The Evolution of Conceptual Modeling Roland Kaschek, Lois M.L. Delcambre, 2011-01-19 Conceptual modeling represents a recent approach to creating knowledge. It has emerged in response to the computer revolution, which started in the middle of the 20th century. Computers, in the meantime, have become a major knowledge media. Conceptual modeling provides an answer to the difficulties experienced throughout the development of computer applications and aims at creating effective, reasonably priced, and sharable knowledge about using computers in business. Moreover, it has become evident that conceptual modeling has the potential to exceed the boundaries of business and computer usage. This state-of-the-art survey originates from the International Seminar on the Evolution of Conceptual Modeling, held in Dagstuhl Castle, Germany, in April 2008. The major objective of this seminar was to look into conceptual modeling from a historical perspective with a view towards the future of conceptual modeling and to achieve a better understanding of conceptual modeling issues in several different domains of discourse, going beyond individual (modeling) projects. The book contains 14 chapters. These were carefully selected during two rounds of reviewing and improvement from 26 presentations at the seminar and are preceded by a detailed preface providing general insights into the field of conceptual modeling that are not necessarily discussed in any of the chapters but nevertheless aid in conceptualizing the inner structure and coherence of the field. The chapters are grouped into the following three thematic sections: the evolution of conceptual modeling techniques; the extension of conceptual modeling to a service-oriented, peer-to-peer, or Web context; and new directions for conceptual modeling.

*Housing and Mortgage Markets in Historical Perspective* Eugene N. White, Kenneth Snowden, Price Fishback, 2014-10-17 The central role of the housing market in the recent recession raised a series of questions about similar episodes throughout economic history. Were the underlying causes of housing and mortgage crises the same in earlier episodes? Has the onset and spread of crises changed over time? How have previous policy interventions either damaged or improved long-run market performance and stability? This volume begins to answer these questions, providing a much-needed context for understanding recent events by examining how historical housing and mortgage markets worked—and how they sometimes failed. Renowned economic historians Eugene N. White, Kenneth Snowden, and Price Fishback survey the foundational research on housing crises, comparing that of the 1930s to that of the early 2000s in order to authoritatively identify what

contributed to each crisis. Later chapters explore notable historical experiences with mortgage securitization and the role that federal policy played in the surge in home ownership between 1940 and 1960. By providing a broad historical overview of housing and mortgage markets, the volume offers valuable new insights to inform future policy debates.

*Healthcare Information Management Systems* Marion J. Ball,Charlotte Weaver,Joan Kiel,Donald W. Simborg,Judith V. Douglas,James W. Albright,2013-04-17 Addressed to health care professionals, this book looks beyond traditional information systems and suggests how to bring a competitive advantage to hospitals and other health care providers. Speaking practitioner to practitioner, the authors explain how they use information technology to manage their health care institutions and to support the delivery of clinical care. The second edition incorporates the far-reaching advances of the last several years which has moved the field of health informatics from the realm of theory into practice. Major new themes in the field, such as a national information infrastructure and community networks, guidelines for case management, and community education and resource centers added. Topics such as clinical and blood banking have been thoroughly updated.

**Multinational Enterprises and Host Country Development** Holger Görg,2016-06-24 Multinational Enterprises and Host Country Development is a unique collection of papers looking at different aspects of the link between multinational enterprises and their effects on the host countries' economies. The volume studies effects of multinationals on R&D, innovation, productivity, wages, as well as growth and survival of firms in the host countries, and distinguishes direct and indirect effects through spillovers. All the analyses are conducted using firm level data for countries as diverse as China, Ireland, Sweden, Ghana, the UK or a group of countries in Central and Eastern Europe. This volume is a valuable reading for graduate students and researchers wishing to investigate the impact of multinationals.

*The Up Side of Down* Megan McArdle,2014-02-11 "Clever, surprisingly fast-paced, and enlightening." —Forbes Most new products fail. So do most businesses. And most of us, if we are honest, have experienced a major setback in our personal or professional lives. So what determines who will bounce back and follow up with a home run? What separates those who keep treading water from those who harness the lessons from their mistakes? One of our most popular business bloggers, Megan McArdle takes insights from emergency room doctors, kindergarten teachers, bankruptcy judges, and venture capitalists to teach us how to reinvent ourselves in the face of failure. *The Up Side of Down* is a book that just might change the way you

lead your life.

*Conflict and Cooperation in National Competition for High-Technology Industry* National Research Council, Kiel Institute for World Economics, Hamburg Institute for Economic Research, Board on Science, Technology, and Economic Policy, 1996-10-15 This unique volume contains a powerful set of recommendations on issues at the center of international discussions on investment, trade, and technology policy. They take into account the globalization of industrial activity and the special characteristics of high-technology industries while recognizing the continued policy role of national governments. The book identifies the rationale for promotional measures for high-technology industries, delineates sources of friction among the leading industrial countries, and proposes policies to enhance international cooperation and strengthen the multilateral trading regime. This volume also examines the factors driving collaboration among otherwise competing firms and national programs, highlights the need to develop principles of equitable public and private international cooperation, and emphasizes the linkage between investment, government procurement, and other trade policies and prospects for enhanced international cooperation.

*External Debt, Savings and Growth in Latin America* Ms. Ana María Martirena-Mantel, 1987-01-15 Edited by Ana María Martirena-Mantel, this volume, published in Spanish and English, contains the papers presented at a seminar sponsored jointly by the IMF and the Instituto Torcuato di Tella of Argentina. The seminar was held in Don Torcuato, near Buenos Aires. The volume consists of six papers, commentaries, and an overview by the editor, who also acted as moderator at the seminar.

Atomic Tunes Tim Smolko, Joanna Smolko, 2021-05-11 What is the soundtrack for a nuclear war? During the Cold War, over 500 songs were written about nuclear weapons, fear of the Soviet Union, civil defense, bomb shelters, McCarthyism, uranium mining, the space race, espionage, the Berlin Wall, and glasnost. This music uncovers aspects of these world-changing events that documentaries and history books cannot. In *Atomic Tunes*, Tim and Joanna Smolko explore everything from the serious to the comical, the morbid to the crude, showing the widespread concern among musicians coping with the effect of communism on American society and the threat of a nuclear conflict of global proportions. *Atomic Tunes* presents a musical history of the Cold War, analyzing the songs that capture the fear of those who lived under the shadow of Stalin, Sputnik, mushroom clouds, and missiles.
