The World Summit on Sustainable Development L. Hens, Bhaskar Nath, 2005-11-17 This book provides an overview of the most important issues as they are dealt with in the Johannesburg World Summit on Sustainable Development's Plan of Implementation. It addresses the science behind the discussions on poverty, production and consumption patterns, water, energy, Small Island Developing States, sustainability issues in Central/Eastern Europe and Latin America, and the role of the financial world in the sustainable development of education, science and research.

The Plain Language Guide to the World Summit on Sustainable Development Rosalie Callway, 2012-08-21 The World Summit on Sustainable Development (WSSD) in Johannesburg in 2002 brought together thousands of delegates who mapped out the future of the global sustainable development agenda. The resulting technical document, the Johannesburg Plan of Implementation (JPOI), identifies priorities in the implementation of Agenda 21 and other international agreements, and commitments that will take these priorities forward. This plain language version provides an invaluable reference to the outcomes of the WSSD by explaining the JPOI clearly for the lay person and expert alike.

Worth Saving Anne Egelston, 2022-08-31 This textbook is intended to be used in an upper-level international environmental issues class as part of the American Environmental Studies and Sciences book series. This class is commonly taught at both the undergraduate and graduate level as part of either an environmental studies program, a political science

program, or within a policy track of an environmental science program. Given the length of time that negotiations have occurred, a new generation of students and practitioners will need to understand the complex processes that produced many of our environmental treaties. The majority of the students in environmental studies do not have a background in political science. Moving from a political science approach to an interdisciplinary approach will benefit the students by making the material more accessible. As these fields continue to grow and develop, regulatory compliance becomes increasingly important. Thus, this book is aimed at adding a business and industry perspective to this field where appropriate.

The Untold Story of the World's Leading Environmental Institution Maria Ivanova, 2021-02-23 The past, present, and possible future of the agency designed to act as the world's environmental conscience. The United Nations Environmental Programme (UNEP) was founded in 1972 as a nimble, fast, and flexible entity at the core of the UN system--a subsidiary body rather than a specialized agency. It was intended to be the world's environmental conscience, an anchor institution that established norms and researched policy, leaving it to other organizations to carry out its recommendations. In this book, Maria Ivanova offers a detailed account of UNEP's origin and history. Ivanova counters the common criticism that UNEP was deficient by design, arguing that UNEP has in fact delivered on much (though not all) of its mandate.

Rethinking Religion and Politics in a Plural World Julia Berger, 2021-01-14 In this book, Julia Berger examines internal meaning-making structures and processes driving NGO behavior, identifying constructs from within a religious tradition that forge new ways of pursuing social change. She evaluates the operation of a distinct rationality, arguing that action is guided not simply by beliefs and values, but also by a combination of elements so intrinsic as to constitute an "organizational DNA." These hidden structures and rationalities manifest themselves in new modes of engagement and agency; they help us to see the pivotal role of religion in shaping notions of peace, progress, and modernity. To demonstrate the operation and salience of such a rationality, Berger draws on the example of the worldwide Baha'i community. Emerging in 19th century Iran, the community's theological engagement with questions of justice, the unity of humankind, and the emerging global order, constitute one of the most distinct and compelling, yet least-researched examples of religious engagement with the pressing questions of our time. Analyzing events spanning a 75-year period from 1945-2020, this book provides a unique historical and contemporary perspective on the evolving role of religion and civil society in the modern world.

Greening Trade Remedies Pieter Van Vaerenbergh, 2023-09-28 This book explores the role of trade remedies in liberalising environmental trade and discouraging environmentally harmful trade. As trade remedies can pose a significant obstacle to environmental trade, this book outlines how trade negotiators can implement restrictions on the application of trade remedies on environmental goods. It also assesses whether and how investigating authorities can account for differences in environmental protection standards in trade remedy investigations and considers what a possible 'trade remedy' for environmental harm might look like. Although the book concludes that trade remedies will remain a trade instrument primarily driven by economic and competitiveness concerns, it demonstrates how environmental considerations can guide trade remedy policy, how investigating authorities can properly account for the environmental costs of production, and how the limited policy space available in the WTO Agreements on Trade Remedies can be used to pursue green policy goals.

Security in International Climate Policy Zehra Askinsena Ilkilic, 2024-11-18 The impacts of climate change are increasingly felt worldwide, affecting every country regardless of geographical location. Over the past 50 years, numerous treaties have been produced that are aimed at combatting climate change. However, these international efforts have often been hindered by the actions of great powers prioritising their own interests over global solutions. Since security is one of the most determining factors in states' decision-making, *Security in International Climate Policy* analyses the relationship

between states' security policies and their efforts against climate change. The book hypothesises that security policies negatively affect measures against climate change. While the security policies of great powers pose a hurdle for a successful climate policy in the first stages of efforts, there is a shift in the 21st century, when climate change itself begins to threaten the security of states. Based on these findings, the author predicts future policy trends and makes policy recommendations.

International Organizations and the Law of the Sea 2002 Barbara Kwiatkowska, Harm Dotinga, Erik J. Molenaar, Alex G. Oude Elferink, Alfred H.A. Soons, 2005-04-01 This is the last volume in the Series. Now in its 18th year, the NILOS Documentary Yearbook provides the reader with an excellent collection of documents related to ocean affairs and the law of the sea, issued each year by organizations, organs and bodies of the United Nations system. Documents of the UN General Assembly and Security Council, Meeting of States Parties to the UN Law of the Sea Convention, CLCS, ISBA, ITLOS, Follow-ups to the UN Fish Stocks and Small Island States Conferences, WSSD, ECOSOC, UNEP and UNCTAD are reproduced first, followed by the documents of FAO, IAEA, IMO and UNESCO/IOC. As in the previous volumes, documents which were issued in the course of 2002 are reproduced while other relevant documents are listed. The NILOS Documentary Yearbook has proved to be of invaluable assistance in facilitating access of the international community of scholars and practitioners in ocean affairs and the law of the sea to essential documentation. The entry of the 1982 UN Law of the Sea Convention into force in 1994 and of the Part XI Agreement in 1996, as well as of the UN Fish Stocks Agreement in 2001, coupled with the ongoing follow-up to review of the UNCED Agenda 21 by the 2002 Johannesburg World Summit, make continuation of this assistance of particular significance in the years to come. The members of the Yearbook's Advisory Board are: Judges Abdul Koroma and Shigeru Oda of the ICJ, UNDOALOS Director Dr. Vladimir Golitsyn, ITLOS President Dolliver Nelson and Judges Thomas Mensah and Tullio Treves, as well as Rosalie Balkin, Edward Brown, Bernard Oxman and Shabtai Rosenne.

Global Environmental Politics Hayley Stevenson, 2018 This introduction to global environmental politics examines why environmental challenges occur and how we can effectively respond to them.
