefit from a constructive program for the better use of the World's human and natural resources (Truman, 1949). This meant the reinforcement and need to distribute the 'Benefits' of capitalist form of development, more widely, against the planned economy sustained by the Soviet Union. The economist such as Joseph Schumpeter pointed to the possibility that capitalist growth, if it is sustained, could abolish poverty (Schumpeter, 1954, pp66-68). Whilst development meant rapid industrialisation, GDP became a key policy objective for the policy makers and governments around the world, not just in the Soviet Union but the Western Capitalist World, to set targets for their Growth Rate. The end of the Cold War in the 1980s, for some, meant triumph of Neoliberal Capitalism. The others talked of trade liberalization; free movement of capital and the

development of information technology, facilitating the relocation of businesses across the world. (Ohmae, 1995). Friedman suggested that globalization is the Inevitable; Integration of markets, nation-states and technologies ... enabling individuals, corporations and nation-states, to reach around the world farther, faster, deeper and cheaper than ever before (Friedman, 1999). Development & Growth: Economic Impact of Globalization (Edited by: Farhang Morady, Hakan Kapucu, Ömer Yalçınkaya) 13 Francis Fukuyama (1992) suggested the new era as 'The End of History' through which the 'Liberal Idea' triumphed, leading to a new global hegemony. For Fukuyama the only route to modernity, growth and development is the Neo-liberal Democratic path under Global Capitalism. This optimism was not shared by all academics, as Globalization produced poor growth and polarization of wealth: what Collier terms the 'Bottom one Billion' (2008). As a result, there has been major criticism of the World Bank and the International Monetary Funds in the second half of the 1990s, especially with the Asian financial and economic crises. The response from these institutions has been vigorous. They continued to believe that liberalization, deregulation, and privatization represent the best way forward for growth and development. With 2008 world recession the World Economy has faced a new challenge. The emergence of powerful economies such as; China, India and Brazil; helped the world economy to grow, at least for now. However, the unevenness of the world economy continues to cause difficulties especially the US as they feeling the threat of their competitors such as China, Germany and even India. The victory of Donald Trump as the S President has represented an ideological shift from free trade advocate of global capitalism to a mixture of right-wing populism. Before and after the presidential election, he called for the revival of the American economy, which has been under considerable pressure since 2008 World Recession. In order to prove growth rate Trump has a huge challenge ahead, not least to deal with the competition from South East Asian economies, especially China. It remains to be seen whether the new US administration will continue with their populist rhetoric In this book, "Economic Impacts of Globalization: Growth & Development", several academicians provide different analysis of economic growth and economic development. The scientific ethics and responsibility of the works in the book belong to the authors / writers. The book compromises of 15 chapters focusing on economic growth and economic development in the era of globalisation. By taking different angles, they demonstrate different problems and solutions.

Globalization and Governance Ann Marie Bissessar,2014-10-04 Despite the controversial nature of globalization, there is no doubt that the pace and intensity of global interactions has been multiplied exponentially over the last few decades. Criticism of globalization is generally arranged into three camps: political, economic and cultural. Political critics point to the status of the small state and conclude either that it is in retreat, or that the state has reconstituted itself to confront the challenges posed by globalization, thereby transforming itself into a competition state. Economic critics hold that globalization is nothing new, that international transactions are in the logic of capitalism and that the trade along the silk route goes back centuries. Cultural critics protest that globalization is taking us headlong into the homogenization of the

world. Others warn of new fault lines that would lead to a clash of civilizations and international conflicts along those lines. Others lament that cultural globalization will end with the Americanization of the world. This collection of essays, like the debates themselves, is divided into three parts. The first section focuses on the political aspects of globalization. In one essay, Globalization and the Caribbean, the essayist argues that internationalization leaves no room for small countries in the Caribbean. The essays in the second section are devoted to an economic inquiry into the process and impact of globalization. In Inequality and the Division of Gains at the Global Level, one essayist notes that the logic of economic theory is being overwhelmed by the interests of the powerful, and that the concerns of the poor countries are important only to the point where they begin to impact the well-being of the rich. The final section explores the issue of cultural and social integration. Instructors considering this book for use in a course may request an examination copy here.

Globalization & Identity Majid Tehranian, B. Jeannie Lum, 2006 In the first decade of the twenty-first century, globalization and identity have emerged as the most critical challenges to world peace. This volume of Peace & Policy addresses the overarching question, What are the effects of globalization in the areas of culture, ethnic diversity, religion, and citizenship, and how does terrorism help groups attain a sense of global identity? Part I, Citizenship in a Globalizing World, reexamines globalization in light of the traditions from which human civilizations have evolved. Linda Groff focuses on Samuel R. Huntington's thesis that the Cold War would be followed by a clash of civilizations. Joseph A. Camilleri traces the history of the concept of citizenship and its transformation through the ages to modern times. Kamran Mofid argues that the marketplace is not just an economic sphere but one where economic and business interests must embrace the spiritual assets of the community. Majid Tehranian raises the problem of identity and advocates the assumption of global identity, responsibility, and citizenship. Part II, Convergence in Global Cultures, explores the complex issues of diversity in religions. Christopher Leeds, Vladimir Korobov, and Bharapt Gupt show how the reconceptualization of the world both geographically and regionally can recreate new sensibilities needed to overcome differences. Part III, Divergence in Global Conflicts, discusses the multiple dimensions of the globalizing effects of economic expansion and political strife experienced by different cultures at local and regional levels. Audrey Kitigawa and Ade Ogunrinade use Nigeria as an example of political manipulation of religious and ethnic groups to divert attention from the real problems of social and economic marginalization. Fred Riggs looks at how the Web has become a medium in the globalization of religious movements. The authors maintain that continuing efforts for dialogue across cultural and religious boundaries in today's interreligious and interfaith organizations can become a force for healing. Majid Tehranian is director of the Toda Institute for Global Peace and Policy Research. B. Jeannie Lum is an associate professor at the University of Hawaii at Manoa in the Department of Educational Foundations, College of Education.

Report of the Regional Workshop on the Effects of Globalization and Deregulation on Fisheries in the Caribbean,

Castries, Saint Lucia, 4-8 December 2000 Tietze, U., (ed.),2001-01-01 This report contains a record of the proceedings and recommendations of the workshop. It was attended by twenty-one participants from ten Caribbean countries, as well as FAO officers. Possible positive impacts of globalization identified at the workshop include: improved access to overseas markets; increase in intraregional trade; access to technological improvements; increased demand for fish products through further development of tourism; increase in the contribution of the fisheries sector to foreign currency earnings and to gross domestic product. Possible negative impacts were foreseen in terms of: higher prices of exportable fish products in domestic markets; increased pressure on fully or overexploited fish stocks; erosion of decision-making at various levels in the absence of adequate reforms in governance; difficulties on the part of small countries in meeting scales of production needed to compete in a global environment. The main outcome of the workshop is the formulation of a Caribbean Fisheries Agenda on Globalization (CFAG), which is aimed to aid Caribbean countries prepare for the challenges of globalization.

Globalization John Beynon,David Dunkerley,2000 First Published in 2001. Routledge is an imprint of Taylor & Francis, an informa company.

Globalization and the Developing Countries David Bigman,2002-01-01 The objective of this book is to review the impact of globalization on a number of issues. Key issues highlighted include: the high risk of producing traditional commodity crops for export; and the removal of many non-tariff trade barriers, which threaten the livelihoods of many farmers.

Health Policy in a Globalising World Kelley Lee,Kent Buse,Suzanne Fustukian,2002-08-08 Increasing recognition of the impact that globalisation may be having on public health has led to widespread concern about the risks arising from emerging and re-emerging diseases, environmental degradation and demographic change. This book argues that health policy making is being affected by globalisation and that these effects are, in turn, contributing to the kind of global health issues being faced today. The book explores how the actors, context, processes and content of health policy are changing as a result of globalisation, raising concerns about growing differences in who can influence health policy, what priorities are set, what interventions are deemed appropriate and ultimately who enjoys good and bad health. Bringing together a distinguished, international group of contributors, this book covers a comprehensive range of topics and geographic regions and will be invaluable for all those interested in health, social and public policy and globalisation.

Globalization and State Transformation in China Yongnian Zheng,2004 As China develops its economy, the author argues it will be held back by its refusal to import democratic values.

Economics Of G20: A World Scientific Reference (In 2 Volumes) Manmohan Agarwal, 2020-03-20 The G20 (or Group of Twenty) is an international body established to manage the global economy, and includes members from developing economies. This reference set examines the issues facing developing countries and studies the role that the G20 can play in light of continuing challenges and objectives to meet the UN's Sustainable Development Goals (SDG). Volume 1 sets out the state of the world economy and the intricate functions of the G20 in policy coordination and economic cooperation. It also deals with the interests and strategies of some developing country members of the G20. These chapters answer questions such as what the country expects from the G20, the strategies adopted to achieve its ends, the extent to which it sees itself as a representative of developing countries in its region and how does it seek to represent them. The G20 has also centred its efforts around helping countries achieve the UN Sustainable Development Goals (SDGs). Volume 2 concentrates on trade issues and the prospects of achieving the SDGs. In this context, it examines whether the SDGs themselves are a desirable goal in terms of what the nature of development is which underlies these goals.
