Janey Levy

Latrinae: Roman Toilets in the Northwestern Provinces of the Roman Empire Stefanie Hoss, 2018-01-31 This book is the first collection on Roman toilets of the northwestern provinces, and gives a good overview of the possibilities for human waste removal in Roman times. The volume provides a fascinating introduction to this under-researched group of Roman installations.

The Technology of Ancient Rome Naomi V. McCullough, 2016-12-15 Ancient Rome was a civilization developed over many centuries. At its height, it had the world's greatest army, rulers, and language, influencing much of the known world. Their technologies during this time were likewise improvements on older concepts, mostly from the Greeks, whom they conquered. Nevertheless, their influence continued long after the fall of the Roman Empire. Today, several technologies have their origins in Ancient Rome. This book examines the history of Ancient Rome and its key contributions to society, past and present.

Roman Toilets Gemma C. M. Jansen, Jesús Acero, Ann Olga Koloski-Ostrow, Eric M. Moormann, 2011 Multi-seater latrines, as we find them in Roman Ostia and in many other sites across the Mediterranean, are well known both to tourists and archaeologists, but very few people understand how they really functioned technically or how they may have been perceived in the context of Roman society. This handbook by an international group of specialists in archaeology, anthropology, and classical literature addresses a wide variety of questions regarding toilets in the Greco-Roman world. Chapters on the technology and construction of toilets, on the archaeology of toilets and their contents, on toilets in various ancient contexts (such as in private houses, baths, or military installations), on the impact of toilets on society and personal hygiene, especially in the Roman world, and on the decorations and graffiti from toilets, all combine to make this the most complete study of this important subject to date.

The Archaeology of Sanitation in Roman Italy Ann Olga Koloski-Ostrow, 2015-04-06 The Romans developed sophisticated methods for managing hygiene, including aqueducts for moving water from one place to another, sewers for removing used water from baths and runoff from walkways and roads, and public and private latrines. Through the archeological record, graffiti, sanitation-related paintings, and literature, Ann Olga Koloski-Ostrow explores this little-known world of bathrooms and sewers, offering unique insights into Roman sanitation, engineering, urban planning and

development, hygiene, and public health. Focusing on the cities of Pompeii, Herculaneum, Ostia, and Rome, Koloski-Ostrow's work challenges common perceptions of Romans' social customs, beliefs about health, tolerance for filth in their cities, and attitudes toward privacy. In charting the complex history of sanitary customs from the late republic to the early empire, Koloski-Ostrow reveals the origins of waste removal technologies and their implications for urban health, past and present.

Ancient Rome Monica M. Bontty, 2020-03-17 This book shares little-known facts from and excerpts of primary source documents to correct popular misconceptions about Ancient Rome and to show how those misconceptions became widespread. Roman personalities and history have always had a larger-than-life profile in American popular culture, but most people think of this ancient civilization as merely decadent, cruel, and elitist. Most of our stereotypical conceptions of the empire and its people, however, are wrong. This book corrects popular misconceptions about the ancient Roman world, thus making ancient history relevant and accessible to modern readers and allowing modern critics of American politics and society to draw accurate comparisons. Each chapter discusses how a particular misconception developed, spread, and evolved into what we now believe to be the historical truth. Topics discussed include crucifixion, the destruction of Carthage, Julius Caesar's last words, and Roman hygiene. Excerpts from primary source documents provide evidence of both the rise of the historical fictions and the truths behind the myths.

Latrinae et Foricae Barry Hobson, 2009-07-09 The Romans are renowned for their aqueducts, baths and water systems, achievements equalled in the modern world only over the past few hundred years. Their toilets, both single ('latrinae') and multi-seater ('foricae') form part of the Roman sanitation system that continues to fascinate the modern visitor to ancient sites today. In this well illustrated overview, Barry Hobson describes toilets in the Roman empire from Iberia to Syria, and from North Africa to Hadrian's Wall. Particular emphasis is given to Pompeii, where many toilets are preserved and where some evidence for change over time can be found. The discussion encompasses not only details of location, construction and decoration of toilets, but also questions of privacy, sewage, rubbish disposal, health issues, references in Latin literature, and graffiti.

Multisensory Living in Ancient Rome Hannah Platts,2019-11-28 Classicists have long wondered what everyday life was like in ancient Greece and Rome. How, for example, did the slaves, visitors, inhabitants or owners experience the same home differently? And how did owners manipulate the spaces of their homes to demonstrate control or social hierarchy? To answer these questions, Hannah Platts draws on a diverse range of evidence and an innovative amalgamation of methodological approaches to explore multisensory experience - auditory, olfactory, tactile, gustatory and visual - in domestic environments in Rome, Pompeii and Herculaneum for the first time, from the first century BCE to the second century CE. Moving between social registers and locations, from non-elite urban dwellings to lavish country villas, each chapter takes the reader through a different type of room and offers insights into the reasons, emotions and cultural factors behind perception, recording and

control of bodily senses in the home, as well as their sociological implications. Multisensory Living in Ancient Rome will appeal to all students and researchers interested in Roman daily life and domestic architecture.
