World's Worst Westerns Plus Some of the Best Your Guide to the Best of the Worst John Howard Reid, 2015-09-11 Once by far Hollywood's largest category of popular movies, Westerns are now out of fashion with the movie-going public, but they still hold a commanding presence on DVD. Until recently, Westerns were one of the most popular DVD categories, third only to action and science fiction. Many, many titles from the 1930s and 1940s were made by small, independent companies that no longer exist. A huge number of westerns are therefore in the public domain and are now available on DVD from outlets like Alpha and Grapevine. In fact, there are currently so many titles on DVD, that guides like World's Worst Westerns are not a luxury or an addenda, but an absolute necessity for collectors who wish to spend their money wisely by buying titles they will enjoy! In fact, for western fans like myself, a book like World's Worst Westerns is not just a novelty, but an absolute necessity!

Both delightfully readable and powerfully moving, *Below Luck Level* is the story of a daughter's relationship with her mother and the unexpected challenges of caring for a parent with Alzheimers.

God Is an Atheist N. Nosirrah, 2008-05-21 A profoundly funny romp through religion, spirituality, and the contemporary clash of cultures of belief, with special attention to the human obsession with knowing what can't be known. Nosirrah provokes just about everyone as he describes a world where God is on the run from Islamic extremists, the Pope announces he shares a bed with Richard Dawkins, and Buddha's son disappoints by getting enlightened instead of becoming a doctor. To say this novella is strange might give the reader a way to relate to it, but in fact, nothing will shift the burden away from the reader. In its pages, the world is bent around the reader's mind until either the mind itself begins to bend, or indeed, breaks. A book without plot, characters, structure, or obvious purpose, this is an endless descent into the netherworlds of a dystopian mind. If a thousand monkeys typing endlessly would eventually produce all great works of literature, then *God Is an Atheist* is their first draft.

Hume's Problem Solved Gerhard Schurz, 2019-05-07 A new approach to Hume's problem of induction that justifies the optimality of induction at the level of meta-induction. Hume's problem of justifying induction has been among epistemology's greatest challenges for centuries. In this book, Gerhard Schurz proposes a new approach to Hume's problem. Acknowledging the force of Hume's arguments against the possibility of a noncircular justification of the reliability of induction, Schurz demonstrates instead the possibility of a noncircular justification of the optimality of induction, or, more precisely, of meta-induction (the application of induction to competing prediction models). Drawing on discoveries in computational learning theory, Schurz demonstrates that a regret-based learning strategy, attractivity-weighted meta-induction, is predictively optimal in all possible worlds among all prediction methods accessible to the epistemic agent. Moreover, the a priori justification of meta-induction generates a noncircular a posteriori justification of object induction. Taken together, these two results provide a noncircular solution to Hume's problem. Schurz discusses the philosophical debate on the problem of induction, addressing all major attempts at a solution to Hume's problem and describing their shortcomings; presents a series of theorems, accompanied by a description of computer simulations illustrating the content of these theorems (with proofs presented in a mathematical appendix); and defends, refines, and applies core insights regarding the optimality of meta-induction, explaining applications in neighboring disciplines including forecasting sciences, cognitive science, social epistemology, and generalized evolution theory. Finally, Schurz generalizes the method of optimality-based justification to a new strategy of justification in epistemology, arguing that optimality justifications can avoid the problems of justificatory circularity and regress.

Consumer Optimization Problem Solving Alfred L Norman,2014-12-15 What algorithms are tractable depends on the speed of the processor. Given the speed of digital computers, polynomial algorithms are considered tractable. But, a human can take several seconds to make one binary comparison between two pens. Given this slow speed, sublinear algorithms are considered tractable for an unaided human and this defines Simon's concept of bounded rationality.Humans make

simplifications to solve the intractable consumer optimization problem. Consumers search for goods and services item-by-item, which greatly reduces the number of alternatives to consider. In addition, consumers have operators that can process a set in a single operation. Also, consumers budget by incremental adjustment. In considering consumer performance the question to ask is how close to optimal is consumer performance and not whether consumers optimize as a yes/no question. Given the ordinal nature of utility theory this creates a basic measurement problem. The book presents a review of the literature on consumer performance. This is an opportune time to study consumer procedures because the Internet provides a media to make substantial improvements in consumer performance. The book includes a case study comparing the performance of a digital camera selection code with the advice of sales people. A field experiment demonstrates that the software code provides better advice.
