At the harbor of Alexandria stands the tower called Pharos, the first wonder. It is held together by glass and lead and is 600 yards high - Epiphanius the Monk The Pharos today is composed of four stages. The first, of a rectangular design, is remarkably built in rectangular cut stones, of which the joints are so well concealed that the whole seems to be formed of a single block of stone, remaining insensible to the ravages of time. - Al Bakri, a medieval traveler and writer. Over 2,000 years ago, two ancient writers named Antipater of Sidon and Philo of Byzantium authored antiquity's most well known tour guides. After the two Greeks had traveled around the Mediterranean, they wrote of what they considered to be the classical world's greatest construction projects. While there is still some question as to who actually authored the text attributed to Philo and when it was authored, their lists ended up comprising the Seven Wonders of the Ancient World, igniting interest in the ones they chose and inspiring subsequent generations to identify their own era's Seven Wonders. The youngest of the Wonders also turned out to be the most practical and one of the longest-lived, surviving into the late Middle Ages. It was a lighthouse built on the northern coast of Egypt in Africa, at the Greek city founded in Alexander's name. It was the Pharos, the Great Lighthouse of Alexandria. Among antiquity's wonders, the Lighthouse of Alexandria was fairly unique both in terms of its purpose and its secular nature. While pyramids and statues served religious purposes in Egypt and Greece, and others were impressive works of art, the origins of the Lighthouse were not even as a lighthouse at all. Instead, the large formation on the island of Pharos in the harbor of Alexandria was originally meant to help sailors identify the location of the city during the day, and some speculate it was not until later that Alexandrians decided to make it a true lighthouse that would serve sailors at night. Julius Caesar himself noted the Lighthouse's other practical use in his commentaries about Rome's civil wars: Now because of the narrowness of

the strait there can be no access by ship to the harbour without the consent of those who hold the Pharos. In view of this, Caesar took the precaution of landing his troops while the enemy was preoccupied with fighting, seized the Pharos and posted a garrison there. The result was that safe access was secured for his...supplies and reinforcements. It's easy to understand Caesar's point, because while there is still debate over its height, the Lighthouse of Alexandria was unquestionably one of the tallest man-made structures in the world at the time, if not the tallest. While ancient accounts often exaggerated its height, medieval Arab sources often claimed it was somewhere around 300-350 feet tall, with an incredibly wide base, and those sources wrote at a time where it had already required repairs due to earthquake damage. Efforts to repair it kept going until the 14th century, when the damage was so extensive that it was mostly left in ruins, the last of which were taken for other building projects and/or slipped underneath the Mediterranean. Fortunately, due to descriptions of the lighthouse and archaeological remains, modern scholars are able to understand this wonder better than most, and there may even be future attempts to build a replica and bring it back to life. The Lighthouse of Alexandria covers the ancient wonder's history and the mysteries surrounding it, including the debate over how it was built, operated, and destroyed. Along with pictures and a bibliography, you will learn about the Lighthouse of Alexandria like never before.

In the modern world, libraries are taken for granted by most people, perhaps because their presence is ubiquitous. Every school has a library, large libraries can be found in every major city, and even most small towns have public libraries. However, the omnipresent nature of libraries is a fairly recent historical phenomenon, because libraries were still few and far between before the 19th century. For centuries in the Western world, during what is known as the Middle Ages, written knowledge was guarded closely and hidden away in private repositories, usually by the religious classes, and hidden away in private repositories. The lack of libraries in the West helped contribute to the popular imagination of the ancient Library at Alexandria, and all the myths and legends that have come to be associated with it, but the Library of Alexandria deserves its reputation. While the exact nature of the Library remains murky, it functioned for at least several centuries and is believed to have housed hundreds of thousands of books, most written as scrolls on papyrus, and it essentially became the culmination of two ancient literary and cultural traditions converging: the Greek and Egyptian. Of course, the most controversial aspect of the Library of Alexandria is its destruction, which is still a topic of debate today. Over 2,000 years ago, two ancient writers named Antipater of Sidon and Philo of

Byzantium authored antiquity's most well known tour guides. After the two Greeks had traveled around the Mediterranean, they wrote of what they considered to be the classical world's greatest construction projects. While there is still some question as to who actually authored the text attributed to Philo and when it was authored, their lists ended up comprising the Seven Wonders of the Ancient World, igniting interest in the ones they chose and inspiring subsequent generations to identify their own era's Seven Wonders. The Pharos Lighthouse In Alexandria Andrew Michael Chugg, 2024-03-07 This comprehensive and insightful book brings scientific rigor to the problems of reconstructing the Pharos Lighthouse, one of the Seven Wonders of the Ancient World, and understanding how it functioned as the archetypal lighthouse in antiquity, when it was described as a “second Sun”. Conceived by Alexander the Great and designed by Sostratus, the Pharos lighthouse stood as an iconic landmark of

Alexandria for sixteen centuries until felled by a calamitous earthquake in the fourteenth century. The study of this great lighthouse has been neglected relative to other ancient Wonders such as the Great Pyramid of Giza. This book reconstructs the tower, its lustrous light, stunning statues and astounding story in diligent detail through archaeological evidence and surviving antique texts and images, providing a fresh evaluation of the Pharos, its history, and its legacy. The Roman writer Achilles Tatius termed the Pharos a “second Sun”; this expression is explained and explored here for the first time, and has dramatic implications for the nature of the Pharos’ light. The volume also explores how the creation of the Pharos was a key stimulus for Alexandrian science and astronomy in antiquity. The Pharos Lighthouse in Alexandria provides a fascinating new study of this monument of interest to students and scholars of Hellenistic art, architecture, and science, and readers seeking to learn more about one of the Seven Wonders of the Ancient World.

Egyptology: The Missing Millennium Okasha El Daly, 2016-07-01 *Egyptology: The Missing Millennium* brings together for the first time the disciplines of Egyptology and Islamic Studies, seeking to overturn the conventional opinion of Western scholars that Moslems/Arabs had no interest in pre-Islamic cultures. This book examines a neglected period of a thousand years in the history of Egyptology, from the Moslem annexation of Egypt in the seventh century CE until the Ottoman

conquest in the 16th century. Concentrating on Moslem writers, as it is usually Islam which incurs blame for cutting Egyptians off from their ancient heritage, the author shows not only the existence of a large body of Arabic sources on Ancient Egypt, but also their usefulness to Egyptology today. Using sources as diverse as the accounts of travelers and treasure hunters to books on alchemy, the author shows that the interest in ancient Egyptian scripts continued beyond classical writers, and describes attempts by medieval Arab scholars, mainly alchemists, to decipher the hieroglyph script. He further explores medieval Arab interest in Ancient Egypt, discussing the interpretations of the intact temples, as well as the Arab concept of Egyptian kingship and state administration—including a case study of Queen Cleopatra that shows how the Arabic romance of this queen differs significantly from Western views. This book will be of great interest to academics and students of archaeology, Islamic studies and Egyptology, as well as anyone with a general interest in Egyptian history.
