*That Near Death Thing* Rick Broadbent, 2012-05-17 The Isle of Man TT - the world's most dangerous race - as seen through the eyes of Cummins, Martin, McGuinness and Dunlop. THAT NEAR DEATH THING is a life-affirming journey to the heart of the world's most dangerous race. The Isle of Man TT is a throwback to a maverick era that existed before PR platitudes and PC attitudes. WILLIAM HILL SPORTS BOOK OF THE YEAR-shortlisted author Rick Broadbent gets inside the helmets of four leading motorcycle racers as they battle fear, fire and family tragedy for a gritty sort of glory. Guy Martin is a tea-drinking truck mechanic and TV eccentric who 'sucks the rabbits out of hedges', but must now deal with the flipside of fame; Conor Cummins is the local hero facing a race against time as he battles depression and a broken body after falling down the mountain; John McGuinness is the living legend fending off the ravages of middle-age for one last hurrah; Michael Dunlop is the wild child living with one of the most remarkable legacies in sport. They tell their astonishing stories in a book that provides the most rounded, intimate, behind-the-scenes account yet of the last great race. Rick Broadbent has delivered the final word on the Isle of Man TT, one that really gets to grips with an event that continually pulls unsung riders and fans back year after year to witness That Near Death Thing.

*Sudden Deaths in Sports* Douglas Putnam, 2024-05-23 This work recounts the lives and deaths of athletes who departed the world suddenly and without warning during their playing careers. From slugger Ed Delahanty's fatal plunge into the Niagara River in 1903 to the demise of Dwayne Haskins on a dark Florida highway in 2022, their untimely ends shocked and saddened millions of fans. Many died from injuries sustained in the course of competition. Others met their fate in airplane and motor vehicle crashes, by freak accident and through disease, drug overdose, drowning and suicide. Several were victims of cold-blooded murder. Regardless of how or why they perished, Dale Earnhardt, Len Bias, Thurman Munson, Flo Hyman, the Marshall Thundering Herd and all the rest faced the same merciless truth--there would be no next year.

**Road Scars** Robert Matej Bednar, 2020-07-21 Despite the ubiquity of automobility, the reality of automotive death is hidden from everyday view. There are accident blackspots all over the roads that we use and go past every day but the people that have died there or been injured are not marked, unless by homemade shrines and personal memorialization. Nowhere on the planet is this practice as densely actioned as in the United States. Road Scars is a highly visual scholarly monograph about how roadside car crash shrines place the collective trauma of living in a car culture in the everyday

landscapes of automobility. Roadside shrines—or road trauma shrines—are vernacular memorial assemblages built by private individuals at sites where family and friends have died in automobile accidents, either while driving cars or motorcycles or being hit by cars as pedestrians, bicyclists, or motorcyclists. Prevalent for decades in Latin America and in the American Southwest, roadside car crash shrines are now present throughout the U.S. and around the world. Some are simply small white crosses, almost silent markers of places of traumatic death. Others are elaborate collections of objects, texts, and materials from all over the map culturally and physically, all significantly brought together not in the home or in a cemetery but on the roadside, in drivable public space—a space where private individuals perform private identities alongside each other in public, and where these private mobilities sometimes collide with one another in traumatic ways that are negotiated in roadside shrines. This book touches on something many of us have seen, but few have explored intellectually.

**Neo-Tribes** Anne Hardy, Andy Bennett, Brady Robards, 2018-03-28 This collection brings together perspectives drawn from a range of international scholars who have conducted research into the applications of neo-tribal theory. The concept of the neo-tribe was first introduced by the French sociologist Michel Maffessoli (1996) to describe new forms of social bonds in the context of late modernity. This book critically explores the concepts that underpin neo-tribal theory, using perspectives from different disciplines, through a series of theoretically informed and empirically rich chapters. This innovative approach draws together a recently emergent body of work in cultural consumption, tourism and recreation studies. In doing so, the book critically progresses the concept of neo-tribe and highlights the strengths, weaknesses and the opportunities for the application of neo-tribal theory in an interdisciplinary way.

**Sport Heritage** Gregory Ramshaw, 2017-10-02 Sport has become an important avenue in how we interpret, remember, and maintain our heritage. Whether it is being applied in tourism marketing and development, employed as a vehicle for social cohesion, or utilized as a way of articulating personal and collective identities, sport heritage is a vital topic in understanding what we value about the sporting past now what we wish to pass on to future generations. This edited collection brings together many new and exciting international approaches to sport heritage. Each of the chapters in this collection provides a thought-provoking sport heritage case study that would be of interest to students and researchers in history, geography, anthropology, and marketing, as well as industry practitioners working at sporting events, at sports-based heritage attractions such as museums and halls of fame, and at sports stadia and sports facilities. In addition, this collection would also be of interest to those readers with a more general interest in sport heritage and the sporting past. This book was published as a special issue of the Journal of Heritage Tourism.

**The Future of Motorsports** Hans Erik Næss, Simon Chadwick, 2023-06-12 This book takes stock of the position of motorsport in the 21st century and considers how it will continue to influence sport business, politics, and society in the future. Presenting a set of thematic essays and multi-disciplinary case studies, the book demonstrates that motorsport continues to play a significant role in relationships between the automotive industry, nationalism, industrialisation, and capitalism as well as motorsports' position as a feature of contemporary popular culture. Examining issues such as event management and legacy, environmental sustainability and 'greenwashing', diversity and inclusion, the rise of gaming and esports, and the use of sport as political soft power around the world across multiple motorsport disciplines, the book shines fascinating new light on this innovative but sometimes problematic industry. This is essential reading for all advanced students, researchers, managers, strategists, sponsors, and other stakeholders working at the nexus of motorsport, business, politics, and culture.

The Lines of Tamar Sheila Mughal, 2015-10-12 'Adopted twins Ruby and Eenayah have busy 21st century lifestyles on different continents, juggling successful careers with motherhood and marriage. Yet neither knows of their shared connection to a sacred lineage ? nor do they have any idea that an ancient, hidden prophecy from thousands of years ago is about to wreak havoc in both their lives, with terrible consequences. The twins' search for their birth mother uncovers a direct link to ancestors from biblical times, and leads to the discovery that they belong to an unbroken line of female twins. It seems one of them is now reliving a former life ? a life which is fated to end in tragedy. Meanwhile, unknown to either woman, the forces of good and evil are gathering for a terrible battle to control the outcome of the prophecy?

The Sacred Combe Simon Barnes, 2016-01-14 Reflections on the natural world and our place within it from one of our finest natural history writers – nature writing at its very best. We've all got one. A secret, special place. Hidden. Enclosed. A little greener and more fertile than the world outside. Here the birds are slightly more exotic, slightly more confiding, the grass greener and the fruit sweeter. To know such a place, to love such a place, is part of being human. Sometimes it's a place of myth, like the Garden of Eden. Sometimes it exists in fictional form, like Narnia or Shangri-La. Sometimes it comes in memories of a golden day in childhood, or in a glorious, doomed love affair. Sometimes it's a real place that we daren't go back to, for fear that it – or we – had changed. And just occasionally it's a real place. A place where you leave a small piece of your heart and return as often as you can so as not to lose it. It's a place of privilege. Simon Barnes found such a place when he woke in his first morning in the Luangwa Valley in Zambia to find elephants eating the roof of his hut. It was a homecoming, and he has been faithful to that passion ever since. Here he has known peace, danger, discomfort, fear and a profound sense of oneness with the Valley, with all nature and with the world. With the Valley he found completion. This book explores the special places of the mind and the world, with special reference to the Luangwa Valley and the glorious support of the Valley's great artist, Pam Carr. It's a book about the quest for paradise, and the eternal human search to find such a paradise everywhere.

**The Book of the Classic MV Agusta Fours** Ian Falloon, 2011 Always produced in small numbers, the MV Agusta Fours are now considered amongst the most classic of motorcycles from the 1960s and 1970s. These were the first motorcycles that made Grand Prix technology available to the public, albeit at an almost prohibitive cost.

**The Ambiguities of European Comic-book Bikers** David Walton, 2024-08-19 In this book, David Walton explores European comic-book biker publications as a subgenre of popular culture. Using a multidisciplinary approach, he reveals an intricate amalgam of ingenuity, irony, and highly ambiguous humor. The creative resourcefulness of the comic-book biker authors is seen to dramatize and celebrate the material existence of motorcycles and lifestyles while laughing at the foibles, inconsistencies, manias, fantasies, and practices of those characterised as motorized flâneurs. At the core of Walton's analysis is the exploration of identity formation, marked by tensions between individualism and collective affinities, undermined by egoism and competitiveness. At the same time, Walton argues that the storylines (despite much comic invention, caricature, and exaggeration) create resonances which hold up a distorted but highly revealing mirror to the multiple subgroups of people who ride motorcycles for pleasure. The author also demonstrates how the implied biker-readers of this subgenre confront comic representations of themselves which repeatedly undermine any positive self-image they may possess. Yet the comics are also seen to offer valuable insights into much broader cultural concerns ranging from subculture, consumption habits, (in)authenticity, taste, freedom, risk, and delinquency – without forgetting other key aspects of cultural studies like class, race and ethnicity, gender, sexuality, and ecocriticism.

*Infamous Cheshire* Bob Burrows,2006-09-21 *Infamous Cheshire* explores the darker side of this idyllic county, where murders in sleepy villages, royal scandals ancient and modern and the antics of showbiz personalities reveal that all is not as tranquil as it may seem. In his new book Bob Burrows digs deep into forgotten tales of villainy and crime, deceit and death, as well as throwing new light on more recent and well-remembered events - including the Great Train Robbery's connections with the county, Britain's biggest financial fraud, the IRA attack in Warrington, the plane that crashed in the centre of Stockport, and even the story behind one of Cheshire's roads - designated the most dangerous in Britain. *Infamous Cheshire* will enthral and fascinate anyone who would like to discover more about the unexpected history of Cheshire.

**MGA** David Knowles,2019-08-30 The MGA truly marked a revolution in MG sports car design, with its appearance quite unlike any previous production car from the celebrated British marque. Entering production in the summer of 1955, it broke with the time-honoured tradition of narrow-gutted, flat-sides, upright styling, with the distinctive large grille, exposed headlamps, separate wings and sharply cut-off tail that had serviced the majority of MG sports cars for well over thirty years. Many die-hard MG enthusiasts of the time were understandably outraged, but the decision to break with tradition proved to be a good one: over 100,000 cars were produced over the model's seven-year lifetime. This book, from celebrated author David Knowles covers: the circumstances that led to the momentous decision to make such a fundamental design change; the production, publicity and evolution of each and every MGA variant from launch in 1955 to the end of production in 1962, with specification tables for each model; profiles of the people who had crucial roles in the development of the MGA and finally, the largely untold story of overseas assembly in Australia, Ireland, Mexico and South Africa. It offers comprehensive coverage of racing and rallying in Europe, including the MGA entries at Sebring Twelve Hour race and where many of the cars ended up, and will be of great interest to all motoring enthusiasts and those particularly interested in MG. It is extensively illustrated with 200 colour and 300 black & white photographs, much of it drawn from archives and family collections, as well as photoshoots specially commissioned for this book. David Knowles has been researching and writing about British cars for over twenty-five years.

**Mike the Bike - Again** Ted Macauley, 2018 This book is an inside look behind the scenes at the top-secret planning, build-up, and spectacular success of Mike Hailwood's amazing comeback in 1978, 20 years after his debut at the age of 18. Written by his manager and friend, Ted Macauley, it is also a tribute to a remarkable man.

R.I.P. Off! Ken West, 2013-10-01 Can the British laugh in the face of death and funerals? Do they really want to know what happens when they hand their body over to the men in black? You are a short time alive and a long time dead! Go on, risk it; read this irreverent fictionalised tale of real and astonishing events beginning in 1993. At times, deadly serious; at times, deadly funny. It's the mysterious world of the funeral directors, as they try to kill off burial under trees and oppose DIY funerals. It's a world of embalming, pink glitzy shrouds, crappy coffins, brawling at funerals and girl power. Nobody's resting in peace. It spawns a revolution but twenty years later, who is really in control? Find out; if you dare! Having been involved with over 100,000 funerals, and keeping detailed diaries of incidents that truly happened to him, Ken West has become somewhat of an expert on the matter. R.I.P. Off! provides a unique insight into the world of death and funerals that readers cannot gain by any other means. R.I.P. Off! features the impact of divorce, religious dogma and belief, road and drug deaths, family disputes, poverty, obesity, health and longevity, commercialism and how death has a significant environmental impact. It shows how people deal with death in a myriad of ways, an approach that attempts to demystify death to some degree. Written as a counter view to Jessica Mitford's *The American Way of Death*, West's novel is an easy read that sets the scene for the UK's own industry, which is acknowledged as a world leader in green and alternative funerals. The book will appeal to those with a penchant for black humour, who enjoy television programmes such as *Six Feet Under* and who possess a (not always healthy) morbid interest in death and dying.

**The Diary of Abraham De la Pryme, the Yorkshire Antiquary** Abraham De la Pryme, 1870

**The Psychology of the Car** Stefan Gossling, 2017-06-16 The Psychology of the Car explores automotive cultures through the lens of psychology with the goal of achieving a low-carbon transport future. Worldwide there are now more than one billion cars, and their number grows continuously. Yet there is growing evidence that humanity needs to reach 'peak cars' as increased air pollution, noise, accidents, and climate change support a decline in car usage. While many governments agree, the car remains attractive, and endeavors to change transport systems have faced fierce resistance. Based on insights from a wide range of transport behaviors, The Psychology of the Car shows the why of automotive cultures, providing new perspectives essential for understanding its attractiveness and for defining a more desirable transport future. The Psychology of the Car illustrates the growth of global car use over time and its effect on urban transport systems and the global

environment. It looks at the adoption of the car into lifestyles, the mobilities turn, and how the car impacts collective and personal identities. The book examines car drivers themselves; their personalities, preferences, and personality disorders relevant to driving. The book looks at the role power, control, dominance, speed, and gender play, as well as the interrelationship between personal freedom and law enforcement. The book explores risk-taking behaviors as accidental death is a central element of car driving. The book addresses how interventions can be successful as well as which interventions are unlikely to work, and concludes with how a more sustainable transport future can be created based on emerging transport trends. - Features deep analyses of individual and collective psychologies of car affection, moving beyond sociology-based interpretations of automobile culture - Illustrates concepts using popular culture examples that expose ideas about automobility - Shows how fewer, smaller and more environmentally friendly cars, as well as low-carbon transport modes, are more socially attractive
