Born in Blood Scott Gac,2024-01-18 Born in Blood investigates one of history's most violent undertakings: The United States of America. People the world over consider violence in the United States as measurably different than that which troubles the rest of the globe, citing reasons including gun culture, the American West, Hollywood, the death penalty, economic inequality, rampant individualism, and more. This compelling examination of American violence explains a political culture of violence from the American Revolution to the Gilded Age, illustrating how physical force, often centered on racial hierarchy, sustained the central tenets of American liberal government. It offers an important story of nationhood, told through the experiences and choices of civilians, Indians, politicians, soldiers, and the enslaved, providing historical context for understanding how violence has shaped the United States from its inception.

International Studies Stanley Toops,Mark Allen Peterson,Walt Vanderbush,Naaborle Sackeyfio,Sheldon Anderson,2021-09-28 This book provides a much-needed classroom text in international studies that is genuinely interdisciplinary in its approach. International Studies focuses specifically on five core disciplines; history, geography, anthropology, political science and economics, and describes them in relation to one another, as well as their individual and

collective contributions to the study of global issues. The expert authors also emphasize the continuing importance of area studies within an interdisciplinary and global framework, applying its interdisciplinary framework to substantive issues in seven regions: Europe, East Asia and the Pacific, South and Central Asia, sub-Saharan Africa, the Middle East and North Africa, Latin America and North America. This new edition has been completely updated and substantially revised with two new chapters on Media, Sovereignty and Cybersecurity and Sustainable Development. This disciplinary and regional combination offers a useful and cohesive framework for teaching students a substantive and comprehensive approach to understanding global issues.

The Cold War Spencer C. Tucker, 2020-10-27 This sweeping reference work covers every aspect of the Cold War, from its ignition in the ashes of World War II, through the Berlin Wall and the Cuban Missile Crisis, to the collapse of the Soviet Union in 1991. The Cold War superpower face-off between the Soviet Union and the United States dominated international affairs in the second half of the 20th century and still reverberates around the world today. This comprehensive and insightful multivolume set provides authoritative entries on all aspects of this world-changing event, including wars, new military technologies, diplomatic initiatives, espionage activities, important individuals and organizations, economic developments, societal and cultural events, and more. This expansive coverage provides readers with the necessary context to understand the many facets of this complex conflict. The work begins with a preface and introduction and then offers illuminating introductory essays on the origins and course of the Cold War, which are followed by some 1,500 entries on key individuals, wars, battles, weapons systems, diplomacy, politics, economics, and art and culture. Each entry has cross-references and a list of books for further reading. The text includes more than 100 key primary source documents, a detailed chronology, a glossary, and a selective bibliography. Numerous illustrations and maps are inset throughout to provide additional context to the material.

The Origins of the Modern World Robert B. Marks, 2024-01-02 This clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present. Unlike most studies, which assume that the “rise of the West” is the story of the coming of the modern world, this history, drawing upon new scholarship on Asia, Africa, and the New World and upon the maturing field of environmental history, constructs a story in which those parts of the world play major roles, including their impacts on the environment. Robert B. Marks defines the modern world as one marked by industry, the nation state, interstate warfare, a large and growing gap between the wealthiest and poorest parts of the world, increasing inequality within the wealthiest industrialized countries, and an escape from the environmental constraints of the “biological old regime.” He explains its origins by emphasizing contingencies (such as the conquest of the New World); the broad comparability of the most advanced regions in China, India, and Europe; the reasons why England was able to escape from common ecological constraints facing all of those regions by the end of the eighteenth century; a conjuncture of human

and natural forces that solidified a gap between the industrialized and non-industrialized parts of the world; the mounting environmental crisis that defines the modern world; and the ways in which the forces of globalization stress the economic and political underpinnings of the modern world. Now in a new edition that brings the saga of the modern world to the present in an environmental context, the book considers how and why the United States emerged as a world power in the twentieth century and became the sole superpower by the twenty-first century, and why the changed relationship of humans to the environment likely will be the hallmark of the modern era—the Anthropocene. Once again arguing that the US rise to global hegemon was contingent, not inevitable, Marks also points to the resurgence of Asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years.

Hollywood or History? Tim Monreal, Jesús A. Tirado, 2025-06-20 *Hollywood or History?* helps classroom teachers include more (accurate) Latinx stories in their classroom. We believe that when used intentionally, and critically, media representations of Latinx communities and histories are powerful tools for high-quality curriculum and instruction.

Histories of Solitude A. Ricardo López-Pedrerros, Lina Britto, 2024-03-19 By combining chronological coverage, analytical breadth, and interdisciplinary approaches, these two volumes—*Histories of Solitude* and *Histories of Perplexity*—study the histories of Colombia over the last two centuries as illustrations of the histories of democracy across the Americas. The volumes bring together over 40 scholars based in Colombia, the United States, England, and Canada working in various disciplines to discuss how a country that has been consistently presented as a rarity in Latin America provides critical examples to re-examine major historical problems: republicanism and liberalism; export economies and agrarian modernization; populism and cultural politics of state formation; revolutionary and counterinsurgent Cold War violence; neoliberal reforms and urban development; popular mobilization and counterhegemonic public spheres; political ecologies and environmental struggles; and labors of memory and the challenge of reconciliation. Contributors are sensitive to questions of subjectivity and discourse, observant of ethnographic details and micro-politics, and attuned to macro-perspectives such as transnational and global histories. These volumes offer fresh perspectives on Colombia and will be of great value to those interested in Latin American and Caribbean history.

Native Nations Kathleen DuVal, 2025-05-27 PULITZER PRIZE WINNER • “A magisterial overview of a thousand years of Native American history” (The New York Review of Books), from the rise of ancient cities more than a thousand years ago to fights for sovereignty that continue today WINNER OF THE BANCROFT PRIZE, THE CUNDILL HISTORY PRIZE, AND THE MARK LYNTON HISTORY PRIZE Long before the colonization of North America, Indigenous Americans built diverse civilizations and adapted to a changing world in ways that reverberated globally. And, as award-winning historian Kathleen DuVal vividly recounts, when Europeans did arrive, no civilization came to a halt because of a few wandering explorers, even

when the strangers came well armed. A millennium ago, North American cities rivaled urban centers around the world in size. Then, following a period of climate change and instability, numerous smaller nations emerged, moving away from rather than toward urbanization. From this urban past, egalitarian government structures, diplomacy, and complex economies spread across North America. So, when Europeans showed up in the sixteenth century, they encountered societies they did not understand—those having developed differently from their own—and whose power they often underestimated. For centuries afterward, Indigenous people maintained an upper hand and used Europeans in pursuit of their own interests. In *Native Nations*, we see how Mohawks closely controlled trade with the Dutch—and influenced global markets—and how Quapaws manipulated French colonists. Power dynamics shifted after the American Revolution, but Indigenous people continued to command much of the continent's land and resources. Shawnee brothers Tecumseh and Tenskwatawa forged new alliances and encouraged a controversial new definition of Native identity to attempt to wall off U.S. ambitions. The Cherokees created institutions to assert their sovereignty on the global stage, and the Kiowas used their power in the west to regulate the passage of white settlers across their territory. In this important addition to the growing tradition of North American history centered on Indigenous nations, Kathleen DuVal shows how the definitions of power and means of exerting it shifted over time, but the sovereignty and influence of Native peoples remained a constant—and will continue far into the future. “An essential American history”—*The Wall Street Journal*

Women Who Changed the World Candice Goucher, 2022-01-24 This indispensable reference work provides readers with the tools to reimagine world history through the lens of women's lived experiences. Learning how women changed the world will change the ways the world looks at the past. *Women Who Changed the World: Their Lives, Challenges, and Accomplishments through History* features 200 biographies of notable women and offers readers an opportunity to explore the global past from a gendered perspective. The women featured in this four-volume set cover the full sweep of history, from our ancestral forbearer Lucy to today's tennis phenoms Venus and Serena Williams. Every walk of life is represented in these pages, from powerful monarchs and politicians to talented artists and writers, from inquisitive scientists to outspoken activists. Each biography follows a standardized format, recounting the woman's life and accomplishments, discussing the challenges she faced within her particular time and place in history, and exploring the lasting legacy she left. A chronological listing of biographies makes it easy for readers to zero in on particular time periods, while a further reading list at the end of each essay serves as a gateway to further exploration and study. High-interest sidebars accompany many of the biographies, offering more nuanced glimpses into the lives of these fascinating women.

World History Caitlin Corning, 2015-11-01 *World History: A Short, Visual Introduction* is the ideal path to understanding the historical events that influence Christian history. Caitlin Corning's introduction covers the most important people, places, and events with precision and clarity. The major scenes are creatively illustrated by artist Joseph Novak, whose crisp modern

style brings history to life. The result is an articulate, no-nonsense approach that guides readers through the events of world history—from prehistory to the present day—that have shaped Christianity in the past and affect it today. World History is part of the Christianity and the Liberal Arts series, which recognizes that many Christians are eager to deepen their understanding of the liberal arts, yet have limited time to do so. By reviewing key fields—philosophy, history, literature, world religions, and the arts—in a concise, creative way, Christianity and the Liberal Arts books will inspire new insights for a new generation of Christian life and ministry.

Human Rights in Latin America Sonia Cardenas, Rebecca K. Root, 2022-07-05 For decades, Latin America has been plagued by civil wars, dictatorships, torture, legacies of colonialism, racism, and inequality. The region has also experienced dramatic—if uneven—human rights improvements, shedding light on the politics of transformation. The accounts of how Latin America’s people have dealt with the persistent threats to their fundamental rights offer lessons for people around the world. Human Rights in Latin America provides a comprehensive introduction to the human rights issues facing an area that constitutes more than half of the Western Hemisphere. This second edition brings together regional case studies and thematic chapters to explore cutting-edge issues and developments in the field. From historical accounts of abuse to successful transnational campaigns and legal battles, Human Rights in Latin America explores the dynamics underlying a vast range of human rights initiatives. In addition to surveying the roles of the United States, relatives of the disappeared, and truth commissions, Sonia Cardenas and Rebecca Root cover newer ground in addressing the colonial and ideological underpinnings of human rights abuses, emerging campaigns for gender and sexuality rights, and regional dynamics relating to the International Criminal Court. Engagingly written and fully illustrated, Human Rights in Latin America fills an important niche among human rights and Latin American textbooks. Ample supplementary resources—including discussion questions, interdisciplinary reading lists, filmographies, online resources, internship opportunities, and instructor assignments—make this an especially valuable text for use in human rights courses.

Mezcal in Oaxaca Ronda L. Brulotte, 2025 An ethnography of mezcal and how it has become a global, artisanal good.

Ethnographic Insights on Latin America and the Caribbean Melanie A. Medeiros, Jennifer R. Guzmán, 2023-02-27 Ethnographic Insights on Latin America and the Caribbean offers a compelling introduction to the region by providing a series of ethnographic case studies that examine the most pressing issues communities are facing today. These case studies address key topics such as inequities during the COVID-19 pandemic, anti-Black racism, resistance against extractive industries, migration and transnational families, revitalization of Indigenous languages, art and solidarity in the wake of political violence, resilience in the face of climate change, and recent social movements. Designed for courses in a variety of disciplines, this expansive volume is organized in thematic sections, with introductions that draw important connections between chapters. The first section provides essential background on ethnography, archaeology, and history, while chapters

in the following sections center local perspectives, strategies, and voices. Each chapter ends with reflection and discussion questions, key concepts with definitions, and resources to explore further. Presenting a snapshot of life during the early decades of the twenty-first century, *Ethnographic Insights on Latin America and the Caribbean* illuminates the structural forces and human agency that are determining the future of the region and the world.

Sustainable Coffee in Costa Rica Andrew P. Miller, Jeffrey Stratford, 2025-07-10 The book examines the intersection of politics, economic development, and environmental sustainability of the coffee industry in Costa Rica. Ecological impacts of coffee production are analyzed through the lens of mitigating damage to the region's biodiversity. *Sustainable Coffee in Costa Rica: Solutions for People, Economic Development, and Biodiversity* analyzes the intersection of politics, economic development, and environmental sustainability in coffee production. Coffee has long been central to understanding Costa Rican politics and society. From the mid-19th century to the mid-20th century, coffee was the most important economic engine for the country and coffee growers held a great deal of political power. Beginning with the historical and socio-economic importance of coffee in Costa Rica as well as the broader region, this book argues that long-term economic success for the Costa Rican coffee industry is enhanced and catalyzed by economic, social, political, and especially ecological sustainability. This book also explores the ecological effects of coffee growing, from creating plantations to the disposal of waste products, to examine how these effects can be mitigated to lessen the impact on the region's incredible biodiversity.

A Future without Borders? Theories and practices of cosmopolitan peacebuilding Eddy Souffrant, 2016-08-01 A *Future without Borders (FWB)* offers an explanation of why the recent, but by now distant, movements of the "Occupy Wall Street" activists have repeated themselves across the globe. The book demonstrates some of the processes inherent to an adapting cosmopolitanism (a call for civility, a call for justice, a call for a collective responsibility or accountability) that is not individualistic in nature. Until recently, the state/national problems understood as politico-economic failures were conceived as isolated problems, failures of state institutions that are particular to certain countries. FWB contests the Westphalian logic that explains these circumstances, as national failures and argues instead that the conditions be assessed as extensions of the global economic and ideological failures that they surely are. Contributors are: Anton Allayar, Arnold Farr, Andrew Fiala, Pierre-André Gagnon, Bill Gay, Kurtis Hagen, Linden F. Lewis, Tracey Nicholls, Richard T. Peterson, Jorge Rodriguez, Eddy M. Souffrant, and Hilbourne A. Watson.

Essays from the Margins Luis N Rivera-Pagan, 2015-04-30 These essays emerge from different crucial and complex conflicts: from the memory of a bishop, Bartolome de las Casas, urging the pope of his time to cleanse the church of complicity with violence, oppression, and slavery; from the lament and defiance of so many Middle Eastern women, victims of male domination and too many wars; from the voices bursting out from the colonial margins that dare to question and transgress the norms and laws imposed by colonizers and conquerors; from the emerging and diverse theological disruptions

of traditional orthodoxies and rigid dogmatisms; from the denial of human rights to immigrant communities, living in the shadows of opulent societies; from the use of the sacred Hebrew Scriptures to displace and dispossess the indigenous peoples of Palestine. The essays belong to different intellectual genres and conceptual crossroads and are thus illustrative of the dialogic imagination that the Russian intellectual Mikhail Bakhtin considered basic to any serious intellectual enterprise. They are also the literary sediment of years of sharing lectures, dialogues, and debates in several academic institutions in the United States, Mexico, Argentina, Chile, Costa Rica, Malaysia, Switzerland, Germany, and Palestine.
