

La Sauge En Arabe Marocain

Manuela Marín,Cristina de la Puente

Sur les productions végétales du Maroc Émile Perrot,Louis Gentil,1921

Dictionnaire du faisceau dialectal arabe andalou Federico Corriente,Christophe Pereira,Ángeles Vicente,2017-01-11

Detailed accounts of the lexical constituent of any language, to which the grammatical array of rules is added in order to produce correct utterances, are a must in applied linguistic description, as only they allow the thorough retrieval of information contained therein. In the case of 'dead' languages or dialects, works of this nature are even more necessary, as there is no possibility of eliciting information from natives. This is the case of Andalusí Arabic, practised in the Iberian Peninsula between the eighth and seventeenth centuries and a vehicle of an interesting folk literature, in prose and poetry, as well as of some legal deeds and personal letters with historical allusions of great value. These materials have been surveyed since the nineteenth and mainly during the twentieth century; however, the interest for such studies appears to have abated in recent decades, while a definitive assessment of their contribution to linguistics, literature and history has not yet been produced. Therefore, this dictionary will be helpful to scholars working on those fields from both the viewpoints of Western European and Western Islamic studies.

Temps et aspect en égyptien Jean Winand, 2006-08-01 This volume deals with the complex question of time and aspect in ancient Egyptian. The first part presents an original theoretical model which challenges some well-established facts in general linguistics. The functioning of aspect is explained as a dialectic process between the grammatical tenses, the actionality of events, the semantic roles of the participants, and diverse lexical means. The second part examines the expression of aspect in ancient Egyptian, with a diachronic presentation from the beginning down to Late Egyptian. The third and last part is devoted to the study of the temporal relation. The argumentation is illustrated by more than 800 examples and numerous figures.
