*DRM, a Design Research Methodology* Lucienne T.M. Blessing,Amaresh Chakrabarti,2009-06-13 The initial motivator for the development of DRM, a Design Research Methodology, and the subsequent writing of this book was our frustration about the lack of a common terminology, benchmarked research methods, and above all, a common research methodology in design. A shared view of the goals and framework for doing design research was missing. Design is a multidisciplinary activity occurring in multiple application areas and involving multiple stakeholders. As a consequence, design research emerges in a variety of disciplines for a variety of applications with a variety of subjects. This makes it particularly difficult to review its literature, relate various pieces of work, find common ground, and validate and share results that are so essential for sustained progress in a research community. Above all, design research needs to be successful not only in an academic sense, but also in a practical sense. How could we help the community develop knowledge that is both academically and practically worthwhile? Each of us had our individual ideas of how this situation could be improved. Lucienne Blessing, while finishing her thesis that involved studying and improving the design process, developed valuable insights about the importance and relationship of empirical studies in developing and evaluating these improvements. Amaresh Chakrabarti, while finishing his thesis on developing and evaluating computational tools for improving products, had developed valuable insights about integrating and improving the processes of building and evaluating tools.

*Modern Concepts of the Theory of the Firm* Günter Fandel,Uschi Backes-Gellner,Manfred Schlüter,Joerg E. Staufenbiel,2013-03-09 This volume contains the results of the International Conference on Managing Enterprises of the New Economy by Modern Concepts of the Theory of the Firm, which took place in Hagen from 12-14 December 2002. The conference was organised jointly by the FernUniversität in Hagen and the Erich-Gutenberg-Arbeitsgemeinschaft in Cologne. The Deutsche Forschungsgemeinschaft, the FernUniversität and the Märkische Bank in Hagen provided generous financial support for the conference, and in fact enabled its implementation and the publication of this record of the proceedings. We would like to express our gratitude to the sponsors for their support. The aim of the conference was the exchange of academic experience with regard to new approaches to, and extensions of, the theory of the firm that can be used to solve the problems of New Economy companies. The starting point was the practical experience that the owners and managers of

New Economy companies paid too little attention to functional company controls in the general euphoria regarding future economic trends and that because of this the enterprises got into difficulties or were faced with threats to their survival. These control deficits were detected equally in the areas of sales, production, personnel planning, organisation and finance and in the arrangement of management and control structures. Deficiencies in company evaluations and accounting led to investors experiencing severe disappointment on the loss of their invested capital.

Consumer Behavior Knowledge for Effective Sports and Event Marketing Lynn R. Kahle, Angeline G. Close, 2011-01-07

The growing complexity and importance of sports and event marketing has pushed scholars and practitioners to apply sophisticated marketing thinking and applications to these topics. This book deals with the professional development in the sense that sports marketing can be viewed as an application of consumer behavior research. Readers will learn about new opportunities in using consumer behavior knowledge effectively in the areas of: influencing behaviors in society and sports; building relationships with consumers through sports and events; and providing services to consumers through sport and event sponsorships. This book, by a superb group of authors, includes comprehensive reviews, innovative conceptual pieces, empirical research and rigorous attention to data.

**Small Firms and Economic Development in Developed and Transition Economies** David A. Kirby, Anna

Watson, 2017-11-22 This title was first published in 2003. Since the late 1970s there has been considerable interest in the role of small firms in economic development in general and employment generation in particular. Throughout the developed world, governments have introduced a range of measures to encourage small firm growth and development in an attempt to stimulate economic growth, generate employment and foster innovation. Though not all measures have been successful many policies have transferred to the transition economies of Central and Eastern Europe where, since 1989, small firm growth and development has achieved considerable importance in economic restructuring. Accordingly, this volume presents the leading research on the role of small firms in economic development and employment generation in both transition and developed countries. Setting itself in a wider theoretical context, the book also considers the implications for both policy and theory and suggests directions for future research.

*Handbook of Research on Learning Outcomes and Opportunities in the Digital Age* Wang, Viktor, 2015-12-22 Education and learning opportunities bring about the potential for individual and national advancement. As learners move away from traditional scholarly media and toward technology-based education, students gain an advantage with technology in learning about their world and how to interact with modern society. The Handbook of Research on Learning Outcomes and Opportunities in the Digital Age provides expert research relating to recent technological advancements, technology and learning assessments, and the effects of technology on learning environments, making it a crucial reference source for researchers, scholars, and professors in various fields.

**Continuous Improvement Practice in Local Government** Matthew Pepper, Oriana Milani Price, Arun Elias, 2021-11-29

Local government plays a critical role in the provision of governance, infrastructure, and services for local communities. Over the past 30 years this sector has undergone significant reforms because of various superordinate governments policy changes. Continuous improvement and quality programs have been a common tactical response undertaken by various local government organisations to remain sustainable and to continue to deliver value to their local communities. These tactical responses have had varying levels of success. This book seeks to go beyond a tactical focus and uncover the kinds of continuous improvement practices that are enacted in various local government contexts. A focus on practices enables practitioners and researchers alike to gain insights that to go beyond approaches which privilege the application of CI tools over the contextualisation of CI programs. Contextualisation affords the insightful deployment of programs that are specific to the needs and dynamics of local communities and operations. The cases presented share insights on aspects of CI including: embedding performance measurement; harnessing learning; contextualising CI activities to support the ongoing sustainability of these practices. Researchers and practitioners alike can draw benefit from the grounded industry base experiences and insights shared in the book.

**Getting There by Design** Kenneth Allinson, 2012-09-11 There was military project management. There was construction project management. Then there was business project management, a tool described as 'the wave of the future'. Where are architects in all this, professionals whose work has always been project-driven? There is design management in engineering, product design, graphics, packaging, management theory and even in politics. Construction consultants talk about managing design. When are architects going to become committed to managing design? *Getting There by Design* adopts an architect's view to design and project management. It sets out the fundamental principles and shows how they are applied, dealing with these two topics as one indivisible subject. '*Getting There by Design*' demonstrates how to: - make project efforts goal-oriented - set up a planning and monitoring basis to architectural projects - put the architect's fee calculus on a rationale basis - diagnose your firm's practice culture - develop successful teams Put your practice onto a more effective basis. Ken Allinson is an architect in private practice and principal of 'Architectural Dialogue'. He also teaches design studio and lectures on design and project management. He was formerly an associate at DEGW London and the Terry Farrell Partnership. He has practice experience in Europe, the USA and Japan and is the author of '*The Wild Card of Design*' (1993).

Mistakes, Errors and Failures across Cultures Elisabeth Vanderheiden, Claude-Hélène Mayer, 2020-03-14 This volume provides comprehensible, strength-based perspectives on contemporary research and practice related to navigating mistakes, errors and failures across cultures. It addresses these concepts across cultural contexts and explores any or all of these three concepts from a positive psychology or positive organisational perspective, highlighting their potential as resources. The volume further discusses the consequences of errors and failures at individual, organisational and societal levels, ranging from severe personal problems to organisational and collective crises, perspectives how those can be turned into opportunities for contingent and sustainable improvement processes. The book shows that there are significant cultural differences in the understanding, interpretation and handling of errors and failures. This volume provides practical guidance for transcultural understanding of mistakes, errors and failure through new models, ideas for self-reflection, therapeutic and counselling interventions and organisational change management processes. This book is a must for researchers and practitioners working on mistakes, errors and failures across cultures and disciplines!

Tools for Project Management, Workshops and Consulting Nicolai Andler, 2012-01-13 Typically today's tasks in management and consulting include project management, running workshops and strategic work - all complex activities, which require a multitude of skills and competencies. This standard work, which is also well accepted amongst consultants, gives you a reference or cookbook-style access to the most important tools, including a rating of each tool in terms of applicability, ease of use and effectiveness. In his book, Nicolai Andler presents about 120 of such tools, grouped into task-specific categories entitled Define Situation, Gather Information, Information Consolidation, Creativity, Goal Setting, Organisational Analysis, Technical Analysis, Strategic Analysis, Decision Making, and Project Management. Checklists and application scenarios further enhance the use of this toolbox. Information provided by this book is: - comprehensive and sufficiently wide in scope, combined with a practical level of detail without being too academic - reliable and proven in numerous real implemented cases - easy to apply due to many different search options, checklists, application scenarios and guiding instructions. Written by a professional consultant, business analyst and business coach, this book is a unique reference work and guide for those wanting to learn about or who are active in the fields of consulting, project management

and problem solving in general. This book is of the kind you always wanted but didn't think would or could ever exist: the universal field theory of problem solving. Tom Sommerlatte.

**Software Process Improvement** T. Dingsøyr,2005-01-11 This was the first year that the European Software Process Improvement Conference - EuroSPI - had a separate research track with its own proceedings.The EuroSPI conference is in its eleventh year, and has become the main meeting place in Europe for the software industry and academia to discuss software process improvement. The conference deals with software process improvement in a broad sense, investigating organizational issues as well as methods and tools for software process improvement. Euro SPI is an initiative financed by a consortium of Nordic research centers and user networks(SINTEF, DELTA and STTF), ASQF, a German quality assurance association, and ISCN in Ireland, the coordinating network partner. The research papers describe innovative and significant work in software process improvement, which is relevant to the software industry. The papers are readable for a scientific and industrial audience, and support claims with appropriately described evidence or references to relevant literature. Thirty-one papers were submitted in this year's research track, and each paper was sent to three or four members of the program committee or additional reviewers. Papers were evaluated according to originality, significance of the contribution, quality of the written and graphical presentation, research method applied, and appropriateness of comparison to relevant research and literature. Almost 100 reviews were received and 18 papers were selected for presentation in the research track, giving a rejection rate of 42%. Many high-quality submissions had to be rejected because of limited space in the conference program. The selected papers cover a wide area in software process improvement, from - proving agile development methods, techniques for software process improvement,and knowledge management in software companies to effort estimation and global software development

*Project Managers' Leadership Styles in Information Technology Sector of Pakistan* Muhammad Khaliq Ahmad,Abu Bakar Abdul Hamid,Sazali ABD Wahab,2021-10-26 In these competitive and turbulent times, project organisations face severe challenges. Despite the advancement of project management tools and techniques, the rate of project failure exceeds that of success. Regardless of calls for further empirical studies on the role of project leadership, researchers struggle to find the best leadership styles for project success. New digital transformation phenomena have forced organisations to offer more autonomy and decision-making authority to those at lower hierarchical levels. In this scenario, top management support plays a facilitator role. To the best of the researcher's knowledge, no past studies have examined these critical project

success factors simultaneously in a project environment. Embedded in the theories of contingency, goal-setting, and social cognition, this study raised the hypothesis that project managers' leadership styles impact project success via the mediation of goal clarity, empowerment, and self-leadership as well as the moderation of top management support. Data was collected by administering a cross-sectional survey to 289 project organisations in the IT sector. The results demonstrated that project managers' transactional leadership style does not impact project success because goal clarity has an insignificant association with project success. However, the transformational leadership style showed a positive impact on project success because empowerment significantly and positively relates to project success. The project manager's empowering leadership style was also found to positively influence project success through followers' self-leadership. Additionally, top management support revealed a significant moderating role by strengthening the relationship between empowerment and project success. This study successfully fills theoretical gaps by introducing a novel moderated mediation model. The findings also offer useful insights to practitioners by revealing that project managers' transformational leadership and empowering leadership are needed to enhance and encourage employee empowerment and self-leadership, and ultimately secure project success.

**World Antimicrobial Awareness Week** Vera Manageiro, Marwan Osman, Issmat I. Kassem, Dalal Hammoudi

Halat, 2025-01-21 World Antimicrobial Week was established at the 68th World Health Assembly in 2015, and it takes place from the 18th to the 24th of November every year. Its key aim is to improve the awareness of antimicrobial resistance, highlighting the importance of education and communication. Antimicrobial resistance is caused by bacteria, viruses, fungi, and parasites not responding to current medicines (such as antibiotics, antivirals, antifungals and antiparasitics), leading to a higher risk of severe illness and death. This has a huge economic impact, leading to around five million deaths yearly, increased health expenditure, and, ultimately, inequalities. Several causes lead to antimicrobial resistance, varying from region to region. These include the misdiagnosis of certain diseases with the consequent misuse of antimicrobials; the overuse of antimicrobials in humans, animals, and crops; or the lack of hygiene, sanitation and access to water. Due to these different causes, antimicrobial resistance needs a multisectoral response, focusing on the specific circumstances of each country and region.

**Growth from Chaos** Michael Pettus, 2003-12-30 We live in a chaotic world. Some of the chaos results from poor

decision-making (e.g., Enron, Arthur Andersen, WorldCom). Yet other aspects of chaos (war, terrorist attacks, etc.) are beyond a firm's control. This book demonstrates that firm growth is more dependent on how a firm develops its resource base over time. Examining actual firm growth in several industries, with a focus on trucking, the airline industry, and the North American railroad industry, Pettus shows that a specific resource sequencing leads to higher firm growth than other

sequencing patterns. This sequencing pattern is similar across transportation industries, and the pattern may be applicable to other industries. Decisions that firms make with respect to how resources are developed must balance the need for growth in the current time period with the need for growth over the long term. Firms can build sustainable growth by developing resources in a specific sequence; in essence, firms have control over their growth, even when confronted with ever-changing environmental conditions.

Innovation Through Information Systems Frederik Ahlemann, Reinhard Schütte, Stefan Stieglitz, 2021-10-28 This book presents the current state of research in information systems and digital transformation. Due to the global trend of digitalization and the impact of the Covid 19 pandemic, the need for innovative, high-quality research on information systems is higher than ever. In this context, the book covers a wide range of topics, such as digital innovation, business analytics, artificial intelligence, and IT strategy, which affect companies, individuals, and societies. This volume gathers the revised and peer-reviewed papers on the topic Management presented at the International Conference on Information Systems, held at the University of Duisburg-Essen in 2021.
