Juan Saldarriaga

Hidráulica de tuberías Juan Saldarriaga,2019-10-25 El manejo sostenible y sustentable del agua, la eficiencia en su uso, su transporte y su conservación, se ha convertido en temas estratégicos para la sociedad actual, en particular en los grandes centros urbanos donde los problemas de escasez de agua y contaminación de las fuentes se han vuelto críticos. También en el uso agrícola de este recurso, donde los riegos representan alrededor del 70% del consumo humano de agua, es un problema que debe ser enfrentado por la ingeniería. El propósito de hidráulica de tuberías: abastecimiento de agua, redes, riegos es, entonces, apoyar la labor de los ingenieros encargados del manejo de los recursos hídricos, facilitando los procesos de diseño, operación y mantenimiento de sistemas de tuberías. Para esto, el texto está centrado en el uso intensivo de las tecnologías de información y en la optimización de diseños con base en heurísticas de inteligencia artificial y en técnicas más tradicionales de investigación operacional como la programación lineal entera y la programación lineal, todo esto encaminado a un uso racional del agua. Es un texto útil para profesionales y estudiantes que trabajan en sistemas de agua potable, de drenaje urbano, de riego y en general, en transporte de fluidos.

La prevención de la legionella y el control de la calidad del agua en entornos hospitalarios. Diseño, dimensionado y mantenimiento de las instalaciones de agua para edificios sanitarios. Los usos y el tratamiento del agua. Prevención de la legionella. Xavier Novoa Conde,2021-07-31 Esta libro pretende recopilar los aspectos más relevantes relacionados con la calidad del agua y la prevención de la Legionella que nos podemos encontrar en la actualidad en el ámbito de la Unión Europea, aunque particularizada para las exigencias legales existentes en España. El contenido del libro será aplicable desde a las instalaciones más simples como pueden ser las propias de las viviendas unifamiliares, hasta a las industrias y edificios más complejos que puedan tener los requerimientos de fiabilidad de funcionamiento y/o una calidad del agua más estrictos y exigentes. Como ejemplo de edificios más complejos desde el punto de vista de los requerimientos de de la calidad del agua y prevención de la legionella usaremos como modelo los hospitales con superficies útiles superiores a 50.000m² o con una capacidad para más de 300 camas. A modo de síntesis, respecto a la calidad del agua y prevención de la legionella, en un hospital nos encontraremos con casi todas las casuísticas propias de uso del agua por los seres humanos, sea este el uso doméstico o aquellos usos industriales más exigentes. Esto es así porque los hospitales son como una pequeña ciudad comprimida en un espacio reducido, que en ocasiones contienen en una parcela con un único edificio casi todos los usos

posibles del agua. Es por ello que en el texto aparecerán numerosas referencias al uso del agua en edificios hospitalarios. Respecto a los tratamientos y usos del agua únicamente dejaremos fuera del ámbito de este libro el tratamiento de las aguas residuales.

Hidráulica de tuberías está compuesto por diez capítulos que pueden ser leídos en secuencias diferentes según el tipo de trabajo de diseño u operación que se quiera resolver. Material web: el libro cuenta con las versiones académicas de los programas de redes y riegos, 16 programas de sistemas de tuberías, 5 hojas electrónicas y enlaces con grupos de discusión sobre material relacionado. Adicionalmente, los docentes universitarios pueden adquirir el acceso a más de 1500 diapositivas, a la actualización de artículos junto con bases de datos referentes a la hidráulica de tuberías y a las clases virtuales del autor. Si es un profesional o un estudiante que trabaja en sistemas de agua potable, de drenaje urbano, de riego y, en general, en transporte de fluidos, tiene a su alcance el libro que, sin duda, le facilitará su trabajo en el manejo de los recursos hídricos: Hidráulica de tuberías.

Industrias, empresarios y jerarquías administrativas Luis Aurelio Ordóñez Burbano, 2024-07-04 El presente libro versa

sobre el desarrollo de siete empresas caleñas y resalta el papel de los empresarios y las jerarquías administrativas durante el período comprendido entre la segunda mitad del siglo XX y las primeras décadas del siglo XXI. En buena parte es la continuación del estudio realizado sobre la gestión de un grupo de empresarios pioneros en Cali durante el período 1915-1945, quienes aprovecharon las oportunidades surgidas por la conformación de las redes mercantiles, la gestación del mercado interno y las políticas proteccionistas del Estado para crear industrias manufactureras, dando muestras de una nueva mentalidad de ruptura con los atavismos de corte premoderno prevalecientes en Cali, la región y el país. Después de exponer algunas consideraciones de orden teórico y conceptual, que orientan el trabajo histórico, se toma como referencia, a partir de la segunda posguerra (1945), la iniciación de una segunda fase de industrialización caracterizada por la llegada de la inversión extranjera a la industria manufacturera, prioritariamente al eje metropolitano Cali-Yumbo; la creación de nuevas empresas por parte del Estado, como es el caso de Ecopetrol, y la producción de bienes intermedios. En este contexto continúa el desenvolvimiento de algunas de las empresas fundadas en Cali a principios del siglo XX, en proceso de modernización e internacionalización, y se crean algunas nuevas, como Fanalca, Tecnoquímicas y Coomeva. En general, se describe el desenvolvimiento de las empresas que continúan a lo largo del tiempo, en el marco de las políticas económicas del Estado, en particular del proteccionismo, vigente hasta comienzo de la década de 1990, y del proceso de terciarización y desindustrialización en las décadas de 1970 y 1980, que se prolonga hasta las primeras décadas del siglo XXI.

A lo largo de la obra los autores van desgranando las claves precisas para tratar todos

y cada uno de los aspectos necesarios para lograr el éxito del proyecto. Estructurado en 4 bloques de contenido, se abordan de manera progresiva e integradora el funcionamiento de las redes de abastecimiento y distribución de agua, partiendo del ciclo integral del agua y hasta llegar a la normativa de aplicación. A continuación se trata el funcionamiento de las redes de saneamiento y, seguidamente, se pone el foco en la interpretación de proyectos de instalaciones de abastecimiento y distribución de agua y saneamiento, para finalmente dedicar un espacio al replanteo de la obra de una red de abastecimiento y distribución de agua y saneamiento. Fotos, diagramas, esquemas, fórmulas, planos y tablas aportan dinamismo y un enfoque dinámico y eminentemente práctico a la obra. Además, se sigue fielmente el contenido curricular previsto para la Unidad Formativa UF 0999, titulada Proyecto de instalación de redes de abastecimiento y distribución de agua y saneamiento, que forma parte del módulo formativo MF 0838_3 Redes e instalaciones de abastecimiento y distribución de agua y saneamiento, a su vez integrado en el certificado de profesionalidad ENAA0109 Organización y control del montaje y mantenimiento de redes e instalaciones de agua y saneamiento, regulado por RD 643/2011, de 9 de mayo.
