Howard Pitler

The Common Core in Action Deborah J. Jesseman, 2015-06-19 This book addresses Common Core State Standard curriculum resources to assist the school librarian in collaborating with classroom teachers. Librarians are being asked to understand the Common Core State Standards (CCSS) and their implications to programming and instruction, as well as to collection development planning. Using lesson plans originally published in *School Library Monthly*, this title builds upon them, adding many additional plans that address CCSS issues. The plans will help you implement the standards and can also be used as stepping stones to facilitate planning conversations and collaboration with teachers to co-teach lessons correlated with the standards. The book begins with an overview of the CCSS—what they are, how are they different from the content standards, and what the implications are for schools where the state has adopted them, including what the CCSS mean for collection development. It then goes on to explore the opportunities the CCSS present for the school librarian, looking at how you can become a leader in employing the process. The majority of the book is devoted to reproducible lesson plans, organized by curricular area or topic and grade level for ease of use.

Infusing Technology in the K-5 Classroom Valerie Morrison, Stephanie Novak, Tim Vanderwerff, 2022-08-24 K-5 teachers will discover how to integrate the tech requirements found within today's academic standards into their everyday curriculum. Perhaps your district provides current technology development for staff on a regular basis and has instructional coaches to help teachers infuse technology into their curriculum to meet various academic standards. But in reality, most districts don't have this kind of support. In this book (the first in a two-book series), you'll learn how to shift your instructional practice and leverage technology to meet today's curriculum education standards for grades K-5. This book doesn't cover every K-5 national standard, but identifies the standards with a technology component and provides resources and lessons to help you teach those standards effectively. This book includes:

- Classroom-tested lesson ideas in English language arts, math, science and social studies mapped to ISTE and tech-related standards to support college- and career-readiness.
- Lists of technology-embedded college- and career-readiness standards for each grade level, along with practical ideas and up-to-date resources (apps, software and websites) that can be used in meeting these standards.
- Suggestions for addressing roadblocks to incorporating technology in the classroom.
- Ways to incorporate staff development and parental support at the school level.

Access to a companion website with information on the tools referenced in the text. With the implementation of these

strategies, you'll help your students become self-directed and critical readers, writers and thinkers so they're better prepared for the future!

Using Technology with Classroom Instruction that Works Howard Pitler, 2007 What kinds of technology will support particular learning tasks and objectives? And how does a teacher ensure that technology use will enhance instruction and not be a distraction or a disconnected add-on? You'll find the answers here. This book builds on the landmark Classroom instruction that works by linking each of the nine categories of effective instructional strategies with educational technology applications and resources ... Each strategy-focused chapter features cross-curricular examples, many drawn from actual lesson plans, projects, and products. In addition to stories of students learning through inquiry, collaborative projects, games, and other activities that make school exciting and meaningful, you'll find dozens of recommended resources along with expert guidance on planning technology-enhanced lessons aligned with national standards.

Language Power Margo Gottlieb, Mariana Castro, 2017-02-17 Because explicit language instruction serves ALL students Here, at last, is every K-8 teacher's playbook on the critical role academic language plays in content learning and student achievement. What exactly is so different? Margo Gottlieb and Mariana Castro distill the complexities of language learning into four key uses through which students can probe the interplay between language and content, and demonstrate their knowledge and understanding. It's as straight-forward as that. Best of all, Language Power is jam-packed with hands-on, replicable resources to help you seamlessly integrate academic language into your daily routines: targeted examples, activities, and templates. Along the way, you'll learn how to Identify, plan, assess, and implement academic language instruction using the Discuss, Argue, Recount, and Explain conceptual tool Utilize language within and across domains and content areas Apply the inquiry cycle to the theme of academic language use Expand stakeholders to include students other families No matter who your students are, no matter which discipline you teach, the research reads the same: school achievement depends upon effective communication. Read Language Power, implement its resources, and soon see for yourself what a powerful tool language is in realizing this goal. This thought-provoking and very practical book will be welcomed by all educators who are striving to provide a more equitable curriculum for students. As Gottlieb and Castro suggest, this endeavor requires classroom teachers to think critically about the language they use with students, and develop the knowledge and skills to provide students with explicit and well-planned support for the development of academic language. Language Power will assist educators to make these endeavors a reality. Pauline Gibbons, Author of Scaffolding Language, Scaffolding Learning, Second Edition

A Tour of the Human Body Jennifer Berne, 2024-05-07 This picture book for young readers is a tour of the human body revealing the wonders of how it all works — with some astonishing numbers and fascinating facts along the way. From our eyes to our toes, kids will find out what makes the human body tick in this engaging STEM nonfiction book. They'll discover

that our hearts beat 100,000 times a day, which equals 36 MILLION times a year. And that our tongue's 8,000 taste buds can detect only 5 flavors. And that we have 60,000 miles of blood vessels, enough to circle the world more than twice! Noted children's author Jennifer Berne shares these remarkable facts and numbers alongside vivid informative illustrations by Dawn DeVries Sokol, resulting in a book that will transport kids on an entertainingly educational journey.

Differentiating Instruction for Gifted Learners Christine L. Weber, Wendy A. Behrens, Cecelia Boswell, 2021-09-03

Differentiating Instruction for Gifted Learners allows educators and stakeholders to examine issues related to differentiating curriculum and instruction in a variety of contexts. The case studies in this rich resource analyze various differentiation strategies and their benefits to promote classrooms where every student belongs, every student is valued, and every student is nurtured. The cases facilitate conversations about children and their unique needs by situating learning in authentic and meaningful contexts, with the goal of helping educators improve services and programs for gifted and talented students. Things to Consider guide the reader's thinking without imparting an explicit action, recommendation, or solution. Discussion questions, activities, extensions, and suggestions for additional readings support the standards of excellence set forth in the revised NAGC-CEC Teacher Preparation Standards in Gifted and Talented Education and the NAGC-CEC Advanced Standards in Gifted Education Teacher Preparation.

In the Shadow of the Cross Charles L. Bailey Jr., 2007-01-15 Charles L. Bailey, Jr. and his book *In the Shadow of the Cross* are in the 2015 Sundance Film Festival's movie *Call Me Lucky* about Barry Crimmins by Bobcat Goldthwait. Here is a link to the Festival: <http://www.callmeluckymovie.com/> In a matter of seconds, author Charles L. Bailey, Jr.'s, childhood innocence was destroyed. At the tender age of ten, Bailey became a victim of continuous sexual abuse by his family's Roman Catholic priest. *In the Shadow of the Cross: The True Account of My Childhood Sexual and Ritual Abuse at the Hands of a Roman Catholic Priest* details Bailey's personal journey of recovery. With candid and shocking details, Bailey reveals how his ill-treatment forever destroyed his innocence and robbed him of identity and faith. Bailey also explains how family and friends were impacted by the tragedy, how his development from child to adult was full of pitfalls, and how he struggled with issues of intimacy. But there is also hope in Bailey's story. Through his work with support groups, such as SNAP, (Survivors Network of those Abused by Priests), individual counseling, and his renewed faith in God, Bailey has confronted his past and has become an advocate for those impacted by clergy sexual abuse. *In the Shadow of the Cross* shares his compelling true story and serves as a stark reminder of the haunting legacy of abuse in the church. Charles is an award winning author, winning Honorable Mention in the recently announced 2011 London Book Festival

Telling Time David A. Adler, 2021-01-05 A group of young space travelers can't wait for their pizza party later, but how many hours away is dinner? What are hours anyway? Readers follow along as a loveable crew of kid astronauts and their Martain friends go about their daily routine, exploring the differences between seconds, minutes, and hours; what A.M. and P.M. mean; and how to tell time on both digital and analog clocks. Ten seconds to liftoff! Are you ready? Veteran children's nonfiction author David Adler incorporates math concepts, such as addition and subtraction, into this fun narrative with problem-solving exercises for readers to tackle at their own pace. Edward Miller's vibrant cartoon art depicts the happy group of friends embarking on space walks, working together on projects, and settling in for bed. The sixteenth book in Adler and Miller's math picture book series, this title is perfect for enthusiastic learners or kids who may need a little extra support in mastering this essential life skill. A glossary explains time zones, daylight savings time, and more. An out-of-this-world STEM book.
