Antonio Corso

Los Diez Libros de Arquitectura Vitruvius Pollio, 1960-01-01 The oldest and most influential book ever written on architecture, this volume describes the classic principles of symmetry, harmony, and proportion as well as the ancients' methods, materials, and aesthetics. Authoritative translation.

The Iliad: A Commentary Richard Janko, 1985 This is the first volume of a projected six-volume Commentary on Homer's Iliad, under the General Editorship of professor G.S. Kirk. Professor Kirk himself is the editor of the present volume, which covers the first four Books of Iliad. It consists of four introductory chapters, dealing in particular with rhythm and formular techniques, followed by the detailed commentary which aims at helping serious readers by attempting to identify and deal with most of the difficulties which might stand in the way of a sensitive and informed response to the poem. The Catalogues in Book 2 receive especially full treatment. The book does not include a Greek text - important matters pertaining to the text are discussed in the commentary. It is hoped that the volume as a whole will lead scholars to a better understanding of the epic style as well as of many well-known thematic problems on a larger scale. This Commentary will be an essential reference work for all students of Greek literature. Archaeologists and historians will also find that it contains matters of relevance to them.

Sebastiano Serlio on Architecture: Books VI-VII of 'Tutte l'opere d'architettura et prospetiva' with 'Castrametation of the Romans' and 'The Extraordinary book of doors' Sebastiano Serlio, 1996-01-01 Sebastiano Serlio was the most important architectural writer and theorist of the sixteenth century. The author of the first wide-ranging illustrated book on architecture, he produced a complete set of model designs as well as practical solutions for everyday design problems. This volume, the second in a two-volume series of Serlio's entire works, presents the previously unpublished sixth book, the seventh book, and, as well as The Extraordinary Book of Doors, his little-known Castrametation of the Romans, each of which demonstrates Serlio's sophisticated design theories. This is the first translation of Serlio's later works and the first time that the long lost sixth volume has been united with its companion works and restored to its intended position. The book also includes an introduction and notes by translators Vaughan Hart and Peter Hicks that demonstrate Serlio's significance within

the history of architecture and the importance of these neglected texts to our understanding of Serlio's work.

Drawings in Greek and Roman Architecture Antonio Corso,2016-06-30 This book is an essay on architectural drawings of the Greek and Roman world.

Arquitectura. Libros I-V Vitruvio,2016-08-05 El tratado del arquitecto, ingeniero y tratadista Marco Vitruvio Polión es el texto de referencia para conocer de primera mano la teoría y las obras arquitectónicas grecolatinas. Con el De Architectura, Vitruvio (siglo I a.C.) deseaba ofrecer un corpus que condensara todos los conocimientos alcanzados por la teoría arquitectónica griega, cosa que no se había hecho hasta entonces, a decir del propio autor. Además de cuestiones específicamente arquitectónicas (órdenes, materiales, técnicas de construcción, tipos de edificios...), el libro informa también sobre pintura y escultura griegas y romanas, como artes auxiliares. El abundante contenido, unido a las innegables cualidades formales, otorga a esta obra una gran trascendencia y la convierte en fuente inestimable para el conocimiento de esta materia. En el Renacimiento fue un texto de primer orden para el acceso a la teoría y a las obras arquitectónicas grecolatinas. El presente volumen presenta una actualizada versión castellana de los cinco primeros libros -de los diez del original-, a la que precede una completa y documentada introducción.

Morphological and Syntactical Irregularities in the Book of Revelation Laurențiu Mot,2015-03-31 Morphological and Syntactical Irregularities in the Book of Revelation by Laurențiu Florentin Mot is an approach to the solecisms of Johannine Apocalypse from a Greek perspective. The work aims at demonstrating that, in accord with Second Language Acquisition studies, Semitic transfer in Revelation is extremely rare. Most of its linguistic peculiarities can be explained within the context of the Greek language. Morphological and Syntactical Irregularities in the Book of Revelation is unique in several

ways. First, it deals with the most comprehensive list of solecisms. Second, it treats grammatical irregularities in their own right, looking at their cause, explanation, and contribution to the interpretation of the text. Third, it is interdisciplinary, bringing together textual criticism, Greek linguistics, and NT exegesis.
