Rainforest Restoration Manual for South-Eastern Australia Bill Peel, 2010-06-15 Rainforest Restoration Manual for South-Eastern Australia is the definitive guide to the recovery and restoration of Subtropical, Warm Temperate, Cool Temperate, Gallery, Dry, Dry Gully and Littoral Rainforests from south-eastern Queensland to Tasmania. All of these rainforest types were inherently rare prior to settlement, and today with depletion, feral animals, weeds and climate change, all are threatened - with many listed under state and federal legislation. The manual presents detailed restoration methods in 10 easy-to-follow steps, documenting the research and trials undertaken during rainforest restoration over more than two decades. These experiments and their results will empower readers to uncover answers to many of the problems they could encounter. The manual is supported by a CD that provides important background information, with 32 appendices, a propagation manual for the region's 735 rainforest plants, an illustrated glossary and resources for teachers. Species lists and specific planting guides are provided for the 57 rainforest floristic communities that occur from the coast to the mountains between Durras Mountain in New South Wales and the Otways in Victoria. Extensively illustrated with colour photographs, this book will empower you or your group to be able to restore, manage, protect and conserve the magnificent rainforests that are in your care. The general principles and techniques described will meet the needs of students and teachers, novices, experienced practitioners, community groups and agencies alike.

Kindred Kate Legge, 2019-03-05 He was an Austrian immigrant; she came from Tasmania. He grew up beside the Carinthian Alps; she climbed mountains when few women dared. Their honeymoon glimpse of Cradle Mountain lit an urge that filled their waking hours. Others might have kept this splendour to themselves, but Gustav Weindorfer and Kate Cowle sensed the significance of a place they sought to share with the world. When they stood on the peak in the heat of January 1910, they imagined a national park for all. *Kindred: A Cradle Mountain Love Story* traces the achievements of these unconventional adventurers and their fight to preserve the wilderness where they pioneered eco-tourism. Neither lived to see

their vision fully realised: the World Heritage listed landscape is now visited by 250,000 people each year. Award-winning journalist Kate Legge tells the remarkable story behind the creation of the Cradle Mountain sanctuary through the characters at its heart.

Guide to the Vascular Plants of Tennessee Tennessee Flora Committee, 2015-03-20 The product of twenty-five years of planning, research, and writing, Guide to the Vascular Plants of Tennessee is the most comprehensive, detailed, and up-to-

date resource of its kind for the flora of the Volunteer State, home to nearly 2,900 documented taxa. Not since Augustin Gattinger's 1901 *Flora of Tennessee* and a *Philosophy of Botany* has a work of this scope been attempted. The team of editors, authors, and contributors not only provide keys for identifying the major groups, families, genera, species, and lesser taxa known to be native or naturalized within the state—with supporting information about distribution, frequency of occurrence, conservation status, and more—but they also offer a plethora of descriptive information about the state's physical environment and vegetation, along with a summary of its rich botanical history, dating back to the earliest Native American inhabitants. Other features of the book include a comprehensive glossary of botanical terms and an array of line drawings that illustrate the identifying characteristics of vascular plants, from leaf shape and surface features to floral morphology and fruit types. Finally, the book's extensive keys are indexed by families, scientific names, and common names. The result is a user-friendly work that researchers, students, environmentalists, foresters, conservationists, and indeed anyone interested in Tennessee and its botanical legacy and resources will value for years to come.

Culinary Herbs & Spices of the World Ben-Erik van Wyk, 2014-09-26 For centuries herbs and spices have been an integral part of many of the world's great cuisines. But spices have a history of doing much more than adding life to bland foods. They have been the inspiration for, among other things, trade, exploration, and poetry. Priests employed them in worship, incantations, and rituals, and shamans used them as charms to ward off evil spirits. Nations fought over access to and monopoly of certain spices, like cinnamon and nutmeg, when they were rare commodities. Not only were many men's fortunes made in the pursuit of spices, spices at many periods throughout history literally served as currency. In *Culinary Herbs and Spices of the World*, Ben-Erik van Wyk offers the first fully illustrated, scientific guide to nearly all commercial herbs and spices in existence. Van Wyk covers more than 150 species—from black pepper and blackcurrant to white mustard and white ginger—detailing the propagation, cultivation, and culinary uses of each. Introductory chapters capture the essence of culinary traditions, traditional herb and spice mixtures, preservation, presentation, and the chemistry of flavors, and individual entries include the chemical compounds and structures responsible for each spice or herb's characteristic flavor. Many of the herbs and spices van Wyk covers are familiar fixtures in our own spice racks, but a few—especially those from Africa and China—will be introduced for the first time to American audiences. Van Wyk also offers a global view of the most famous use or signature dish for each herb or spice, satisfying the gourmand's curiosity for more information about new dishes from little-known culinary traditions. People all over the world are becoming more sophisticated and demanding about what they eat and how it is prepared. *Culinary Herbs and Spices of the World* will appeal to those inquisitive foodies in addition to gardeners and botanists.

The A-Z directory showcases her top 100 herbs, with close-up photography and advice on growing and using each species, cross-referenced to the sections on using herbs in the kitchen and around the home, which follow. These cover herb marinades, sauces and hot dishes, as well as household uses such as surface cleaners, room fragrances and pet care. The Wind Queen Elizabeth Anne Thompson, 2022-07-13 This is a reflective story about a woman by the name of Elspeth Abney who lived in the Australian High Country located in the Snowy Mountains, New South Wales, and her life expressed in her very final moments of living. As the dying woman breaths in and out; transitioning through the sky gate to heaven, the story unfolds into a pictorial display of beautifying natural inferences. Elspeth's life memories are subtly sketched through memory nuances of the open plains and bushy scapes, a powerful bird of prey, and other natural influences like the bush fragrances, wildflowers, and the Swallowtail butterfly; but, more importantly, it is a poetic narrative about her fight against a jealous witch cognate woman.

World Spice Plants Johannes Seidemann, 2005-12-27 Despite their long tradition spices are subject to international modern scientific research. This has made it necessary to disseminate knowledge to a large audience of interest. The book addresses this need by informing the reader about the complex worldwide use of spice plants. The many spice and aromatic plants are arranged in alphabetical order of their botanical relevance. It includes all species which have been cultivated for the above purposes. It also covers species whose usage has long ceased or which are used only rarely or have become wild. In this respect the author has aimed at comprehensiveness. In total over 1400 plants have been collated. The very extensive register of literature has been designed to facilitate intensive study of a specific plant or spice. Works both on botany and agriculture, and on chemistry, pharmacodynamics and usage have been considered. The book is aimed principally at spice and aroma experts, pharmacists, botanists and interested lay persons. But the author also had in mind food chemists, dieticians and agricultural scientists, for whom botany, chemistry and pharmacological aspects may be of interest. It is hoped that those occupied in the spice and aroma industry involved in creating spice blends and the like will also take inspiration from the book.
