## M. Kelson

**The Gift of Fear** Gavin De Becker, 1998 True fear is a gift. Unwarranted fear is a curse. Learn how to tell the difference. A date won't take no for an answer. The new nanny gives a mother an uneasy feeling. A stranger in a deserted parking lot offers unsolicited help. The threat of violence surrounds us every day. But we can protect ourselves, by learning to trust--and act on--our gut instincts. In this empowering book, Gavin de Becker, the man Oprah Winfrey calls the nation's leading expert on violent behavior, shows you how to spot even subtle signs of danger--before it's too late. Shattering the myth that most violent acts are unpredictable, de Becker, whose clients include top Hollywood stars and government agencies, offers specific ways to protect yourself and those you love, including...how to act when approached by a stranger...when you should fear someone close to you...what to do if you are being stalked...how to uncover the source of anonymous threats or phone calls...the biggest mistake you can make with a threatening person...and more. Learn to spot the danger signals others miss. It might just save your life.

The Medulla Obligation Book Two M. Kelson, 2005 The Medulla Obligation is the siren of the mating dance. The character of the Medulla Obligation is much more complicated than that of gravity, yet no less powerful and no less consistent. You cannot escape her designs on your life, but you can flow with her and learn to recognize both advantages and pitfalls inherent and inevitable in human interaction. The Medulla Obligation will show you that you can affect the outcome of your relationships through a tilt in your perception. You can learn when to interact and when to quietly disengage, when your gifts are yours or are to be taken from you. You can learn how to make the best of your turns at bat in life to make a difference for you and those important to you, and how to keep yourself viable beyond established expectations. She has no flexibility and has no reliance on the quality of the partners she pressures together. The test of that union is the survivability and behavioral adaptations of the children born from it...most of that 'safeguard' is now gone, and we have been unable to compensate.

**Counterpredators** Bill Kortenbach, 2012-12-14 Counterpredators is a modern solution to an ancient problem: Parents face the overwhelming responsibility of training their children to navigate the threat environment and safely molding them into powerful, self-aware, authentic adults. At the same time, many parents do not themselves possess the necessary skill set--and when their children sense this, they begin to adopt questionable heroes and role models. In the natural world, animal parents train their young by repeatedly exposing them to hazard, while demonstrating efficient risk management, yet our

society teaches us to do the exact opposite: Shelter and protect our children from whatever might harm them. As a result, many children are profoundly unprepared to deal with real threat. Since both animal and human young are equally vulnerable, it is easy to spot the weak link: The unprepared human parent. To solve this problem, parents need to assume a powerful new identity, something unique and elemental that rivets the attention and imagination of their children. They must become counterpredators: individuals who have the skill and the will to engage and overcome human threats. Counterpredators is the story of how to achieve this transition using cutting edge methodology. Survival Response Conditioning --the re-activation of dormant, subconscious survival skills combined with high pressure, scenario based experiences--produces rapid, permanent change and provides the launch pad for an unbreakable bond of love and respect between parents and children.

**Ending Campus Violence** Brian Van Brunt, 2012-08-21 With the growth of threats and violence in higher education settings, college campuses are increasingly expected to have systems in place to identify potentially aggressive individuals and intervene to ensure the safety of the campus population. This book will be useful for student affairs professionals as well as college counselors, psychologists, social workers interested in the practical management of aggression and violence on a college campus. It will also be a valuable resource for those involved in creating and running behavioral intervention teams and threat/risk assessment teams. Ten case studies from both the community and residential college settings provide a comprehensive overview of campus violence and how to intervene to prevent it. Pertinent background information is discussed as an introduction to these narratives, such as the fundamentals of aggression and violence on campuses; how these behaviors can impact students, faculty, and staff; and what can be learned from past campus violence. Along with discussion questions and a review of ways to approach each situation, experts in higher education, forensic risk assessment, law enforcement, and legal issues weigh in on each case study. Their perspectives offer a context and broad base of opinions and ideas on how each case could be handled. Additional examples for further training of the college counselor are given through a detailed look at almost 100 incidents of violence, including thwarted attacks, rampage shootings, and hostage situations.

Foreword by Lois P. Frankel, Ph.D., New York Times bestselling author of *Nice Girls Don’t Get the Corner Office* ARE YOU A VICTIM OF SUBTLE ABUSE? Are you always the one apologizing? Constantly questioning and blaming yourself? Do you often feel confused, frustrated, and angry? If you answered yes to any of these questions, you’re not alone. Nearly half of all women—and men—in the United States experience psychological abuse without realizing it. Manipulation, deception, and disrespect leave no physical scars, but they can be just as traumatic as physical abuse. In this groundbreaking book, Avery

Neal, founder of the Women's Therapy Clinic, helps you recognize the warning signs of subtle abuse. As you learn to identify patterns that have never made sense before, you are better equipped to make changes. From letting go of fear to setting boundaries, whether you're gathering the courage to finally leave or learning how to guard against a chronically abusive pattern, *If He's So Great, Why Do I Feel So Bad?* will help you enjoy a happy, healthy, fulfilling life, free of shame or blame. *Principia Amoris* John Mordechai Gottman, 2014-10-10 Stereotypically, science and emotion are diametric opposites: one is cold and unfeeling, the other soft and nebulous; one is based on proven facts while the other is based on inexplicable feelings and "never the twain shall meet," until now. John Gottman delves into the unquantifiable realm of love, armed with science and logic, and emerges with the knowledge that relationships can be not only understood, but also predicted as well. Based on research done at his Love Lab and other laboratories, Gottman has discovered that the future of love relationships can be predicted with a startling 91% success rate. These predictions can help couples to prevent disasters in their relationships, recognize the signs of a promising relationship, and perhaps more importantly, recognize the signs of a doomed one. *Principia Amoris* also introduces Love Equations, a mathematical modeling of relationships that helps understand predictions. Love Equations are powerful tools that can prevent relationship distress and heal ailing relationships. Readers learn about the various research and studies that were done to discover the science behind love, and are treated to a history of the people, ideas, and events that shaped our current understanding. They also learn about: • The "Four Horsemen of the Apocalypse" • 45 natural principles of love • 5 couple types • 5 recipes for good relationships • And much more! Just as science helped us to understand the physical world, it is helping us to understand the emotional world as well. Using the insights in this book, mental health professionals can meaningfully help their distressed clients, as well as better understand why a relationship is failing or succeeding. Appropriate for the curious non-mental health professional as well, *Principia Amoris* is a must-have on any bookshelf!

*Principle of Harmony in Healing* Gunasilan deBecker, 2017-05-30 The Principle of Harmony in Healing is a pioneering work that reveals many surprising links between the indigenous medical traditions of antiquity, suggesting that the world's oldest medical systems were likely conjoined or coordinated across the planet in ancient times. This captivating book not only unearths the forgotten role of harmony between patient and healer, but also exposes innumerable other startling connections among the ancient cultures that emphasized such a harmony in their medicine. How is the Hindu god Brahma, and his consort Saraswati, linked with the Hebrew luminary Abraham, and his wife Sara? How is the Hindu Kush mountain range related to the Land of Kush along the Blue Nile in Ethiopia? Sowa Rigpa—the indigenous medicine of Tibet, Bhutan, Nepal, Siberia, Mongolia, and Himalayan regions of India—fused many ancient medical traditions together in a unified system that has not only benefited countless patients throughout history, but also exhibits many key characteristics of the other medical traditions that thrived in distant parts of the world in past millennia, including Mesoamerica and Indonesia. How and why did these traditions come to have such an uncanny resemblance in an era when they are not believed to have developed any contact with each other? Is there a connection between the Amchi shamans of the Himalayas and the Hampchi healers of the Andes? These are just a few of the alluring questions covered in deBecker's ground-breaking work, *The Principle of Harmony in Healing*.

*Into the Wilderness* Kenneth Swanson, 2023-12-06 No one is free from the struggle with sin. Not only is sin part of being human, but the true nature of sin is widely misunderstood. *Into the Wilderness* provides a unique interpretation of sin as a

basic self-absorption that grips every human being and is the source of unhappiness. Historically the notion of sin has been divided into easily understood categories. The traditional approach used the Seven Deadly Sins--pride, greed, gluttony, anger, envy, sloth, and lust--as a framework. But a deeper understanding of sin demands three additional categories: fear, dishonesty, and despair. Into the Wilderness explores these ten specific sins with power and clarity. The book goes beyond an analysis of sin by opening the path from sin to redemption, from unhappiness to joy, finally laying out a path from the despair of sin to the joy of spiritual renewal and freedom. The book concludes with an addendum which answers the book's fundamental question--how can one move from the enslavement of sin into God's redeeming grace? The addendum presents a detailed prayer discipline designed to open the way forward.
