

Townships In South Africa

South African Democracy Education Trust

Economics of South African Townships Sandeep Mahajan, 2014-08-25 Countries everywhere are divided within into two distinct spatial realms: one urban, one rural. Classic models of development predict faster growth in the urban sector, causing rapid migration from rural areas to cities, lifting average incomes in both places. The situation in South Africa throws up an unconventional challenge. The country has symptoms of a spatial realm that is not not rural, not fully urban, lying somewhat in limbo. This is the realm of the country's townships and informal settlements (T&IS). In many ways, the townships and especially the informal settlements are similar to developing world slums, although never was a slum formed with as much central planning and purpose as were some of the larger South African townships. And yet, there is something distinct about the T&IS. For one thing, unlike most urban slums, most T&IS are geographically distant from urban economic centers. Exacerbated by the near absence of an affordable public transport system, this makes job seeking and other forms of economic integration prohibitively expensive. Motivated by their uniqueness and their special place in South African economic and social life, this study seeks to develop a systematic understanding of the structure of the township economy. What emerges is a rich information base on the migration patterns to T&IS, changes in their demographic profiles, their labor market characteristics, and their access to public and financial services. The study then look closely at Diepsloot, a large township in the Johannesburg Metropolitan Area, to bring out more vividly the economic realities and choices of township residents. Given the current dichotomous urban structure, modernizing the township economy and enabling its convergence with the much richer urban centers has the potential to unleash significant productivity gains. Breaking out of the current low-level equilibrium however will require a comprehensive and holistic policy agenda, with significant complementarities among the major policy reforms. While the study tells a rich and coherent story about development patterns in South African townships and points to some broad policy directions, its research and analysis will generally need to be deepened before being translated into direct policy action.

The Transformation of Townships in South Africa Susanna Godehart, 2006

Townships as Attraction Manfred Rolfes, Malte Steinbrink, Christina Uhl, 2009 Since the end of the Apartheid, international tourism in South Africa has increasingly gained importance for the national economy. The centre of this PKS issue's attention is a particular form of tourism: township tourism, i.e. guided tours to the residential areas of the black

population. About 300,000 tourists per year visit the townships of Cape Town. The tours are also called cultural, social, or reality tours. The different aspects of township tourism in Cape Town were the subject of a geographic field study, which was undertaken during a student research project of Potsdam University in 2007. The text presents the empirical results of the field study, and demonstrates how townships are constructed as spaces of tourism.--Publisher's description.

The Geography of South Africa Jasper Knight,Christian M. Rogerson,2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa. It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa, but also of relevance to other areas of the Global South. All chapters are original contributions, providing a state of the art research baseline on key themes in physical, human and environmental geography, and in understanding the changing geographical landscapes of modern South Africa. These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world, including issues of sustainable development and growth in the Global South.

South Africa Study Commission on U.S. Policy toward Southern Africa (U.S.),United States. Study Commission on US Policy Toward Southern Africa,Study Commission on U.S. Policy toward Southern Africa (U.S.),1981-01-01 Examines the history, politics, and social problems of South Africa and suggests five objectives for U.S. policy toward that nation

Relanguaging Language from a South African Township School Lara-Stephanie Krause-Alzaidi,2021-12-20 Using data from a long-term ethnographic study of English language classrooms in a South African township, this book highlights linguistic expertise in a setting where it is not usually expected or sought. Rather than being 'peripheral and unskilled', South African township teachers and learners emerge as skilled (re)languagers central to the workings of South African education, and to our understanding of how language classrooms work. This book foregrounds the heterogeneity, flexibility and creativity of day-to-day language practices that African urban spaces are known for, and conceptualises language teaching not as a progression from one fixed language to another, but as a circular sorting process between linguistic heterogeneity (languaging) and homogeneity (a standard language).

"Township economies": Uses, meanings and key debates in the Gauteng context Mamokete Modiba, This paper presents multiple meanings of 'township economies' and the implications of key debates around framing township economic development. Overlaps in various national and provincial government strategies have included government procurement in townships, settlement upgrading, promoting entrepreneurship and creating a conducive regulatory environment for productivity. These efforts notwithstanding, the paper points out the need to include township development within broader national policy and encourages discussion on important concerns such as bringing jobs to people or people to jobs.

Cities of Gold, Townships of Coal Patrick Bond,2000 After apartheid was dismantled, South Africa's townships anticipated a peace and development dividend. But as the ANC begins its second term in office (1999-2004), the cities have

degenerated further into impoverished, polluted, under-serviced, zones of blight and despair. Indeed, in many respects, the townships were worse off than when the ANC took power. In this collection of essays, the author argues that the ANC's adoption of free-market economic and social policies is at the root of these problems and can be blamed for S Africa's uneven urban development.

Township Politics: Civic Struggles for a New South Africa Mzwanele Mayekiso, 2023-02-24 This insider's account of an extraordinary period of national political transition is also a primer on a new radical philosophy, the street-smart Marxism that developed in South Africa's sprawling townships between 1985 and 1995 and rendered them ungovernable for the apartheid state. Mzwanele Mayekiso, a young leader of the "civics"—as South Africa's popular community organizations are called—spent almost three years in prison as a result of the civics' militant organizing. Here, he interlaces his personal story with caustic assessments of apartheid's hand-picked township leaders, with rebuttals of armchair academics, and with impassioned but self-critical analyses of the civics' struggles and tactics. He ends with a vision of an international urban social movement that, he argues, must be a crucial component of any emancipatory project.

Art of the South African Townships Gavin Younge, 1988 Brilliantly illustrated, this is a unique record of the renaissance of black South African art, focusing on the extraordinary flowering of township art in the 1980s.

The Moral Ecology of South Africa's Township Youth S. Swartz, 2009-11-23 This book provides an engaging account of the moral lives of young black South Africans once the struggle against apartheid ended and took away their object of political resistance. It shows how partial-parenting, partial-schooling, and pervasive poverty contributes to how a group of young people construct right and wrong and what rules govern their behavior.

The Road to Democracy in South Africa: 1970-1980 South African Democracy Education Trust, 2004 v. 3: The third volume in the series examines the role of anti-apartheid movements around the world. The global anti-apartheid movement was very successful in creating awareness of the liberation struggle in South Africa, and in contributing to the downfall of the apartheid government. This volume, in 2 parts, brings together analyses which in the main are written by activist scholars with deep roots in the movements and organizations they are writing about.

The South African Township Annual, 1993

Urban Tourism in the Global South Christian M. Rogerson, Jayne M. Rogerson, 2021-07-13 This book examines and addresses the particular character of urban tourism occurring in the global South. It presents research essays on tourism in urban areas of South Africa, a country which is associated with big 5 nature tourism but where urban areas are also major tourism destinations. The book contextualizes urban tourism in South Africa as part of 'the other half of urban tourism', an overlooked but energetic scholarship which is emerging on urban places in the global South. The volume moves to present a collection of original material variously on national perspectives on urban tourism following by a cluster of city level perspectives. The last three contributions turn to the role of tourism in small towns, the bottom rung in the urban settlement system. Issues of concern include gastronomic tourism, VFR travel, airports, climate change, AirBnb and creative tourism. Finally, as COVID-19 is potentially a defining historical moment for urban tourism, the volume incorporates historical research perspectives in order to address the overwhelming 'present-mindedness' of mainstream urban tourism writings. The book highlights the challenges and opportunities for tourism development in the environment of the urban global South and is relevant to scholars of both tourism and urban studies as well as researchers in development studies.
