Elastic Architecture Stephen J. Phillips, 2017-04-07 Twentieth-century architect Frederick Kiesler's innovative multidisciplinary practice responded to the ever-changing needs of the body in motion, anticipating the research-oriented practices of contemporary art and architecture. In 1960, the renowned architect Philip Johnson championed Frederick Kiesler, calling him "the greatest non-building architect of our time." Kiesler's ideas were difficult to construct, but as Johnson believed, "enormous" and "profound." Kiesler (1890-1965) went against the grain of the accepted modern style, rejecting rectilinear glass and steel in favor of more organic forms and flexible structures that could respond to the ever-changing needs of the body in motion. In *Elastic Architecture*, Stephen Phillips offers the first in-depth exploration of Kiesler's innovative and multidisciplinary research and design practice. Phillips argues that Kiesler established a new career trajectory for architects not as master builders, but as research practitioners whose innovative means and methods could advance alternative and speculative architecture. Indeed, Kiesler's own career was the ultimate uncompromising model of a research-based practice. Exploring Kiesler's formative relationships with the European avant-garde, Phillips shows how Kiesler found inspiration in the plastic arts, experimental theater, early animation, and automatons to develop and refine his spatial concept of the Endless. Moving from Europe to New York in the 1920s, Kiesler applied these radical Dadaist, constructivist, and surrealist practices to his urban display projects, which included shop windows for Saks Fifth Avenue. After launching his innovative Design Correlation Laboratory at Columbia and Yale, Kiesler went on to invent new houses, theaters, and galleries that were meant to move, shift, and adapt to evolutionary changes occurring within the natural and built environment. As Phillips demonstrates vividly, although many of Kiesler's designs remained unbuilt, his ideas proved influential to later generations of architects and speculative artists internationally, including Archigram, Greg Lynn, UNStudio, and Olafur Eliasson.

This Thing Called Theory Teresa Stoppani, Giorgio Ponzio, George Themistokleous, 2016-11-10 22 White, wide and scattered: picturing her housing career -- 23 Toward a theory of Interior -- 24 Repositioning. Having ideas -- 29 Post-scriptum. 'But that is not enough' -- Index

There Is More Brian Houston, 2018-03-20 Founder and Global Senior Pastor of Hillsong Church and author of LIVE LOVE LEAD shows how, with God's power, you can believe and achieve a life that exceeds every earthly expectation. When you surrender control and follow God's guidance, you become empowered and equipped to do the impossible, reach higher, and go further than you could have ever imagined--giving Him all the glory. By building our lives around godly principles, surrounding ourselves with wisdom, and living for a cause greater than ourselves, we can effectively live out God's purposes and have an enduring impact. As Brian Houston has personally discovered, when we depend on Jesus as the source for our identity, our lives can be a lasting legacy that maximize the gifts He has given each of us as unique individuals. There is More is for anyone who wants to be challenged to live with expectancy. Ephesians 3 is a call to release the immeasurable potential within you and the exceeding, abundant, and above plans and purposes of a Holy God that are beyond your greatest imagination. Now to Him who is able to do exceedingly abundantly above all that we ask or think, according to the power that works in us, to Him be glory in the church by Christ Jesus to all generations, forever and ever. Amen (Ephesians 3:20-21).

GNS3 Network Simulation Guide "RedNectar" Chris Welsh, 2013-10-25 GNS3 Network Simulation Guide is an easy-to-follow yet comprehensive guide which is written in a tutorial format helping you grasp all the things you need for accomplishing your certification or simulation goal. If you are a networking professional who wants to learn how to simulate networks using GNS3, this book is ideal for you. The introductory examples within the book only require minimal networking knowledge, but as the book progresses onto more advanced topics, users will require knowledge of TCP/IP and routing.

L.A. [Ten] Stephen John Phillips, 2014 This book offers a casual, witty, and approachable retrospective on the characters, environment, and cultural history of L.A. architecture as remembered through a series of oral history interviews with the architects conducted by Stephen Phillips alongside Wim de Wit, Christopher Alexander, and the students of the Cal Poly L.A. Metro Program in Architecture and Urban Design.

Canada Michelangelo Sabatino, Rhodri Windsor Liscombe, 2016-11-15 Canada is a country of massive size, of diverse geographical features and an equally diverse population—all features that are magnificently reflected in its architecture. In this book, Rhodri Windsor Liscombe and Michelangelo Sabatino offer a richly informative history of Canadian architecture that celebrates and explores the country's many contributions to the spread of architectural modernity in the Americas. A distinct Canadian design attitude coalesced during the twentieth century, one informed by a liberal, hybrid, and pragmatic mindset intent less upon the dogma of architectural language and more on thinking about the formation of inclusive spaces and places. Taking a fresh perspective on design production, they map the unfolding of architectural modernity across the country, from the completion of the transcontinental railway in the late 1880s through to the present. Along the way they discuss architecture within the broader contexts of political, industrial, and sociocultural evolution; the urban-suburban expansion; and new building technologies. Examining the works of architects and firms such as ARCOP, Eric Arthur, Ernest Cormier, Brigitte Shim, and Howard Sutcliffe, this book brings Canadian architecture chronologically and thematically to life.

The Architectural Forum, 1923

The Return of Sacred Architecture Herbert Bangs, 2006-11-14 An inspirational call for a return to the tenets of traditional architecture as a remedy for the dehumanizing standards of modern architecture • Explains how modern architecture is emblematic of our current estrangement from the spiritual principles that shaped humanity's greatest civilizations • Reveals how the ancient laws of sacred proportion and harmony can be restored The ugly buildings that characterize the modern landscape are inferior not only to the great cathedrals of medieval Europe and the temples of ancient Egypt and Greece, but even to lesser buildings of the more recent past. The great masterworks of our ancestors spoke to humanity's higher nature. Architect Herbert Bangs reveals how today's dysfunctional buildings bring out the worst in humanity, reinforcing that which is most base within us. He shows how, through the ancient laws of proportion and number, architecture once expressed the harmonious relationship between man and the cosmos. In early times, the architect worked within a sacred and esoteric tradition of creating structures through which human beings could gain insight into the nature of the divine reality. Today, that tradition has been abandoned in favor of narrowly defined utilitarian principles of efficiency and economy. In *The Return of Sacred Architecture*, Bangs provides the key to freeing architecture from the crude functionality of the twentieth century: the architects of the modern human landscape must find the deep-felt connection to the cosmos that guided the inner lives of those who built the temples of the past. The form of their buildings will then reflect the sacred patterns of geometry and proportion and bring forth greater harmony in the world.

Questioning Architectural Judgment Steven A. Moore, Barbara B. Wilson, 2013-07-24 The book shines light on the problem of judgment, particularly in the realm of architectural technics and the codes that regulate it. The struggle to define sustainability, and thus judge architecture through such lenses, is but one dimension of the contemporary problem of

judgment. By providing the reader with an inherently interdisciplinary study of a particular discipline—architecture, it brings to the topic lenses that challenge the too frequently unexamined assumptions of the discipline. By situating architecture within a broader cultural field and using case studies to dissect the issues discussed, the book emphasizes that it is not simply a matter of designing better, more efficient, or more stringent codes to guide place-making, but a matter of reconstructing the boundaries of the systems to be coded. The authors are winners of the EDRA Place-Research Award 2014 for their work on the Green Alley Demonstration Project used in the book.

People-Centered Architecture: Design Practice Education Milton Shinberg, 2025-06-25 Shinberg has done something truly impressive: He has created a practical framework for architectural thinking and design, grounded in the latest research on human perception and cognition. His ideas and insights offer a fresh perspective that have helped me clarify many aspects of my own approach to design. —Stefan Behling, Architect, Senior Executive Partner, Head of Studio, Foster+Partners, London This book is a must-read for architects and designers at any stage of their career. His inspiring and practical narrative makes even the most complex concepts accessible. Along the way, he offers aspiring and experienced professionals a fresh perspective to reignite their passion for architecture. —Andrea de Paiva, Architect, Urban Planner, and Author, Director of NeuroAU at the University of Brasilia Milton Shinberg is at the vanguard of architects convinced that the design of buildings for people to flourish should incorporate a deep understanding of human psychology and neuroscience. A very clearly written book, rich with reflections from the science of human emotions, embodiment, and aesthetics, *People-Centered Architecture* will greatly enhance architectural thinking, education, and practice. —Anjan Chatterjee, MD, FAAN, Professor of Neurology, Psychology, and Architecture, University of Pennsylvania A veteran architect's pragmatic guide to re-energizing design thinking, architectural practice and architectural education, with pivotal insights from the human sciences and wisdom harvested from non-architects. *People-Centered Architecture: Design Practice Education* is a unique and probing exploration designed to help architects better serve everyone who uses what architects design. In this one-of-a-kind book, architect and educator Milton Shinberg presents game-changing approaches to enhance, reorient, and re-energize design thinking. Shinberg draws from decades of dialogue with architects, designers, clients, artists, scientists, teachers, and his own students. His prompts and provocations, written in a clear and accessible narrative style, are organized to help architects, who are humanists, come to know much more about humans. Wise design becomes easier. In one concise volume, *People-Centered Architecture: Design Practice Education* delivers a vibrant framework for architectural practice, for students and teachers of architecture, and for clients and stakeholders. Through this book, each will see their project partners more clearly, more empathetically, and in ways that foster richer, better brainstorming and more productive collaboration. The “coalition of the curious,” people intrigued by architecture and architects, will get a peak behind the curtain.

The Socius of Architecture Ad Graafland, 2000 Tri-part investigation of architecture, urbanism and design proposals. Critical analysis, sociological research and architectural projects. Critical position regarding the possibility of architecture to engage in the current socio political discourse. Analysis of the Kunsthal in Rotterdam and IJ Bank and Westerdok projects of the Dutch architect Rem Koolhaas. Description of the cities of Amsterdam, Rotterdam and Tokyo. Design proposal for architectural projects and urban research.
