Replacement of Renal Function by Dialysis C. Jacobs, C. M. Kjellstrand, Karl-Martin Koch, 2008-01-22 Completely revised edition of a global resource first published in 1978 and previously revised in 1989. Sixty-three contributions are arranged in sections on the pathophysiology of the uremic syndrome--principles and biophysics of dialysis; technology of dialysis and associated methods; quantification and prescription; complications; pharmacological considerations; special clinical situations; organ system and metabolic complications; and organization and results of chronic dialysis. The aim is to give understanding of the complexities of modern dialysis apparatus so that practitioners can make the best use of the technology--and so that fledgling nephrologists can avoid the temptation to by-pass the theory and the nuances. Textbook of Peritoneal Dialysis R. Gokal, Ramesh Khanna, Raymond T. Krediet, K.D. Nolph, 2013-11-27 In 1994, the expert knowledge of Ram Gokal and Karl D. Nolph, the two foremost figures in the field of peritoneal dialysis, was combined to produce the first edition of the Textbook of Peritoneal Dialysis. The work quickly became recognised as the 'gold standard' for those working in the field. Since its conception, however, our understanding of peritoneal dialysis related physiology, kinetics and clinical outcomes, as well as the concepts of intraperitoneal chemotherapy, has increased sufficiently to make an

updated and completely revised edition of the work necessary. An expansion of the editorial team by fellow-experts Ramesh Khanna and Raymond Krediet enabled an even more comprehensive approach to be taken. This second edition reasserts the book's uniqueness in its detailed discussion of the topic, making it required reading for all those working within the field of peritoneal dialysis.
