The Canadian Short Story Reingard M. Nischik,2007 Beginning in the 1890s, reaching its first full realization by modernist writers in the 1920s, and brought to its heyday during the Canadian Renaissance starting in the 1960s, the short story has become Canada's flagship genre. It continues to attract the country's most accomplished and innovative writers today, among them Margaret Atwood, Mavis Gallant, Alice Munro, Carol Shields, and many others. Yet in contrast to the stature and popularity of the genre and the writers who partake in it, surprisingly little literary criticism and theory has been devoted to the Canadian short story. This collection redresses that imbalance by providing the first collection of critical interpretations of a range of thirty well-known and often-anthologized Canadian short stories from the genre's beginnings through the twentieth century. A historical survey of the genre introduces the volume and a timeline comparing the genre's development in Canada, the US, and Great Britain via representative examples completes it. The collection is geared both to specialists in and to students of Canadian literature. For the latter it is of particular benefit that the volume provides not only a collection of interpretations, but a comprehensive introduction to the history of the Canadian short story. Reingard M. Nischik is professor and chair of American Literature at the University of Constance, Germany.

Post-Jungian Psychology and the Short Stories of Ray Bradbury and Kurt Vonnegut Steve Gronert Ellerhoff, 2016-02-22 In this book, Steve Gronert Ellerhoff explores short stories by Ray Bradbury and Kurt Vonnegut, written between 1943 and 1968, with a post-Jungian approach. Drawing upon archetypal theories of myth from Joseph Campbell, James Hillman and their forbearer C. G. Jung, Ellerhoff demonstrates how short fiction follows archetypal patterns that can illuminate our understanding of the authors, their times, and their culture. In practice, a post-Jungian 'mythodology' is shown to yield great insights for the literary criticism of short fiction. Chapters in this volume carefully contextualise and historicize each story, including Bradbury and Vonnegut's earliest and most imaginatively fantastic works. The archetypal constellations shaping Vonnegut's early works are shown to be war and fragmentation, while those in Bradbury's are family and the wholeness of the sun. Analysis is complemented by the explored significance of illustrations that featured alongside the stories in their first publications. By uncovering the ways these popular writers redressed old myths in new tropes—and coined new narrative elements for hopes and fears born of their era—the book reveals a fresh method which can be applied to all imaginative short stories, increasing understanding and critical engagement. Post-Jungian Psychology and the Short Stories of Ray Bradbury and Kurt Vonnegut is an important text for a number of fields, from Jungian and Post-Jungian studies to short story theories and American studies to Bradbury and Vonnegut studies. Scholars and students of literature will come away with a renewed appreciation for an archetypal approach to criticism, while the book will also be of great interest to practising depth psychologists seeking to incorporate short stories into therapy.
