Modelizar en las clases de ciencias Natalia Jiménez Tenorio, Lourdes Aragón, María del Mar Aragón Méndez, José María Oliva, 2022-06-17 Este libro está orientado, principalmente, a profesores de ciencias, pero también a estudiantes de profesorado de Educación Primaria y Secundaria. Con él, el lector podrá aproximarse a los enfoques de enseñanza basados en modelos, donde encontrará una valiosa ayuda para implementar en el aula este tipo de planteamientos. Sin descartar la importancia de que los estudiantes aprendan las definiciones, leyes y teorías de la ciencia, y de que sean capaces de resolver ejercicios y problemas numéricos, los autores de esta obra consideran que aprender ciencias debe ir mucho más allá. Así, defienden la necesidad de implicar al alumnado en la formulación de ideas que den sentido al mundo en el que viven, en lugar de actuar como consumidores pasivos de los contenidos escolares. Para ello, se proponen actividades y recursos que estimulan la curiosidad y la creatividad, planteando recursos como analogías, experimentos mentales, simulaciones por ordenador, etc. Todo ello no solo desde un plano teórico, sino también de forma aplicada y ejemplificada mediante secuencias didácticas concretas que los autores han puesto a prueba en clases de ciencias. Se pretende, así, integrar la teoría y la práctica educativa, utilizando la modelización como instrumento y guía ante el gran reto de enseñar ciencias hoy.

Física y Química 1º Bachillerato FIDALGO SÁNCHEZ, JOSÉ ANTONIO, FERNÁNDEZ PÉREZ, MANUEL RAMÓN, 2016-01-01 Nuestra sociedad, en su dinamismo de progreso, precisa de personas muy formadas para integrarse en ella “de forma activa”. Y para ello “debe facilitar las herramientas precisas que le permitan afrontar ese futuro con garantía, participando en el desarrollo económico y social al que está ligada la capacidad científica e innovadora de la propia sociedad”. Esta trilogía “enseñanza-aprendizaje-enfoque de vida” debe ser abarcable por las materias de FÍSICA Y QUÍMICA. Por ello, este libro, tu amigo, está diseñado según los siguientes criterios: — Uso de un lenguaje serio y científico, al igual que ameno, fácilmente asequible para todo el alumnado. — Presentación de ejemplos “de vida diaria” para su estudio, investigación, enfoque y comprensión sencilla de la materia objeto de estudio. — Exposición razonada de teorías, leyes,

modelos, etc. aplicables a cada caso concreto de situaciones físicas o químicas, siempre relacionadas con la vida real. — Propuesta de cuestiones, ejercicios y problemas, explicados y resueltos, que ayuden a comprender las exposiciones teóricas correspondientes. — Propuesta de cuestiones y ejercicios, en orden de dificultad creciente, sin resolución explicada pero sí detallada, para que el alumno compruebe, como autoevaluación, su grado de aprendizaje. — Presentación de actividades complementarias, como trabajos de laboratorio, lecturas, consultas en medios informáticos, etc., que motiven un espíritu crítico e investigador. — Fomentar explícitamente hábitos de respeto hacia el medio ambiente, como riqueza natural que deberá ser herencia de quienes nos sucedan. — Fomentar actitudes de ahorro energético como garantía de un progreso de bienestar. Se ha dicho que la Ciencia responde “al saber” (¿qué?, ¿cómo?, ¿por qué?) y la Técnica a la “aplicación del saber” (¿para qué?). Actualmente esa dicotomía está llamada a desaparecer; por tal razón, este libro señala senderos de confluencia entre el “conocimiento de la naturaleza” y el “saber hacer del mundo de la técnica”.

El desarrollo del pensamiento científico-técnico en educación primaria Antonio De Pro Bueno, 2008 En los últimos tiempos los profesionales de la Educación Primaria en el área de ciencias se han dado cuenta de que las herramientas didácticas que utilizan no son suficientes para incentivar al alumnado en el aprendizaje de la materia. El presente libro expone las siguientes propuestas de enseñanza que se han llevado al aula: Jugando con los circuitos y la corriente eléctrica; ¿Cómo han enseñado los maestros las ciencias en la escuela a lo largo del siglo XX?; Jugando con la corriente eléctrica; Grafo de itinerarios didácticos Desde los cubitos de hielo a los seres vivos; Pensar, experimentar y comunicas en el aula de ciencias con soporte TIC en la Educación Infantil y Primaria; ¡Ahorremos energía!; ¡Agua Va!; Si quieres aprobar tienes que desayunar; Investigando la génesis de un bebé para enriquecer las concepciones del alumnado de primer ciclo de primaria; ¿Cómo preparar mis clases para trabajar con los niños sobre los materiales y sus propiedades?. Estas propuestas tienen la finalidad de aportar ideas, reflexiones, actividades, materiales, etc. a los profesores que les sirvan para su docencia.

Diarios de las estrellas Stanislaw Lem, 2021-10-28 Dividida en una primera parte de «Viajes» y una segunda de «Memorias», Diarios de las estrellas narra las sorprendentes peripecias del viajero estelar Ijon Tichy (también protagonista de Congreso de futurología) por otros mundos y civilizaciones. Con un enorme sentido del humor y un sutil dominio de la sátira, Stanislaw Lem hace una lúcida radiografía del antropocentrismo que domina nuestra sociedad. La ironía y sutileza que despliega sobre los más trascendentales temas filosóficos y los comportamientos y contradicciones del ser humano hacen de esta obra una de las más destacadas de este maestro de la ciencia ficción. www.lem.pl

El libro rojo de Jung Bernardo Nante, 2020-07-24 Esta obra de Bernardo Nante -quien estuvo a cargo de la edición castellana de El libro rojo- facilita y estimula la lectura de este misterioso texto, desentraña las claves que encierra y realiza un comentario integral a la luz de la cosmovisión junguiana y de sus fuentes. En su primera parte, presenta las ideas centrales de El libro rojo, su contexto en relación con los símbolos tradicionales que allí aparecen, realiza una lectura alquímica del mismo y una breve referencia a su legado en la obra junguiana. En su segunda parte el libro sintetiza y aclara las visiones y los comentarios principales de toda la obra, capítulo por capítulo, con el propósito de facilitar una visión de conjunto.
