Forensic Interventions for Therapy and Rehabilitation Belinda Winder, Nicholas Blagden, Laura Hamilton, Simon Scott, 2021-12-22 Forensic Interventions for Therapy and Rehabilitation: Case Studies and Analysis provides an up-to-date overview of the latest therapeutic ideas being used for forensic service users and prisoners in both custodial and community settings. The field of forensic work is increasingly being recognised for its importance, both in terms of the value of the work in reducing reoffending and in terms of the salience given to it by the media, the public, and politically. This text reflects current policy and practice, and furthermore considers the therapeutic encounter from a broad perspective, which incorporates individual, group, and systemic interventions. Forensic Interventions for Therapy and Rehabilitation includes chapters on a range of therapeutic models, issues pertinent to specific groups of people with criminal convictions, and discussion on the various contexts in which interventions take place. Forensic Interventions for Therapy and Rehabilitation is essential reading for all students of Forensic or Clinical Psychology, as well as practitioners in the field.

Understanding the Personality Inventory for DSM-5 (PID-5) Kristian E. Markon, Ph.D. ,Andrea Fossati, Ph.D., Antonella Somma, Ph.D., Robert Krueger, Ph.D. , 2024-01-29 Released in 2012 as a free, easily administered measure of personality pathology domains and traits as described in the DSM-5 Alternative Model for Personality Disorders, the Personality Inventory for DSM-5 (PID-5) has spawned interest--and a considerable amount of research--since its publication. Rather than trying to match an individual's personal experience to preestablished diagnostic categories, use of the PID-5 in assessment calls for something of a paradigm shift--developing a profile unique to each patient and their experiences and behaviors. This new book delves into the background of the PID-5 and provides clinical and research guidance on its application. After reviewing the blossoming literature on the PID-5 and evidence for its use, the authors examine * The validity of the PID-5 in different populations, including adults, children, and non-U.S. populations * Special applications of the PID-5, including its relation to ICD-11 and use in forensic constructs * The relationship of the PID-5 with other measures, such as the Five Factor Model measures and the Personality Assessment Inventory * The role of the PID-5 in developing

tailored interventions and prevention strategies, both psychotherapeutic and pharmacological. Standout features of this guide include numerous and easily referenced tables throughout, clinical vignettes that help illustrate the PID-5 personality profiles, and an appendix with norms and scoring reference materials. Particularly useful for both clinical psychologists and research psychiatrists, Understanding the Personality Inventory for DSM-5 (PID-5) is a concise, convenient, and indispensable resource for all those interested in an individualized approach to the management and treatment of personality pathologies.

Already Doing It Michael Gill, 2015-03-27 Why is the sexuality of people with intellectual disabilities often deemed “risky” or “inappropriate” by teachers, parents, support staff, medical professionals, judges, and the media? Should sexual citizenship depend on IQ? Confronting such questions head-on, *Already Doing It* exposes the “sexual ableism” that denies the reality of individuals who, despite the restrictions they face, actively make decisions about their sexual lives. Tracing the history of efforts in the United States to limit the sexual freedoms of such persons—using methods such as forced sterilization, invasive birth control, and gender-segregated living arrangements—Michael Gill demonstrates that these widespread practices stemmed from dominant views of disabled sexuality, not least the notion that intellectually disabled women are excessively sexual and fertile while their male counterparts are sexually predatory. Analyzing legal discourses, sex education materials, and news stories going back to the 1970s, he shows, for example, that the intense focus on “stranger danger” in sex education for intellectually disabled individuals disregards their ability to independently choose activities and sexual partners—including nonheterosexual ones, who are frequently treated with heightened suspicion. He also examines ethical issues surrounding masturbation training that aims to regulate individuals’ sexual lives, challenges the perception that those whose sexuality is controlled (or rejected) should not reproduce, and proposes recognition of the right to become parents for adults with intellectual disabilities. A powerfully argued call for sexual and reproductive justice for people with intellectual disabilities, *Already Doing It* urges a shift away from the compulsion to manage “deviance” (better known today as harm

reduction) because the right to pleasure and intellectual disability are not mutually exclusive. In so doing, it represents a vital new contribution to the ongoing debate over who, in the United States, should be allowed to have sex, reproduce, marry, and raise children.

Visualization and Processing of Higher Order Descriptors for Multi-Valued Data Ingrid Hotz, Thomas Schultz, 2015-07-03 Modern imaging techniques and computational simulations yield complex multi-valued data that require higher-order mathematical descriptors. This book addresses topics of importance when dealing with such data, including frameworks for image processing, visualization and statistical analysis of higher-order descriptors. It also provides examples of the successful use of higher-order descriptors in specific applications and a glimpse of the next generation of diffusion MRI. To do so, it combines contributions on new developments, current challenges in this area and state-of-the-art surveys. Compared to the increasing importance of higher-order descriptors in a range of applications, tools for analysis and processing are still relatively hard to come by. Even though application areas such as medical imaging, fluid dynamics and structural mechanics are very different in nature they face many shared challenges. This book provides an interdisciplinary perspective on this topic with contributions from key researchers in disciplines ranging from visualization and image processing to applications. It is based on the 5th Dagstuhl seminar on Visualization and Processing of Higher Order Descriptors for Multi-Valued Data. This book will appeal to scientists who are working to develop new analysis methods in the areas of image processing and visualization, as well as those who work with applications that generate higher-order data or could benefit from higher-order models and are searching for novel analytical tools.

A wellspring of information for educational professionals, Comprehensive Evaluations provides models for writing diagnostic reports to accompany the tests most frequently administered in the evaluation of children, adolescents, and adults, including the BASC-2, KABC-II, WAIS-IV, WISC-IV, and WJ III. The reports reflect various disciplines within psychology and education, different theoretical perspectives and paradigms, and span a broad spectrum of disabilities. The diagnostic reports found within Comprehensive Evaluations will help: Expand your familiarity with widely used test instruments Enhance your understanding of the interpretation of test scores Improve your ability to tailor written reports to the purposes of the evaluation Translate assessment results into meaningful treatment recommendations Recognize the differences in what evaluators from various school districts, agencies, and private practices consider to be a comprehensive evaluation Appreciate how your theoretical perspective and choice of tests can influence diagnostic conclusions Determine a report writing style that meets your needs Comprehensive Evaluations deftly illustrates how thorough assessments help empirically pinpoint the reasons a student is struggling in school, which then allows an evaluator to select the most appropriate accommodations and interventions to help the student succeed.
