Anastasios Tamis

The Greeks in Australia Anastasios Tamis, 2005-05-30 The contribution of Greek settlers to the large industrial cities and other major urban centres modernised them by injecting new ideas into the economic, social and political life of their new environment.--Jacket.

Greeks in Australia Charles Archibald Price, 1975 This book provides an introduction to the nature and purpose of Greek societies and organisations, and explains how Greeks relate to other Greeks in Australia and to Australian people and institutions. In identifying areas where Greeks have succeeded or failed in Australia, it also shows where Australia has succeeded and failed in its dealings with them and with other migrant groups.

The Australian People James Jupp, 2001-10 Australia is one of the most ethnically diverse societies in the world today. From its ancient indigenous origins to British colonisation followed by waves of European then international migration in the twentieth century, the island continent is home to people from all over the globe. Each new wave of settlers has had a profound impact on Australian society and culture. *The Australian People* documents the dramatic history of Australian settlement and describes the rich ethnic and cultural inheritance of the nation through the contributions of its people. It is one of the largest reference works of its kind, with approximately 250 expert contributors and almost one million words. Illustrated in colour and black and white, the book is both a comprehensive encyclopedia and a survey of the controversial debates about citizenship and multiculturalism now that Australia has attained the centenary of its federation.

Technical Translations Patrizia Giampieri, Claudia Mary Forshaw Labruzzo, 2021-05-18 This book explains and shows how corpora and the web as corpus can be consulted successfully to deliver technical translations in a first and second language. It follows a step-by-step approach and provides insights into term search, collocation retrieval and uses of words in contexts of various technical fields. You will become acquainted with online and offline corpora, the web as corpus and will be able to deliver native-like translations in different sectors. The fields tackled by this book are various and include economics, business, medicine and journalism. This book is unique because not only does it clearly show how corpora and the web can be consulted to obtain relevant and reliable information in the field of technical translations, but it also provides the reader with a collection of electronic texts which can be consulted to translate the documents proposed in each chapter. In this way, the user will learn how to use corpora successfully by self-practising and will have free databases in economics, business and medicine for his/her own use. For these reasons, this is both a reference book for lecturers or technical translators and a self-study practice guide for students in translation studies. The ideal level of English is at least B2.

Memory and Migration in the Shadow of War Joy Damousi, 2015-11-12 In an engaging and original contribution to the field of memory studies, Joy Damousi considers the enduring impact of war on family memory in the Greek diaspora. Focusing on Australia's Greek immigrants in the aftermath of the Second World War and the Greek Civil War, the book explores the concept of remembrance within the larger context of migration to show how intergenerational experience of war and trauma transcend both place and nation. Drawing from the most recent research in memory, trauma and transnationalism, *Memory and Migration in the Shadow of War* deals with the continuities and discontinuities of war stories, assimilation in modern Australia, politics and activism, child migration and memories of mothers and children in war. Damousi sheds new light on aspects of forgotten memory and silence within families and communities, and in particular the ways in which past experience of violence and tragedy is both negotiated and processed.

Towards Federation 2001 National Library of Australia, 1993 Collection of papers from the 'Towards Federation 2001' conference, held in Canberra on 23-26 March 1992 and attended by 140 participants from libraries nationwide. Includes the final report and resolutions along with agenda, working and background papers. Topics addressed include access to information by particular groups such as the Aboriginal community and the disabled, and preservation of material. Refers to a range of types of documentation such as cartographic material, microforms, machine-readable records, theses, and oral history and folklore.

The Transnational Voices of Australia's Migrant and Minority Press Catherine Dewhirst, Richard Scully, 2020-11-13 This edited collection invites the reader to enter the diverse worlds of Australia's migrant and minority communities through the latest research on the contemporary printed press, spanning the mid-nineteenth century to our current day. With a focus on

the rare, radical and foreign-language print culture of multiple and frequently concurrent minority groups' newspaper ventures, this volume has two overarching aims: firstly to demonstrate how the local experiences and narratives of such communities are always forged and negotiated within a context of globalising forces – the global within the local; and secondly to enrich an understanding of the complexity of Australian 'voices' through this medium not only as a means for appreciating how the cultural heritage of such communities were sustained, but also for exploring their contributions to the wider society.

Migrants, Television and Australian Stories Kate Darian-Smith,Sue Turnbull,Sukhmani Khorana,Kyle Harvey,2025-05-26

This book examines the intertwined histories of television and migration in Australia, told from the perspectives of migrants who worked in the screen industry and the many more who watched television. Their stories demonstrate how Australia's growing cultural diversity has challenged conventional representations of 'Australianness' on television, and how ongoing advocacy has supported the growing inclusivity of multiple narratives and diverse experiences on screen. Migrants from many backgrounds were instrumental in the establishment in 1956 of Australian television, working behind and in front of the cameras as producers, directors, writers, technicians and actors. From early broadcasting to the digital present, portrayals of cultural differences have often been shaped by appropriation, ethnic stereotyping and racism. This has occurred across a range of formats from drama to comedy to news and reality shows. Many in the industry have responded with resilience and creative adaptation, as they have increasingly taken control of the ways that migrant stories are told and diversity is celebrated. The first comprehensive Australian study of migrants and television, this book considers the ways multicultural audiences have experienced the small screen over seven decades. Drawing on rich oral histories, it analyses the memories of television in the work, school, family life and leisure of migrant communities and their broader engagements with Australian culture. Research in the archives of broadcasters and production companies reveals how non-Anglo Australian characters were constructed, and how such portrayals have shifted. This new history takes us to digital screen production and consumption today, exploring how Australians of many diasporas engage with the global network of screen content in the twenty-first century. It is essential reading for media professionals, advocates, students and those interested in

the intersections between media, cultural diversity and the nation.

Shaping Australia's Spirituality Philip Hughes, Stephen Reid, Claire Pickering, 2010

Routledge Handbook of Public Communication of Science and Technology Massimiano Bucchi, Brian Trench, 2014-06-20 Communicating science and technology is a high priority of many research and policy institutions, a concern of many other private and public bodies, and an established subject of training and education. Over the past few decades, the field has developed and expanded significantly, both in terms of professional practice and in terms of research and reflection. The Routledge Handbook of Public Communication of Science and Technology provides a state-of-the-art review of this fast-growing and increasingly important area, through an examination of the research on the main actors, issues, and arenas involved. In this brand-new revised edition, the book brings the reviews up-to-date and deepens the analysis. As well as substantial reworking of many chapters, it gives more attention to digital media and the global aspects of science communication, with the inclusion of four new chapters. Several new contributors are added to leading mass-communication scholars, sociologists, public-relations practitioners, science writers, and others featured herein. With key questions for further discussion highlighted in each chapter, the handbook is a student-friendly resource and its scope and expert contributors mean it is also ideal for both practitioners and professionals working in the field. Combining the perspectives of different disciplines and of different geographical and cultural contexts, this original text provides an interdisciplinary and global approach to the public communication of science and technology. It is a valuable resource for students, researchers, educators, and professionals in media and journalism, sociology, the history of science, and science and technology.
