Anatomy of the Horse George Stubbs,2005

Clinical Anatomy of the Horse Hilary Mary Clayton,Peter F. Flood,Diana S. Rosenstein,2005 This new volume is the first photographic atlas of equine anatomy to integrate illustrations of prepared specimens with correlative images of the same structures as visualised by each of the commonly used imaging modalities; radiography, ultrasound and endoscopy. Additional images illustrate the position and orientation of these structures in the living animal, as they would most commonly be encountered, either in the course of a physical examination (for example the viscera or reproductive organs in a rectal or vaginal examination), or as they present in the prone animal, during a surgical procedure. Thus the atlas has a true utility for the practitioner as well as the student. The only atlas of anatomy that combines illustrations of gross anatomy with radiographic images, ultrasound and endoscopic views to give a complete appreciation of all the structures Preparations of cross-sectional anatomy aid interpretation of diagnostic imaging such as ultrasonography All photographs are of fresh material, or living animals, rather than preserved specimens, to demonstrate the appearance of tissues in the living animal,

or at post mortem autopsy Includes annotated images to illustrate the position and orientation of structures in situ, in the living animal, as they will be encountered in carrying out a physical examination or surgical procedure Colour photographs, with correlative radiographs are selected according to clinical importance

The Anatomy of the Horse George Stubbs,1965

The Anatomy of the Horse John McFadyean,2015-06-14 Excerpt from The Anatomy of the Horse: A Dissection Guide The want of an illustrated topographical treatise on equine anatomy has, in the experience of the author, been a great barrier to the efficient teaching of that all-important branch of veterinary education. In this work the object of the author has been to place in the hands of veterinary students a dissection guide comparable, in some degree, to the text-books at the service of the practical student of human anatomy. The order of dissection laid down is that which the author has found to be most advantageous, and he has attempted to describe with accuracy and moderate fulness the different organs as they present themselves in that order. This description is largely supplemented by the illustrations, which are so complete that almost every organ in the body is delineated. The majority of these illustrations are original, being faithful portraits of the author's own dissections. It is hoped that they will prove useful to the student, in the first place, as a plan and a guide in his work, and, secondly, as a means by which he may afterwards summon up a mental picture of his own dissections. While the book is specially designed for use in the dissecting-room, the author ventures to hope that it may also be serviceable to the veterinary practitioner. Special care has been taken in portraying those regions that possess a surgical interest, and the illustrations furnish a ready means by which the surgeon may refresh his memory regarding the objects to be met in the course of an operation. The greater number of the original drawings were made in the dissecting-room of the Royal (Dick's) Veterinary College, by Mr J. Bayne, artist; a few were executed by Mr R. S. Reid, artist; and the remainder by Mr R. H. Potts, veterinary student. A few of the illustrations were directly drawn on stone by Messrs W. & A. K. Johnston. To all of these gentlemen the author is much indebted for the clearness and fidelity with which they have delineated the various objects. The source of each of the borrowed illustrations is duly acknowledged elsewhere, but the author is constrained to make

special mention of those from the systematic text-book of Professor Chauveau, who generously consented to the copying of as many of his figures as might be thought useful for this work. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work.
