## Kevin Hull

**Lance Armstrong** Paula Johanson, 2011-04-07 This readable biography of Lance Armstrong surveys his legendary cycling career as well as the details of his life outside of cycling. The son of a single mother and born in a run-down housing project, American athlete Lance Armstrong emerged from decidedly modest beginnings. Four decades later, Armstrong has established himself as not only one of the world's greatest and most successful athletes, but also as an activist for charitable causes. Through the Lance Armstrong Foundation, Armstrong supports cancer research and treatment while he serves as the ultimate inspiration for other athletes and cancer survivors. *Lance Armstrong: A Biography* provides a detailed treatment of Armstrong's life, from the lasting influences of his boyhood and the early years of his competitive training, to his battle with cancer, his divorce, and the birth of his fifth child during his second comeback to professional cycling. The book portrays him both as a champion athlete and a family man, and gives a candid assessment of his career, including Armstrong's less successful periods.

**Lance Armstrong's War** Daniel Coyle, 2006-06-13 *Lance Armstrong's War* is the extraordinary story of greatness pushed to its limits; a vivid, behind-the-scenes portrait of perhaps the most accomplished athlete of our time as he vies for a historic sixth straight victory in the toughest sporting event on the planet. It is the true story of a superlative sports figure fighting on all fronts—made newly vulnerable by age, fate, fame, doping allegations, a painful divorce, and an unprecedented army of challengers—while mastering the exceedingly difficult trick of being Lance Armstrong, a combination of world-class athlete, celebrity, regular guy, and, for many Americans, secular saint. With a new afterword by the author, featuring in-depth reporting on: Armstrong's unprecedented seventh consecutive Tour de France victory New blood doping allegations Armstrong's continuing personal and legal battles, and his retirement A fascinating journey through the little-known landscape of professional bike racing, *Lance Armstrong's War* provides a hugely insightful look into the often inspiring, always surprising core of a remarkable athlete and the world that shapes him.

**Societal Deception** Geoffrey Lawrence, 2024-06-18 This book provides a comprehensive overview of 'societal deception' - how and why people are deceived and led to believe fake news. Coherently blending critical political economy and sociology, the author provocatively examines how corporations, political parties, the media, think tanks and assorted 'influencers' seek to manipulate public opinion to achieve their goals. This book spans an array of contemporary topics and

issues not normally tackled by a single writer – the media, genetic engineering, fast food, environmental pollution, climate change, economic inequality, political manipulations, sports, and religion. While critical in subject matter, and replete with easily accessible and reliable sources, this book is highly readable and entertaining for the general as well as academic audience interested in current global issues.

*One More Step The 638 Best Quotes for the Runner* Randy L. Thurman, 2012-06-29 Check these quotes out: 1.) “The miracle isn't that I finished. The miracle is that I had the courage to start.” John Bingham 68.) “There are clubs you can't belong to, neighborhoods you can't live in, schools you can't get into, but the roads are always open.” Nike ad 224.) “No matter how slow I run, I'm still faster than my couch.” Anonymous 606.) “Success isn't how far you got, but the distance you traveled from where you started.” Steve Prefontaine and so many more . . . check them out!

**Sports, Media, and Society** Kevin Hull, 2024-03-26 Whether espoused by sports leagues, teams, or individual athletes, social issues are part of the sporting world fabric. The sports media often plays the gatekeeper, deciding how messages are presented and to what extent they're covered—if at all. *Sports, Media, and Society* investigates the impact of societal issues in sports and how the media reports those stories. Why does the sports media operate in the manner that it does, and what's the impact of its decisions on the audience? With *Sports, Media, and Society*, there is now a resource that combines mainstay class discussion points, current case studies, and theoretical and historical foundations in one comprehensive text. The book's 34 chapters are each short and concise—a format preferred by instructors—covering a wide range of topics and easily digestible for students. Part I covers sports media history and the media's role as gatekeeper. Chapters explore the history and evolution of various media—newspapers, magazines, radio, television, and social media—and the business of and competition between sports media entities. Case studies examine NBC's Olympics coverage and the nimbleness of Sports Illustrated in the digital space. Part II showcases television's impact on how fans follow sports. Discussions include ABC's *Wide World of Sports*, which exposed viewers to events around the globe; ESPN's foray into 24/7 sports coverage; and Fox Sports' shocking NFL deal, which marked a new era in media rights negotiations and sports broadcasting technologies. The intersection of sports and social issues is the focus of part III. Numerous issues are addressed, punctuated by case studies involving key players and events related to each topic. Cases concerning Colin Kaepernick, USWNT (and coverage of women's sports generally), LGBTQ+ issues, and obstacles faced by women working in sports media are highlights, while examinations of social identity theory and framing provide context on how people identify with specific groups and how the media influences opinions. Athletes and sport entities are constantly in the news—not always in a positive light. Part IV addresses crisis management and communication, featuring case studies about Tiger Woods, Lance Armstrong, LeBron James (*The Decision*), Kobe Bryant (his death and the misreporting of facts surrounding it), and the Houston Astros sign-stealing scandal. The text concludes with part V, which explores emerging trends in sports media and society. Through social

media, virtually anyone can become a thought leader (wresting control from traditional outlets), and teams and athletes can dialogue directly with fans, effectively sidelining sports journalists. Chapters on the formerly taboo subjects of athlete mental health and sports wagering, as well as the exploding popularity of esports, round out the text. Sports shape our culture in numerous ways, and the sports media plays a transformative role in how it occurs. Sports, Media, and Society prepares tomorrow's sports journalists and communicators to venture beyond the how-tos of developing content to understanding the whys behind it.

*Quotes to Inspire Great Reading Teachers* Cathy Collins Block, Susan E. Israel, 2006-05-12 A year's worth of thought-provoking quotations will inspire you to reflect on the way you teach and provide you with tools to inspire your students, too!

**Power of the Octagon** Anthony Johnson, 2011-12 The sport of mixed martial arts provides its fans and athletes with a unique set of practices, philosophies, and techniques that can generate results and success in any aspect of life. Like the champions of MMA, there are those who excel in the world of business—those who have the ability to break sales quotas, build unstoppable teams, create dynamic businesses, and do so while savoring every minute they are alive. The connection between actions and mentalities of those who generate success is common to many fields, but in the world of MMA, the examples of how to generate results in one's area of endeavor is dynamically visible on multiple levels. *Power of the Octagon* is a comprehensive guide to enhancing eight critical areas of excellence. These areas include creating one's vision; defining and using psychological drivers for increased motivation; eliminating fear; working with tenacity; maximizing dedication, passion, and focus on success; establishing leadership; dealing with setbacks; and harnessing the winning mind. The goal of *Power of the Octagon* is to offer dynamic strategies of improvement in these eight areas in order to increase the overall performance of an individual. The skills you learn can contribute to accelerating your performance and helping you generate success in business, academics, military, and life in general. If you're striving to be a warrior of success inside or outside of the cage, *Power of the Octagon* can help.

**Examining Identity in Sports Media** Heather L. Hundley, Andrew C. Billings, 2009-05-12 Including the work of top sports communication researchers, *Examining Identity in Sports Media* explores identity issues, including gender, ethnicity, nationality, sexual orientation, and (dis)ability, as well as the intersections within these various identity issues. This co-edited, twelve-chapter book investigates how various identity groups are framed, treated, affected, and shaped by a ubiquitous sports media, including television, magazines, film, the Internet, and newspapers. While other books may devote a chapter or section to issues of identity in sports media, this book offers a complete examination of identity from cover to cover, allowing identity variables to be both isolated and intermingled to capture how identity is negotiated within sports media platforms. Far more than a series of case studies, this book surveys the current state of the field while providing insight on future directions for identity scholarship in sports communication. *Examining Identity in Sports Media* is ideal for

undergraduate or graduate-level courses in Sports Communication, Sports Media, Media Criticism, Sports Sociology, Gender Communication, and Identity Politics.

**An Economist Goes to the Game** Paul Oyer, 2022-07-12 An engaging look at the ways economic thinking can help us understand how sports work both on and off the field Are ticket scalpers good for teams? Should parents push their kids to excel at sports? Why do Koreans dominate women's golf, while Kenyans and Ethiopians dominate marathon racing? Why would Michael Jordan, the greatest player in basketball, pass to Steve Kerr for the game-winning shot? Paul Oyer shows the many ways economics permeates the world of sports. His topics range from the business of sport to how great athletes use economic thinking to outsmart their opponents to why the world's greatest sports powerhouse (at least per capita) is not America or China but the principality of Liechtenstein. Economics explains why some sports cannot stop the use of performance-enhancing drugs while others can, why hundred-million-dollar player contracts are guaranteed in baseball but not in football, how one man was able to set the world of sports betting on its ear—and why it will probably never happen again. This book is an entertaining guide to how a bit of economics can make you a better athlete and a more informed fan.

**Boost!** Michael Bar-Eli, 2018 Through original scientific research, unique case studies, and anecdotes from the world of sports and beyond, author and internationally recognized sports psychologist Dr. Michael Bar-Eli explains the psychological underpinnings of human behavior and how we can harness this knowledge to perform at our highest levels, succeeding in our careers and personal lives.

The Life of I Anne Manne, 2014-07-01 Far from being the work of a madman, Anders Breivik's murderous rampage in Norway was the action of an extreme narcissist. As the dead lay around him, he held up a finger asking for a Band-Aid. Written with the pace of a psychological thriller, *The Life of I* is a compelling account of the rise of narcissism in individuals and society. Manne examines the Lance Armstrong doping scandal and the alarming rise of sexual assaults in sport and the military, as well as the vengeful killings of Elliot Rodger in California. She looks at narcissism in the pursuit of fame and our obsession with 'making it'. She goes beyond the usual suspects of social media and celebrity culture to the deeper root of the issue: how a new narcissistic character-type is being fuelled by a cult of the self and the pursuit of wealth in a hypercompetitive consumer society. *The Life of I* also offers insights from the latest work in psychology, looking at how narcissism develops. But Manne also shows that there is an alternative: how to transcend narcissism, to be fully alive to the presence of others; how to create a world where love and care are no longer turned inward.

**EyeOnAfrica** Ian Mowbray-Williams, 2012-07-20 University graduation, the reality of working life, thwarted love and the terrifying prospect of growing up - the traditional breeding ground for many amazing adventures and ideas. So when, in this atmosphere of anxiety and dread, two strangers, Ian and Alan, started playing a simple game of pool in the local pub, it was almost inevitable that a life changing idea would be born. In a desperate effort to hide the fact that he was losing badly, Alan

tried to distract Ian from the table: Did you see the football last night? Have you found a job ? Do you fancy cycling to Africa? It only took a second, but that was it. Ian's eyes lit up and EyeOnAfrica was born. (Alan still lost the game). So, despite never having done anything quite like it before, the two students start to plan what would undoubtedly become the greatest road trip of their lives, a 12,000-mile bicycle ride from London to Cape Town. EyeOnAfrica is their fascinating story.

**The Pentagon's Brain** Annie Jacobsen, 2015-09-15 Discover the definitive history of DARPA, the Defense Advanced Research Project Agency, in this Pulitzer Prize finalist from the author of the New York Times bestseller Area 51. No one has ever written the history of the Defense Department's most secret, most powerful, and most controversial military science R&D agency. In the first-ever history about the organization, New York Times bestselling author Annie Jacobsen draws on inside sources, exclusive interviews, private documents, and declassified memos to paint a picture of DARPA, or the Pentagon's brain, from its Cold War inception in 1958 to the present. This is the book on DARPA -- a compelling narrative about this clandestine intersection of science and the American military and the often frightening results.

Emotions in Sport and Games Alfred Archer, Nathan Wildman, 2020-12-17 Emotions play an important role in both sport and games, from the pride and joy of victory, the misery and shame of defeat, and the anger and anxiety felt along the way. This volume brings together experts in the philosophy of sport and games and experts in the philosophy of emotion to investigate this important area of research. The book discusses the role of the emotions for both participants and spectators of sports and games, including detailed discussions of suffering, shame, anger, anxiety, misery and hatred. It also investigates the issues of collective emotions in relation to sport such as the shared joy of a football crowd when their team scores a goal. In addition, this volume examines the role of pretence and make believe in emotional reactions to sport. In so doing, it makes important contributions both to the philosophy of sport and to the philosophy of emotions, which will be of interest to researchers and students in both fields. This book was first published as a special issue of the Journal of the Philosophy of Sport.

**Spatializing Authoritarianism** Natalie Koch, 2022-06-30 Authoritarianism has emerged as a prominent theme in popular and academic discussions of politics since the 2016 US presidential election and the coinciding expansion of authoritarian rhetoric and ideals across Europe, Asia, and beyond. Until recently, however, academic geographers have not focused squarely on the concept of authoritarianism. Its longstanding absence from the field is noteworthy as geographers have made extensive contributions to theorizing structural inequalities, injustice, and other expressions of oppressive or illiberal power relations and their diverse spatialities. Identifying this void, Spatializing Authoritarianism builds upon recent research to show that even when conceptualized as a set of practices rather than as a simple territorial label, authoritarianism has a spatiality: both drawing from and producing political space and scale in many often surprising ways. This volume advances the argument that authoritarianism must be investigated by accounting for the many scales at which it

is produced, enacted, and imagined. Including a diverse array of theoretical perspectives and empirical cases drawn from the Global South and North, this collection illustrates the analytical power of attending to authoritarianism's diverse scalar and spatial expressions, and how intimately connected it is with identity narratives, built landscapes, borders, legal systems, markets, and other territorial and extraterritorial expressions of power.

**Constructing Crisis** Bert Spector, 2019-09-05 Crises aren't real objective events. Instead, Spector demonstrates they are claims of urgency imposed by leaders to assert power and exert control.

**Lance Armstrong** John F. Grabowski, 2005 Profiles the life and career of Lance Armstrong.

*Addressing the Unproductive Classroom Behaviours of Students with Special Needs* Steve Chinn, 2010-01-15 This book will help you recognise potential indicators of Asperger Syndrome, dyslexia, dyspraxia, AD/HD, physical disabilities and speech and language disorders; explores the benefits of different interventions; and offers practical strategies for improving pupils' behaviours, social skills and self-esteem.

**Putting Image Repair to the Test** Joseph R. Blaney, 2015-12-17 Putting Image Repair to the Test: Quantitative Applications of Image Restoration Theory examines content analytic, attitudinal, and behavioral claims to advance current assertions made about image repair discourse, its effects, and the surrounding discourse. The contributors provide empirical data to answer research questions and to test various hypotheses in one substantive volume that builds on prior research in this field. Recommended for scholars in communication studies, public relations, and journalism.

*East African Running* Yannis Pitsiladis, John Bale, Craig Sharp, Tim Noakes, 2007-01-24 What makes East African middle and long distance runners the best in the world? How should contemporary academia approach this question? The success of East African distance runners has generated a plethora of studies but much of the 'evidence' presented to support hypotheses is anecdotal, arguments being led by non-academics who use popular media as their medium rather than relying on scientific publications. This has resulted in many stereotypical arguments being advocated. Within the academic community, research has also been restricted by its isolation within either the natural science or social science communities. *East African Running: Towards a Cross Disciplinary Perspective*, presents a rare collaboration between researchers from the sports sciences and social sciences to explore the questions raised by the phenomena of East African success on the track. The text includes: psycho-social and economic explanations physiological and genetic explanations attempts to provide unified theories bringing together ideas from natural and social sciences Includes contributions from John Bale, Jim Denison, Timothy D. Noakes and Craig Sharp.
