

Relationship Between Individual And Society

Jeanette Edwards, Sarah Franklin, Eric Hirsch, Frances Price, Marilyn Strathern

The Individual and Society Rudolf Eucken, 1923

An Introduction to the Sociology of Religion Inger Furseth, Pål Repstad, 2006-01-01 An Introduction to the Sociology of Religion provides an overview of sociological theories of contemporary religious life. Some chapters are organized according to topic. Others offer brief presentations of classical and contemporary sociologists from Karl Marx to Zygmunt Bauman and their perspectives on social life, including religion. Throughout the book, illustrations and examples are taken from several religious traditions.

Essentials of Applied Sociology Mr. Rohit Manglik, 2024-07-24 This title explores key sociological theories and their application in solving real-world social issues such as poverty, inequality, and public policy. A practical resource for sociology students.

From Society to System Michel Freitag, 2022-10-27 From Society to System presents sociologist Michel Freitag's (1935-2009) distinctive, multifaceted and interdisciplinary work. Elaborated within the grand sociological tradition, his dialectical sociology redefines sociality as the realm of the symbolic to pinpoint its ontological frailty. Such a perspective expands the borders within sociology to rejoin classical philosophical preoccupations, revisiting social ontology as a radical critique of contemporary society where not only life and planet earth is at stake as a result of capitalism but reflexivity as well. This collection of essays touches on topics that have been of central concern for social theory since the end of the 20th century: the discussion about holism versus individualism and the dissolution of transcendental identity; the current state of the social sciences, both epistemologically and practically; the end-of-20th century debate over the nature of society along with its future in the context of globalisation. These essays show how Freitag's sociology is part of a larger unified framework that integrates ontology, epistemology, anthropology and philosophy into a coherent vision of the world - testifying to the distinctiveness of Freitag's social theory, standing next to other great social theorists such as Margaret Archer, Jürgen Habermas, Murray Bookchin and Ulrich Beck.

Historical Developments and Theoretical Approaches in Sociology - Volume I Charles Crothers , 2010-11-30 Historical Developments and Theoretical Approaches in Sociology in two volumes is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty

Encyclopedias. Sociology is one of several social science disciplines and smaller bodies of knowledge which seeks to understand the patterns in social life. There is a broad congruence between the objective configurations of social life and the components of the disciplines studying them, the body of sociological knowledge is socially constructed and the pathways to its gaining of knowledge influenced by a variety of factors. Moreover, since social life is ever-changing, sociology often has to scramble to catch-up with the changing social world. This work is built up around four broad topics, the first providing important shared contextual material and then followed by three broad levels of social analysis: with each of these four parts containing a number of chapters with more specific and in-depth information. The theme essay provides a general introduction and overview of the theme as a whole. In total, the work holds 40 contributions written by a selection of many international renowned specialists from 12 countries. It was important to obtain a wide range of viewpoints giving the ways in which social issues arise quite differently in a range of countries. These two volumes are aimed at the following five major target audiences: University and College Students Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers, NGOs and GOs.

Theorizing Classical Sociology Ray, Larry J, 1999-11-01 * How did classical sociology emerge and take shape? * What is the significance of classical sociology for current theoretical debates? * How can the classical tradition in social theory inform our understanding of the crisis of modernity? Social theory has been formed through elaboration and critique of the classical tradition, and this introductory volume illuminates current theoretical terrain by examining major classical theories - of Saint-Simon, Comte, Marx, Durkheim, Dilthey, Tonnies, Simmel and Weber - highlighting recurring themes and debates. It explains how classical sociology emerged through a debate with the Enlightenment, in which the concept of the 'social' took shape. This was constructed around various themes emphasizing contrasting components of social life - including material, cultural, rational and moral factors. These divergent theorizations set the scene for the play of theoretical oppositions that characterize much subsequent theoretical dispute. Along with these debates there were questions about the very identity of sociology, which in turn relate to a core issue in the discipline - grasping the crisis of modernity. This authoritative text introduces the key issues of classical sociology to undergraduates, making use of student-friendly features such as clear summaries, further reading and a glossary. It lays the foundations for an understanding of contemporary discussion, and will also be recognized at the postgraduate level as a key reference in the field.

Psychology, Society and Subjectivity Charles Tolman,2013-01-11 Increasingly there have been more and more challenges to received notions of psychological thought and practice. No longer satisfied with old-fashioned positivist approaches, psychologists are following other social sciences in their critiques and methods. Psychology, society and Subjectivity traces the history and development of German critical psychology. Its author, Charles Tolman, charts the initial dissent from mainstream psychology in the late 1960s, to the reconstruction of a psychology that is truly for people, not simply one about people. Drawing on the work of leading figures such as Klaus Holzkamp, Psychology, Society and Subjectivity will need to be read by anyone keen to make psychology relevant without sacrificing its rigour.

Human Ecology Markus Nauser,Dieter Steiner,2002-11 Arguing for environmentally sustainable lifestyles, this envisages a new kind of consciousness based on the notion of the individual as an agent mediating between society and the environment.

Development as a Social Process Serge Moscovici,Sandra Jovchelovitch,Brady Wagoner,2013 Gerard Duveen's original and comprehensive approach continues to offer fresh insight into core theoretical, methodological and empirical problems in contemporary psychology. In this collection the editors have carefully selected Duveen's most significant papers to demonstrate the innovative nature of his contribution to developmental, social and cultural psychology.

Social Constructionism Vivien Burr,2024-11-15 The fourth edition of this seminal work introduces students to social constructionism. Using a variety of examples from everyday experience and from existing research in areas such as personality, sexuality and health, it clearly explains the basic theoretical assumptions of social constructionism. Drawing on a range of empirical studies, the book clearly defines the various approaches to social constructionist theory and research and explores the theoretical and practical issues they raise. It presents and analyses key debates, such as the nature and status of knowledge, truth, reality, and the self, in an accessible style. The new edition has been updated with relevant and contemporary references to aid understanding of key theoretical and methodological issues. The author additionally utilises new illustrative examples from research and contemporary life, such as the #MeToo movement, BlackLivesMatter, and Post-Truth politics. The updated work has also been expanded to include an extended discussion of affect and embodiment and a number of exercises to help illustrate important concepts. Social Constructionism extends and updates the material covered in previous editions and will be an invaluable and informative resource for undergraduate and postgraduate students of Psychology, Sociology, Education, and other related disciplines.

From Crowd Psychology to the Dynamics of Large Groups Carla Penna, 2022-08-25 From Crowd Psychology to the Dynamics of Large Groups offers transdisciplinary research on the history of the study of social formations, ranging from nineteenth-century crowd psychology in France and twentieth-century Freudian mass psychology, including the developments in critical theory, to the study of the psychodynamics of contemporary large groups. Carla Penna presents a unique combination of sociology, psychoanalysis, and group analysis in the study of social formations. This book revisits the epistemological basis of group analysis by introducing and discussing its historical path, especially in connection with the study of large groups and investigations of the social unconscious in persons, groups, and societies. It also explores early work on group relations and contemporary research on the basic-assumption group in England, particularly Hopper's theory of Incohesion as a fourth basic assumption. From Crowd Psychology to the Dynamics of Large Groups enables the reader to map out the field of the unconscious life of crowds illuminating the darkness of twenty-first century collective movements. The reflections in this book present new perspectives for psychologists, psychoanalysts, group analysts, sociologists, and historians to investigate the psychodynamics of contemporary crowds, masses, and social systems.

Mind, Body and Culture Geoffrey Samuel, 1990-06-29 The author draws on his background in physics to suggest a scientific approach to aspects of human behaviour which have been traditionally described as cultural or social.

Critical theory and legal autopoiesis Gunther Teubner, 2019-05-10 This volume collects and revises the key essays of Gunther Teubner, one of the world's leading sociologists of law. Written over the past twenty years, these essays examine the 'dark side' of functional differentiation and the prospects of societal constitutionalism as a possible remedy. Teubner's claim

is that critical accounts of law and society require reformulation in the light of the sophisticated diagnoses of late modernity in the writings of Niklas Luhmann, Jacques Derrida and select examples of modernist literature. Autopoiesis, deconstruction and other post-foundational epistemological and political realities compel us to confront the fact that fundamental democratic concepts such as law and justice can no longer be based on theories of stringent argumentation or analytical philosophy. We must now approach law in terms of contingency and self-subversion rather than in terms of logical consistency and rational coherence.
