IATF 16949-2016 International Automotive Task Force, 2016

Adecuación del sistema de gestión de calidad de Renault Argentina S.A. con respecto al estándar internacional IATF 16949:2016 Joaquín Daniel Ibarrondo Pelaez, 2020 La industria automotriz es una de las más grandes del mundo y se encuentra en constante evolución. La calidad exigida en sus productos requiere la aplicación de estándares específicos que garanticen a los fabricantes alcanzar sus metas en cuanto a productividad, competitividad y mejora continua. Los sistemas de gestión de calidad (SGC), estandarizados mediante normas provenientes de entes con reconocimiento internacional, impulsan a las empresas automotrices a lograr dichas metas. La IATF 16949:2016 (International Automotive Task Force) es la norma internacional que actualmente rige los SGC en esta industria. Sustituye a una de las normas más utilizadas, la ISO/TS 16949 (International Organization for Standardization), específica para la gestión de la calidad en el sector automotriz que fue desarrollada inicialmente en 1999 por la IATF (integración de representantes de empresas automotrices y asociaciones de comercio de los EE.UU. y Europa) en colaboración con un comité de ISO para la gestión de la calidad. El documento consiste en una serie de requerimientos basados en la norma ISO 9001 añadiendo requisitos particulares referidos al sector automotriz. En este sentido, la certificación IATF 16949 enfatiza el desarrollo de un SGC que proporcione una mejora continua, prevenga los defectos y reduzca las variaciones y desperdicios en la cadena de suministros manteniendo como meta la satisfacción de las partes interesadas (stakeholders). En la actualidad las empresas automotrices exigen la aplicación y certificación a sus proveedores de la norma IATF 16949:2016, sin encontrarse, en algunos casos, ellas mismas certificadas. Renault Argentina S.A. (RASA) no es la excepción y al momento de seleccionar aquellos proveedores que formarán parte de su cartera, considera como factor clave la certificación de la IATF. RASA, hasta la fecha, se encuentra certificada bajo la norma ISO 9001:2015 y considera a futuro la certificación...

Guide to Implementing Automotive Supplier Requirements -- Iatf 16949 (with Little Spirituality) Rajendra Patil, 2019-04-06 This book includes requirements of Automotive suppliers IATF 16949:2016 in brief. It also gives information about changed requirements to that of previous standard ISO/TS 16949. The book gives brief requirements of the standard and subsequently the short notes AND interpretation is given for the implementation of the standard. Also includes in the book are mandatory procedures and documents requirements of the standard IATF 16949. While writing this book it is assumed that, readers are aware about requirements of ISO/TS 16949 Standard hence the requirements of the ISO/TS 16949 are not included in the book. The handwriting text in the book gives you the requirement of the standard and the preceding paragraphs explained the brief implementation. The underlined words are key words and can be useful for training purpose. The readers may find some statement/requirements are repeated in the book, but it is intentionally made considering importance of the requirement of standard. The volume of the book is kept minimum for simplicity of use however for detailed requirements of IATF 16949 readers are advised to refer the standard IATF 16949:2016 published by AIAG. The book is written based on my experience of 25+ years in the Quality Management System field. The volume of the book is kept minimum for simplicity of use however for detailed requirements of IATF 16949 readers are advised to refer the standard IATF 16949:2016 published by AIAG. This book is written with a little spirituality. We are working on and introducing a concept of Spiritual engineering. Now days the manufacturing scenario is somewhat like, we are producing and producing the goods day in and day out. We are earning money like anything but for what we are doing all this things? We don't know

where to stop? Let us pause and think, whether we are happy by manufacturing so much money? I intentionally am using the world manufacturing. There is no human touch to that money. The intent behind this book is to make people aware about basic requirements of the quality system IATF 16949 and to make these available to them at economic price.

Iso 9001:2015 and Iatf 16949:2016 Rationalized Patrick Ambrose, Systems Thinking Works, 2017-04-07 This book does not try to interpret requirements. It is not an explanation. It is a comprehensive 80 page practical remastering of the ISO 9001:2015 and the new IATF 16949:2016 standards. It takes the two separate standards, published in the new high level formats and reorganizes them into one single process based structure designed for manufacturing organizations. All requirements of ISO 9001:2015, IATF 16949:2016, customer specific requirements of Ford, GM, FCA, PSA and CQI requirements are covered. The requirements are covered in easy to interpret bullet points formatted by process to support evaluation of your QMS.
