The 63 full papers presented were carefully reviewed and selected from a total of 287 submissions. The papers cover the following topics: data mining; data streams and time series; database storage and index; spatio-temporal data; modern computing platform; social networks; information integration and data quality; information retrieval and summarization; security and privacy; outlier and imbalanced data analysis; probabilistic and uncertain data; query processing.

Locality, Memory, Reconstruction Jopi Nyman,Risto Turunen,2011-11-15 This interdisciplinary volume explores the role of culture in single-industry communities facing the loss of their major industry. In a series of innovative case studies extending from New Zealand and Slovenia to the contemporary Nordic and Baltic States, the contributors address a wide range of topical issues. These include the role of the community's past as a marker of its newly reconstructed identity and the importance of local traditions, landscapes, and place-related memories in post-industrial communities formerly dependent on one single employer or industry. The empirical case studies emphasise the role of cultural memory and local identity as communal strategies of survival and perseverance in such places and provide fresh perspectives into this turn to culture. The four parts of the book address such topics as the symbolic governance of change, tradition as capital, narratives as collective memories, and post-Soviet transition in comparative perspective. The team of international contributors hails from Australia, Estonia, Finland, Germany, and Slovenia and represents the fields of sociology, cultural policy, cultural history, landscape studies, and geography.

Il Moro; Ellis Heywood's Dialogue in Memory of Thomas More Ellis Heywood,1972 In Il Moro Heywood constructs a presumably imaginary debate about the nature of true happiness between his great-uncle Sir Thomas More and six of More's friends. Heywood's principal intention in composing this dialogue about happiness seems to have been to provide posterity

with a loving memorial of one of England's greatest humanists.

Orality and Literacy in Modern Italian Culture Michael Caesar, 2017-12-02 In our highly literate culture, orality is all-pervasive. Different kinds of media and performance - theatre, film, television, story-telling, structured play - make us ask what is the relation between improvisation and premeditation, between transcription and textualization, between rehearsal, recollection and re-narration. The challenge of writing down what is spoken is partly technical, but also political and philosophical. How do young writers represent the spoken language of their contemporaries? What are the rules governing the transcription of oral evidence in fiction and non-fiction? Is the relationship between oral and written always a hierarchical one? Does the textualization of the oral destroy, more than it commemorates or preserves, the oral itself? Twelve wide-ranging essays, the majority on contemporary Italian theatre and literature, explore these questions in the most up-to-date account of orality and literacy in modern Italian culture yet produced. With the contributions: Michael Caesar, Marina Spunta- Introduction Michael Caesar- Voice, Vision and Orality: Notes on Reading Adriana Cavarero Arturo Tosi- Histrionic Transgressions: The Dario Fo-Commedia dell'Arte Relationship Revisited Gerardo Guccini- Le poetiche del 'teatro narrazione' fra 'scrittura oralizzante' e oralita-che-si-fa-testo Richard Andrews- Composing, Reciting, Inscribing and Transcribing Playtexts in the Community Theatre of Monticchiello David Forgacs- An Oral Renarration of a Photoromance, 1960 Alessandra Broccolini- Identita locali e giochi popolari in Italia tra oralita e scrittura Marina Spunta- The Facets of Italian Orality: An Overview of the Recent Debate Kate Litherland- Literature and Youth in the 1990s: Orality and the Written in Tiziano Scarpa's Cos'e questo fracasso? and Caliceti and Mozzi's Quello che ho da dirvi Elena Porciani- Note su oralita e narrazione inattendibile Marco Codebo- Voice and Events in Manlio Calegari's Comunisti e partigiani: Genova 1942-1945 Hanna Serkowska- Oralita o stile? Theorem Proving in Higher Order Logics Stefan Berghofer, Tobias Nipkow, Christian Urban, Makarius Wenzel, 2009-08-04 This volume constitutes the proceedings of the 22nd International Conference on Theorem Proving in Higher Order Logics (TPHOLs 2009), which was held during August 17-20, 2009 in Munich, Germany. TPHOLs covers all aspects of theorem proving in higher order logics as well as related topics in theorem proving and verification. There were 55 papers submitted to TPHOLs 2009 in the full research category, each of which was refereed by at least three reviewers selected by the Program Committee. Of these submissions, 26 research papers and 1 proof pearl were accepted for presentation at the conference and publication in this volume. In keeping with longstanding tradition, TPHOLs 2009 also offered a venue for the presentation of emerging trends, where researchers invited discussion by means of a brief introductory talk and then discussed their work at a poster session. A supplementary proceedings volume was published as a 2009 technical report of the Technische Universität München. The organizers are grateful to David Basin, John Harrison and Wolfram Schulte for agreeing to give invited talks. We also invited four tool developers to give tutorials about their systems. The following speakers kindly accepted our invitation and we are grateful to them: John Harrison (HOL Light), Adam Naumowicz (Mizar), Ulf Norell (Agda) and Carsten Schürmann (Twelf).

Basic and Applied Memory Research Douglas J. Herrmann, Cathy McEvoy, Chris Hertzog, Paula Hertel, Marcia K. Johnson, 2014-02-04 Basic researchers unlock the secrets of nature; applied researchers unlock the means by which those secrets of nature can change people's lives. Neither basic nor applied research has an independent impact. These volumes examine the convergence of basic and applied research in the field of memory. Volume 1: Theory and Context, focuses on the methods for understanding and applying basic memory theory, while Volume 2: Practical Applications, expands the understanding of practical memory research by providing in-depth research examples and findings. If the science of memory is to make a significant contribution to society, coordinating our basic and applied efforts and determining how they complement each other become of paramount importance. These volumes will help in this regard--both as textbooks demonstrating how to investigate memory and apply basic memory theory, and as reference sources leading to a better understanding of certain problems in basic and applied memory research. Readers of these volumes will gain a thorough grasp of the way major themes relate to basic and applied research collaboration, how programmatic basic and applied research can be conducted on particular memory problems, and the manner in which basic and applied work in major problem areas has been incorporated into the field of memory. Both volumes present important information that will be indispensable to researchers and students alike.

A Treatise on Acting, from Memory and by Improvisation (1699) Andrea Perrucci, 2008 This 1699 Italian acting treatise includes chapters on all kinds of staged productions, scripted or improvised, sacred or secular, tragic or comic. It also addresses enunciation, diction, memorization, gestures, and stage comportment, and it describes the details important

to a successful commedia dell'arte performance.

The Night Field Donna Glee Williams,2023-07-20 The incredible novel of one woman's quest to save her people - and her world. Now updated with all-new material and a reading-group discussion guide. It comes without warning, without explanation - the sudden deadly Stink that shreds the life of the People, poisoning the land, sickening the trees, killing babies in the womb. It comes from above, from the Plains of the Ancestors, but what has caused this murderous curse? It falls to Pyn-Poi to find out. The young tree-woman must climb the unclimbable cliff, to face the Ancestors on their own ground and demand an accounting for the Stink. But the end of the climb is just the beginning of Pyn-Poi's journey. What she finds in the world above is an abomination beyond the most fearsome fire-stories of the People - and she must defeat it, or face the extinction of everything she has ever loved. Praise for The Night Field 'Simple, beautiful prose' Scott T. Barnes, editor of NewMyths.com magazine 'Masterful storytelling' Karin Lacey, The Uncommon Octopus 'Beautifully written, poetic' Susan Sachs, climate education mentor

Clinical Interpretation of the WAIS-III and WMS-III David S. Tulsky,Donald H. Saklofske,Gordon J. Chelune,Robert K. Heaton,Robert J. Ivnik,Robert Bornstein,Aurelio Prifitera,Mark F. Ledbetter,2003-10-27 This guide to the WAIS-III and WMS-III tests is written to help clinical practitioners achieve efficient and accurate interpretations of test results. The only interpretive guide to be based on data obtained while standardizing the tests, this reference source provides new models for interpreting results, as well as practical information on the diagnostic validity, demographically corrected norms, and accuracy of the tests in measuring intelligence and memory. The focus of information is to allow clinicians to reduce variance in the interpretations of scores, indicating how best to factor in socio-economic status of respondents, interpreting meaningful change in serial assessments, and scoring with alternate or omitted sub-tests. Also included in the book are chapters on accommodating clients with disabilities. The final chapter discusses frequently asked questions (with answers) on the use and interpretation of the tests, as well as practical issues to help make scoring time-efficient and accurate. - Only guide to be based on data obtained in the standardization of the tests - Practical examples given to help guide interpretation of scores - Focuses on information to make faster, more accurate scoring interpretations

Assessing Adolescent and Adult Intelligence Alan S. Kaufman,Elizabeth O. Lichtenberger,2005-08-05 The classic text-- now updated with a new interpretive approach tothe WAIS?-III Assessing Adolescent and Adult Intelligence, the classic text fromAlan Kaufman and Elizabeth Lichtenberger, has consistently providedthe most comprehensive source of information on cognitiveassessment of adults and adolescents. The newly updated ThirdEdition provides important enhancements and additions thathighlight the latest research and interpretive methods for theWAIS?-III. Augmenting the traditional sequential

and simultaneous WAIS?-III interpretive methods, the authors present a new approach derived from Cattell-Horn-Carroll (CHC) theory. This approach combines normative assessment (performance relative to age peers) with ipsative assessment (performance relative to the person's own mean level). Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC?-IV, Kaufman and Lichtenberger have applied this system to the WAIS?-III profile of scores along with integrating recent WAIS?-III literature. Four appendices present the new method in depth. In addition to a detailed description, the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the new system, and norms tables for the new WAIS?-III subtest combinations added in this approach. *Assessing Adolescent and Adult Intelligence* remains the premier resource for the field, covering not only the WAIS?-III but also the WJ III?, the KAIT, and several brief measures of intelligence, as well as laying out a relevant, up-to-date discussion of the discipline. The new, theory-based interpretive approach for the WAIS?-III makes this a vital resource for practicing psychologists, as well as a comprehensive text for graduate students.
