DRIVING, NOT SURVIVING: 4 Modus Operandi for Achievement Joe Carter,2025-04-01 Driving, Not Surviving: Modus Operandi for Achievement By Joe Carter In a world full of leadership advice, Driving, Not Surviving stands out by offering more than inspiration—it provides a practical roadmap for lasting achievement. Written for leaders at every level, this book delivers a real-world framework for bridging the gap between strategy and execution. Whether you're a seasoned executive, an emerging professional, or someone seeking clarity in your personal mission, this book helps you move from survival mode to purpose-driven momentum. Joe Carter introduces readers to the 4 Modus Operandi of Achievement, a powerful system developed through decades of firsthand leadership, business transformation, and coaching experience. Grounded in behavioral psychology and strategic execution, the book goes beyond theory to provide tools that work in everyday environments—offices, classrooms, job sites, churches, and homes. Key Themes: Attitude vs. Direction: A positive mindset is valuable, but without a clear destination and execution plan, progress stalls. Carter opens the book with a critical distinction: optimism must be paired with purpose. Personal Benchmarking: Leadership begins with knowing who you want to become. Readers are guided to define their role models, values, and dreams before building strategies. Strategy to Behavior Change:

Many leaders focus on planning but falter when it's time to act. Carter explains why execution requires behavioral shifts—not just decisions from the top. *The Whirlwind*: Everyday urgencies compete with strategic goals. The book provides actionable ways to protect space for long-term growth while managing daily demands. *The 4 Modus Operandi of Achievement*: Focus: Identify and commit to Ferociously Important Goals (FIGs)—the few priorities that drive meaningful impact. Lead Measures: Take action on controllable, predictive behaviors that lead to results—rather than chasing lagging outcomes. Scoreboards: Keep visible, captivating scoreboards to foster accountability and engagement within teams. Accountability: Build systems of ownership through consistent review, coaching, and shared commitment. What Makes This Book Different? This isn't a repackaging of motivational clichés. It's a tested method refined through real setbacks and real results. Carter transparently shares his journey—from corporate turnarounds to personal leadership challenges—illustrating how the principles within this book changed the trajectory of his career and teams. He draws from giants like Abraham Lincoln, John C. Maxwell, and Stephen Covey, while creating a unique framework that applies across industries and life stages. Who Should Read This Book? Leaders seeking better execution in their teams Professionals in transition or growth phases Coaches and managers looking for a clear development model Anyone tired of surviving their career and ready to take the wheel With reflection exercises, practical illustrations, and a companion journal, *Driving, Not Surviving* equips you not only to succeed—but to build a legacy that outlasts you.

Awaken the Power Within Albert Amao, 2018-06-05 The \$12 billion self-help industry is under constant attack for pedaling false miracles to duped believers. But sociologist Albert Amao demonstrates that Americans eagerly support self-help books, seminars, and programs because, under the right conditions, these things work. Sociologist Albert Amao analyzes the accuracy of self-help and positive-thinking claims in this groundbreaking--and wholly unexpected--exploration of what works, what doesn't, and why. Regarding my personal experience, Amao writes, I can testify that positive thinking and positive action have worked wonderfully for me. Born in a poor Latin-American country into a very impoverished family with both parents practically illiterate, I was the oldest of five children. I started working when I was six years old, shining shoes and selling newspapers to help my family. Nobody then would have believed that I would be able to finish high school. Nevertheless, I was able to do it going to night school, which allowed me to be admitted at the San Marcos University in Lima to get my Ph.D. in sociology. All these things were possible because, when I was teenager, I had access to New Thought, or positive-thinking philosophy. Contrary to the critics who blithely dismiss self-help methods, or the New Age gurus who sell it them as miracles, Amao--writing with sobriety, scholarship, and drawing on deep personal experience--explores the conditions under which self-help is authentic.

The Successful Teacher's Survival Kit Dale Ripley, 2018-12-14 If you have ever had the opportunity to observe a master craftsperson at work, one of the first things you will notice is how easy they make their work look. This principle applies to artists, athletes, plumbers and painters. It also applies to teachers. If you were fortunate enough to have some master teachers in your K to 12 schooling or for your university student teaching, you will have seen this principle at work. You will recall how easy they made teaching look. For the most part, their classes just flowed. The teacher would ask the students to do something, and the students did it. The teacher would cue the kids to transition into a new activity, and the kids transitioned. There was little conflict, few arguments, and the vast majority of classroom time was spent engaged in learning. It is a pleasure to observe these kinds of behaviors in the classrooms of master teachers, but this leaves us with an important

question: how do they do it? Just how did these teachers get their students to be so cooperative and have their classroom running so smoothly? That is what THE SUCCESSFUL TEACHER'S SURVIVAL KIT: 83 simple things that successful teachers do to thrive in the classroom will show you – the kinds of things that master teachers do to make their classes work – both for themselves and for their students. You too can become a master teacher. This book will show you how.

Rethinking Positive Thinking Gabriele Oettingen, 2014-10-16 “The solution isn’t to do away with dreaming and positive thinking. Rather, it’s making the most of our fantasies by brushing them up against the very thing most of us are taught to ignore or diminish: the obstacles that stand in our way.” So often in our day-to-day lives we’re inundated with advice to “think positively.” From pop music to political speeches to commercials, the general message is the same: look on the bright side, be optimistic in the face of adversity, and focus on your dreams. And whether we’re trying to motivate ourselves to lose weight, snag a promotion at work, or run a marathon, we’re told time and time again that focusing on fulfilling our wishes will make them come true. Gabriele Oettingen draws on more than twenty years of research in the science of human motivation to reveal why the conventional wisdom falls short. The obstacles that we think prevent us from realizing our deepest wishes can actually lead to their fulfillment. Starry-eyed dreaming isn’t all it’s cracked up to be, and as it turns out, dreamers are not often doers. While optimism can help us alleviate immediate suffering and persevere in challenging times, merely dreaming about the future actually makes people more frustrated and unhappy over the long term and less likely to achieve their goals. In fact, the pleasure we gain from positive fantasies allows us to fulfill our wishes virtually, sapping our energy to perform the hard work of meeting challenges and achieving goals in real life. Based on her groundbreaking research and large-scale scientific studies, Oettingen introduces a new way to visualize the future, called mental contrasting. It combines focusing on our dreams with visualizing the obstacles that stand in our way. By experiencing our dreams in our minds and facing reality we can address our fears, make concrete plans, and gain energy to take action. In Rethinking Positive Thinking, Oettingen applies mental contrasting to three key areas of personal change— becoming healthier, nurturing personal and professional relationships, and performing better at work. She introduces readers to the key phases of mental contrasting using a proven four-step process called WOOP—Wish, Outcome, Obstacle, Plan—and offers advice and exercises on how to best apply this method to daily life. Through mental contrasting, people in Oettingen’s studies have become significantly more motivated to quit smoking, lose weight, get better grades, sustain fulfilling relationships, and negotiate more effectively in business situations. Whether you are unhappy and struggling with serious problems or you just want to improve, discover, and explore new opportunities, this book will deepen your ideas about human motivation and help you boldly chart a new path ahead.

The Mind Guide Tamunofinaria Brown, 2014-08-29 Issues discussed in this book reflect not only research work, but also experience by the author, to guide the mind of individuals who had been prejudiced by mind-sets, training, doctrines,

beliefs, and peers. Some individual had accepted poverty, and believed they will never be rich. Some others had accepted defeat in life, and lay blames on their surroundings, friends, and families, instead of blaming it on their lack of persistence, perseverance, selfimprovement, and unceasing prayers. However, after reading this book, you will hone your thoughts. You can think yourself into success, or into poverty. You can think yourself into progress or retrogression. Our mind-sets are the powerhouse of our actions – success and failure in all areas of our lives: love, faith, sex, business, education, profession, marriage, friendship, etc... The perspectives in this book are the issues of fears, the four Idols that prejudice understanding, emotional pitfall (love, faith, sex, and anger), power of knowledge, truth and reality, power of thoughts, cultural and ethnic miscues, perseverance, persistence, prayers, peers, mental capability, information quality, and more, and their respective influences on individuals' behaviours and successes. The author concludes this book with final words of mind guide, which encompass almost all the areas discussed in the preceding twelve (12) chapters.

The Power of Positive Thinking Norman Vincent Peale, Fill your mind with all peaceful experiences possible, then make planned and deliberate excursions to them in memory. You must learn that the easiest way to an easy mind is to create an easy mind. This is done by practice, by the application of some such simple principles as outlined here. The mind quickly responds to teaching and discipline. You can make the mind give you back anything you want, but remember the mind can give back only what it was first given. Saturate your thoughts with peaceful experiences, peaceful words and ideas, and ultimately you will have a storehouse of peace-producing experiences to which you may turn for refreshment and renewal of your spirit. It will be a vast source of power. Norman Vincent Peale, an American minister and author, was a progenitor of the theory of Positive Thinking. Born in Bowersville, Ohio, Peale graduated from Bellefontaine High School. He earned degrees at Ohio Wesleyan University and Boston University School of Theology. He was brought up as a Methodist and was ordained as a Methodist minister in 1922. A decade later, Peale changed his religious affiliation to the Reformed Church in America in 1932, and thus began his 52-year tenure as pastor of Marble Collegiate Church in Manhattan. In 1935, Peale also started a radio program, "The Art of Living", which lasted for 54 years and gained immense popularity. He was a copious writer, and his most widely read book, *The Power of Positive Thinking* sold around 5 million copies. Peale also cofounded The Horatio Alger Association along with Peale Center, Guideposts Publications, and the Positive Thinking Foundation, all of which aim to advance Peale's theories of Positive Thinking.
