1001 Facts Everyone Should Know about Israel Mitchell Geoffrey Bard, Moshe Schwartz, 2005 Hardly a day passes when Israel is not in the news. Virtually all the press coverage, however, is about the conflict between Israel and her neighbors. There is so much more to Israel that is positive and should be better known. This book provides essential facts about not only the political events in the news, but also the positive contributions Israel is making in the arts and sciences. It describes some of the remarkable sites and people that make the country unique. This is not a recitation of facts and figures, but a mosaic of the most important aspects of Israel's past and present. The book will entertain those interested in some of the fascinating trivia about Israel and inform those doing more serious research about the economy, government, and culture of the Jewish State.

Higher Education and Equality of Opportunity Fred A. Lazin, N. Jayaram, Matt Evans, 2012-07-10 The movement to broaden access to public universities, the dominant strategy during the 1970s and 1980s, has largely shifted to enable the marketplace, rather than the government, to shape the contours of higher education. Government funding is being reduced, affirmative action and other programs designed to insure broader access are in decline and personal fulfillment is replacing a public good designed to insure greater equality of opportunities. This book explores the impact of diminishing government resources and expanding market forces in developing and developed countries to either foster or lessen equality of opportunities in higher education for different racial, ethnic, religious and gender groupings. What are the consequences of a market-driven higher education for student access, teaching and scholarship? Through case studies, this book explores issues such as access of minority groups within the larger societies, the place of foreign students in a national system, and access for students with mental health difficulties, and evaluates the success of funding schemes designed to expand opportunities and access. The research provides an interesting contrast of the diversity and uniqueness of higher education in the United States, France, Australia, India, Israel, South Korea, The Netherlands, Ghana and several other countries, while at the same time revealing surprising commonalities. These studies reveal world-wide trends in higher education including a cutback in government financing, a decline in access, and a receding of affirmative action. This book is an important addition to the literature on higher education during the age of globalization and the decline of government funding of higher education. The

studies provide important data about the current situation in higher education in countries around the world.

Focal Controlled Drug Delivery Abraham J. Domb, Wahid Khan, 2014-02-17 The concept of focal controlled drug delivery has been applied for treating illnesses that are localized to a certain tissue or organ. These delivery systems are applied directly to the diseased site and deliver a desired dose for an extended time period while minimizing systemic distribution of toxic drug. Controlled drug delivery systems have been focused on oral extended release formulations and on systemic delivery of small drugs and peptides. Despite the upsurge of interest in focal targeted drug delivery, there is currently no single reference text on the subject. By comparison, there are numerous authored and edited books on oral, systemic and transdermal drug delivery or books on biodegradable polymers as drug carriers. Thus, the aim of Focal Drug Delivery is to bring together leading experts and researchers in the field to provide an authoritative account of the essential pharmaceutical, technological, physiological and biological sciences underpinning the topic. In addition, the book will review advances in treatment options for diseases localized at a certain tissue or organ.

Water Security in the Middle East Jean Axelrad Cahan, 2017-01-02 Water Security in the Middle East argues that, while conflicts over transboundary water systems in the Middle East do occur, they tend not to be violent nor are they the primary cause of a war in this region. The contributors in this collection of essays place water disputes in larger political, historical and scientific contexts and discuss how the humanities and social sciences contribute towards this understanding. The authors contend that international sharing of scientific and technological advances can significantly increase access to water and improve water quality. While scientific advances can and should increase adaptability to changing environmental conditions, especially climate change, national institutional reform and the strengthening of joint commissions are vital. The contributors indicate ways in which cooperation can move from simple coordination to sophisticated, adaptive and equitable modes of water management.

The User's Directory of Computer Networks Tracy Laquey, 2014-06-28 Your map through the network jungle. Here's how to track down virtually every network available to academics and researchers. This new book, with its detailed compilation of host-level information, provides everything you need to locate resources, send mail to colleagues and friends worldwide, and answer questions about how to access major national and international networks. Extensively cross-referenced information on ARPANET/MILNET, BITNET, CSNET, Esnet, NSFNET, SPAN, THEnet, USENET, and loads of others is all provided. Included are detailed lists of hosts, site contacts, administrative domains, and organizations. Plus, a tutorial chapter with handy reference tables reveals electronic mail 'secrets' that make it easier to take advantage of networking.

Indigenous Knowledge and Mental Health David Danto, Masood Zangeneh, 2022-01-04 This book brings together Indigenous and allied experts addressing mental health among Indigenous peoples across the traditional territories commonly known as the Americas (e.g. Canada, US, Caribbean Islands, Mexico, Bolivia, Venezuela, Ecuador and Brazil), Asia (e.g. China, Korea, Japan, Taiwan and Indonesia), Africa (e.g. South Africa, Central and West Africa) and Oceania (New Guinea and Australia) to exchange knowledge, perspectives and methods for mental health research and service delivery. Around the world, Indigenous peoples have experienced marginalization, rapid culture change and absorption into a global economy with little regard for their needs or autonomy. This cultural discontinuity has been linked to high rates of depression, substance abuse, suicide, and violence in many communities, with the most dramatic impact on youth. Nevertheless, Indigenous knowledge, tradition and practice have remained central to wellbeing, resilience and mental health in these populations. Such is the focus of this book.

The Evolution of the Israeli Third Sector Rachel Calipha, Benjamin Gidron, 2021-03-15 The Evolution of the Israeli Third Sector reviews the development of the nonprofit sector in Israel and analyzes it within existing nonprofit theories. It takes a historical perspective in looking at its evolution, in light of political, social, ideological, and economic changes in the

world and in the country. It discusses the development of policy and government involvement on the one hand and the unique features of Israeli philanthropy, both Jewish and Arab, on the other. It analyzes Israel's civil society and social movements as well as social entrepreneurship and their expression in the Third Sector. The book also covers the development of research and education on the Third Sector; it includes a review of research centers, databases, journals, and specific programs that were developed by Israeli universities.

The Naqab Bedouin and Colonialism Mansour Nasasra, Sophie Richter-Devroe, Sarab Abu-Rabia-Queder, Richard Ratcliffe, 2014-08-13 The Naqab Bedouin and Colonialism brings together new scholarship to challenge perceived paradigms, often dominated by orientalist, modernist or developmentalist assumptions on the Naqab Bedouin. The past decade has witnessed a change in both the wider knowledge production on, and political profile of, the Naqab Bedouin. This book addresses this change by firstly, endeavouring to overcome the historic isolation of Naqab Bedouin studies from the rest of Palestine studies by situating, studying and analyzing their predicaments firmly within the contemporary context of Israeli settler-colonial policies. Secondly, it strives to de-colonise research and advocacy on the Naqab Bedouin, by, for example, reclaiming 'indigenous' knowledge and terminology. Offering not only a nuanced description and analysis of Naqab Bedouin agency and activism, but also trying to draw broader conclusion as to the functioning of settler-colonial power structures as well as to the politics of research in such a context, this book is essential reading for students and researchers with an interest in Postcolonial Studies, Development Studies, Israel/Palestine Studies and the contemporary Middle East more broadly.

Tissue Engineering Clemens van Blitterswijk, Jan De Boer, 2022-11-11 Tissue Engineering, Third Edition provides a completely revised release with sections focusing on Fundamentals of Tissue Engineering and Tissue Engineering of Selected Organs and Tissues. Key chapters are updated with the latest discoveries, including coverage of new areas (skeletal TE, ophthalmology TE, immunomodulatory biomaterials and immune systems engineering). The book is written in a scientific language that is easily understood by undergraduate and graduate students in basic biological sciences, bioengineering and basic medical sciences, and researchers interested in learning about this fast-growing field. - Presents a clear structure of chapters that is aimed at those new to the field - Includes new chapters on immune systems engineering, skeletal tissue engineering (skeletal muscle, tendon, and ligament) eye, cornea and ophthalmology tissue engineering - Includes applied clinical cases studies that illustrate basic science applications

Lifestyle and Livelihood Changes Among Formerly Nomadic Peoples A. Allan Degen, Léo-Paul Dana, 2024-02-29

Contemporary policymakers, as their predecessors, continue to view nomadic people as a weak minority, and their way of life and raising livestock as a backward and inefficient paradigm. Wherever nomads are not the dominant group, the trend to settle them continues even today as in the past. This book describes the changes forced upon formerly nomadic groups and how they still attempt to maintain their traditional, social, and cultural practices in their new settings. The book deals with the several modes of livelihood of these communities, including entrepreneurship, and demonstrates the impact of investment-oriented urbanization policies leading to eviction from ancestral lands, and hurdles for nomadic mobility, ultimately threatening their survival. The book illustrates how some groups like the Borana and the Maasai practice livelihood diversity and raise productive livestock, and how other groups migrate to urban centers in search of employment and remit money to family members left in the rural areas. The book aims to raise awareness among the research community, especially those who work on regional and demographic labor policies. It helps in understanding why society needs to help build business and livelihood strategies without harming the values of nomadic groups.
