**Information Beyond Borders** Professor W Boyd Rayward,2014-03-28 The period in Europe known as the Belle Epoque was a time of vibrant and unsettling modernization in social and political organization, in artistic and literary life, and in the conduct and discoveries of the sciences. These trends, and the emphasis on internationalization that characterized them, necessitated the development of new structures and processes for discovering, disseminating, manipulating and managing access to information. This book analyses the dynamics of the emerging networks of individuals, organizations, technologies and publications by which means information was exchanged across and through all kinds of borders and boundaries in this period. It extends the frame within which historical discourse about information can take place by bringing together scholars not only from different disciplines but also from different national and linguistic backgrounds. As a result the volume offers new and surprising ways of looking at the historical period of the Belle Epoque. It will be of interest to scholars and students of information history and the emergence of the information society as well as to social and cultural historians concerned with the late 19th and early 20th century.

**Before the First Fleet to Australia** John Gardiner,2024-09-13 Most know the story of Australia's First Fleet. But who

were those convicts, sailors, marines and administrators who travelled to Botany Bay in 1787? And who orchestrated this ambitious expedition? In his meticulously researched new book, John Gardiner pulls back the curtain on the world from which the First Fleet emerged. Delving into English newspapers, official reports, and government documents from the era, Gardiner vividly captures the squalor of London's slums, the rotting hulks on the Thames where prisoners languished, and the hardscrabble lives of those who would people New South Wales. We meet real-life figures like Prime Minister William Pitt, Home Secretary Lord Sydney, and the Fleet's commander, Captain Arthur Phillip. And we discover a society rife with corruption, violence, and despair. Before the First Fleet to Australia paints an unflinching portrait of late 18th century England in all its vulgarity and cruelty. Gardiner's fearless account confronts historical truths often glossed over about the First Fleet's origins. Was this ragged band of convicts a collection of pathetic vagabonds or part of a strategically calculated colonial enterprise? Readers can decide for themselves in this absorbing and revelatory narrative history.

*How to Ruin Your Education and TV Viewing* Spencer D. Gear, 2022-03-31 What will you do as a parent if your fourteen-year-old comes home from school and says, "You and the teachers have been telling me Columbus discovered the Americas. You've lied to me because that isn't true. There are no such things as facts, and I decide the meaning of what is written in my textbooks. I'm the one who chooses the interpretation of any writing, including history and the stories of Columbus"? How are you going to answer, especially in light of what the Encyclopaedia Britannica states about Columbus? This book examines how historical Jesus scholar John Dominic Crossan has dismantled education, TV viewing (by application), and religious studies with his postmodern deconstruction of the text. His theme is "I formulate it here as I see it." Texts and interpretations are out of the mind of Crossan. Using a hypothesis testing technique, the author challenges Crossan's perspective that Jesus's resurrection was an apparition and not a bodily resurrection. Even though he calls on others to "First, read the text," that is not what he does. The philosophical crusher has found him out to be contradictory in his assessment of history in his autobiography and his own writings on the historical Jesus.

*Topsy-turvy World* Kirsty Murray,National Library of Australia,2012 To the first Europeans who came to Australia, everything seemed topsy turvy. Christmas was in the summer and trees shed their bark but not their leaves. And the animals were bizarre. There was a bird that laughed like a donkey and a type of greyhound that bound along on its hind legs like a hare. There was an animal in Tasmania whose nocturnal screeches sounded like the devil and a river creature that had a duck's bill at one end and a beaver's tail at the other. The Europeans had never seen anything like these animals before and gave them names similar to those of the European creatures they already knew. They drew and painted odd pictures of them, showing they did not understand the animals' habits. In one illustration, a wombat is standing on its back legs and in another a Tasmanian tiger is wrestling with a platypus of the same size.

**De-Commemoration** Sarah Gensburger,Jenny Wüstenberg,2023-10-13 In the wake of recent protests against police violence and racism, calls to dismantle problematic memorials have reverberated around the globe. This is not a new phenomenon, however, nor is it limited to the Western world. De-Commemoration focuses on the concept of de-commemoration as it relates to remembrance. Drawing on research from experts on memory dynamics across various disciplines, this extensive collection seeks to make sense of the current state of de-commemoration as it transforms contemporary societies around the world.

**A Brief History of the World in 47 Borders** Jonn Elledge,2024-10-08 #1 International Bestseller Every border tells a surprising story in this uncommonly enlightening history that will change the way you understand the world “A novel and fascinating perspective on world history.”—Bill Bryson “By turns surprising, funny, bleak, ridiculous, or all four of those at once.”—Gideon Defoe, *The Atlas of Extinct Countries* A single boundary might, upon closer inspection, reveal eons of history—from epic tales of conquest, treaties, and alliances to intimate, all-too-human stories of love, greed, and folly. None of the lines we know today were inevitable, and all might have looked quite different if not for the intricate interplay of chance and ambition. From the very first maps in Egypt to the Roman attempts to define the boundaries of civilization, from

the profound shift in meaning of the Mason-Dixon Line to the secret British-French agreement to carve up the Ottoman Empire during the First World War, and from the dark consequences of Detroit's city limits to the intriguing reason why landlocked Bolivia still maintains a navy, this is a singular look at all of human history—told through its most captivating border stories.
