Then, in 2048, the prophecy comes to fruition. US president Matthew Serafino is sworn into office, and University of Virginia historian Paul Binder receives a cryptic but summoning message. Strange circumstances and bizarre discoveries lead Paul to London, where he meets a brilliant and beautiful manuscript specialist, Angela Matthews Krall, in order to decipher an unknown Syrian manuscript with special powers. Together, they uncover clues that lead them both down a mysterious, life-or-death path. Global intrigue, cascading natural catastrophes, and a complexity of characters, motives, and symbolic traditions intersect as Paul and Angela delve into forgotten traditions and lost meanings. Life-changing discoveries force them to struggle with questions about their own faith and the nature of truth and hope. Suddenly they find themselves positioned either to lead humanity into a new future or to watch as the earth dissolves into total destruction. The Seraph Seal combines apocalyptic intrigue with a journey of love and discovery that blurs the lines between fact and fiction. It will lead you into a world where only you can determine the future of the earth as we know it.

Design and Order Nigel C. Lewis, 2020-07-06 Teaches the principles behind the successful planning and creation of inspired built forms and urban places This book offers an integrated understanding of both the principles and the perception of the design of built environments and public spaces. It outlines the fundamental characteristics that are evident in the creation of built form and illustrates how they determine the experience of resultant places. It also consolidates the key criteria that need to be taken into consideration in the development of these areas. All of the above-mentioned aims to provide designers with a solid understanding of the implications of their decisions on perception and behavior during the creation of new spaces. *Design and Order: Perceptual experience of built form - Principles in the Planning and Making of Place* starts by examining the designing of natural environments and the affect that they have on humans. It teaches readers how people experience and are shaped by a space—via their eyes, brain, and overall perception. It then instructs on proper grammar of form and syntax so that designers can understand how to pursue design processes systematically. The book then takes readers through this process of designing, informing them on the principles of form, function, configuration, communication, organization, color and contrasts, building structures, good practice and more. Seeks to improve the methodological approach to the planning and design of buildings Broadly address all of the functions that impact the realization of new built and urban form Outlines the fundamental characteristics that are evident in the design of built forms and illustrates how these characteristics determine the experience of the resultant places Comprehensively covers the ideas, principles, and the perception of design Teaches designers to make informed decisions about applying or discarding principles when creating spaces. *Design and Order* is a unique book that will appeal to students and professionals in architecture, urban design and planning, as well as designers and developers.

1000 Monuments of Genius Christopher E.M. Pearson, 2014-11-24 Since the mythical Tower of Babel, humans have continuously tried to erect monuments to match their oversized egos. With ancient ziggurats, the Taj Mahal or the Empire State Building, man has for centuries demonstrated his force by raising structures for purposes both religious and profane. As international cultural statements without words, symbols of a peoples values devotion, patriotism, power symbols of a civilisation's grandeur, these monuments still fascinate and attract an ever-growing public who is captivated by the creativity and ingenuity of these architects and stonemasons. Their historical message goes far beyond mere art history, for they tell us of the lives and evolution of the peoples of the past, as does the Parthenon in Athens, many times destroyed, rebuilt, reused, attacked, pillaged, and restored once again today. This work, featuring 1000 monuments chosen from around the globe, retraces human history, the techniques, styles, and philosophies necessary for the construction of so many splendours over the centuries, providing a panorama of the most celebrated monuments while evoking the passion of their makers. The reader can explore the changing values of humanity through the edifices it has built and understand these

structures as triumphs of humankind

Tourism, Performance, and Place Dr Michelle M Metro-Roland, Ms Lisa C Braverman, Professor Daniel C Knudsen, 2014-10-28 Drawing upon theories of landscape and performance, this work weaves together existing tourism literature with new scholarship to forge a geographically informed theory of tourism. Such a theory integrates the ways in which places are co-produced, circulated, interpreted, experienced, and performed for and by tourists, tourism boards, and even as everyday spaces. Bringing together theories of ritual, Peircean semiotics, ideology, and performance, the authors blend the often separate literatures of tourism sites and touristic practices. Whereas most tourism texts focus on a part of the 'tourism equation'-the tourism site, or the tourist experience-a geographic theory of tourism brings these constituent parts together in thinking about notions of place. Place processes are central to geography as well as tourism studies because tourism facilitates encounters with distinct locations. As this book argues, considering tourism as performative draws disparate areas of tourism theory together to better understand the ways tourism happens in and across places.

The Fruit of Liberty Nicholas Scott Baker, 2013-11-04 In the sixteenth century, the city-state of Florence failed. In its place the Medicis created a principality, becoming first dukes of Florence and then grand dukes of Tuscany. The Fruit of Liberty analyzes the slow transformations that predated and facilitated the institutional shift from republic to principality, from citizen to subject.

The Armageddon of Architecture and Design Anthony Sully, 2022-10-21 This book examines why there is a lack of humanity in current architecture that produces such ghastly environmental errors. It brings together a selective study of past historical styles and works of art since primitive times in order to understand how the evolution of design was broken in the 20th century. Current ideologies and philosophies of the day are examined to ascertain those elements which fuelled a modern architecture that is lacking in humanity and agreeable contextual co-existence with our inherited communities. It shows that the complex effervescence of evolutionary life with its joy, communal celebratory nature, and constructive creative urges, is vulnerable from attack by these stronger alien forces of elimination and reductionism because their actions are by nature aggressive and dictatorially dominant. This book will appeal to all those academics and professional stakeholders who care for the environment and wish to see more positive changes.
