Summary of World Broadcasts British Broadcasting Corporation. Monitoring Service,1974-06

Understanding Leadership Robert M. McManus,Gamaliel Perruci,2019-12-09 Laozi, Marx, the Buddha, Ibsen, Machiavelli – these are just a few of the world’s great thinkers who have weighed in on the subject of leadership over the centuries. Yet the contemporary student of leadership often overlooks many of these names in favor of more recent theorists hailing from the social sciences. *Understanding Leadership: An Arts and Humanities Perspective* takes a different angle, employing the works of the great philosophers, authors, and artists found in world civilization and presenting an arts and humanities perspective on the study of leadership. The authors build their conceptual framework using their Five Components of Leadership Model, which recognizes the leader, the followers, the goal, the context, and the cultural values and norms that make up the leadership process. Supporting the text are a wealth of case studies that reflect on works such as Ayn Rand’s novella *Anthem*, Eugène Delacroix’s painting *Liberty Leading the People*, Charlie Chaplin’s film *Modern Times*, Athol Fugard’s play *Master Harold . . . and the boys*, Laozi’s poetic work *Dao De Jing*, and Antonín Dvořák’s *New World Symphony*. The authors also introduce studies from various world cultures to emphasize the role that cultural values and norms play in leadership. This illuminating framework promotes the multidimensional thinking that is necessary for understanding and problem-solving in a complex world. *Understanding Leadership: An Arts and Humanities Perspective* will be a valuable resource for both undergraduate and postgraduate leadership students, while leadership professionals will also appreciate the book’s unique liberal arts and cultural approach.

Cultural Factors Define Implementation Strategies Stanley Remple,2025-07-03 Strong business leadership built on a value-based foundation has the power to drive profit while improving the lives of business leaders, employees, and even those in the community. But a business leadership model must also reflect cultural context, which is why author Stanley Remple argues that a cookie-cutter, individualistic Western approach doesn’t serve the needs of Chinese business leaders. Enter *Leadership Wisdom for Businesses in China*, a powerful four-book series that examines value-based business leadership specifically within the Chinese cultural and social environment and offers a framework to promote individual and collective potential while creating a successful and competitive business. In Book Four, *Cultural Factors Define Implementation Strategies*, Remple delves deeper into the historic and cultural influences that led to the Western business leadership model;

why China's unique historic and cultural influences have created a need for its own business leadership strategy; and how this can be further developed. Factors explored include how the influence of Confucius, Daoism and Buddhism, Sun Yat-sen, and the Communist Party have impacted business leadership practice in China to prioritize collective interests, and the opportunities this presents. The book concludes with culturally supportable strategies for value-based leadership to ensure business success. Much more than a theoretical overview of business leadership, this series offers a roadmap and solid tools for developing both self-leadership and business leadership within a whole company. Supported by a Chinese project team consisting of researchers, educators, writers and editors, business leaders, and other stakeholders, this culturally relevant series has been written for both new and experienced business leaders and entrepreneurs, leadership consultants and trainers, and post-secondary leadership programs in China. However, stakeholders in the West will also find great value in this comprehensive exploration of value-based leadership. The other volumes in the Leadership Wisdom for Businesses in China* series are: • Book One I: Confronting the Business Leadership Crisis • Book Two: Developing a Value-Based Business • Book Three: Values Guide Decision-Making for Results A Mandarin version will soon be available from a Chinese Publisher
*Also available in Mandarin

Redefining Chinese Literature and Art Jixi Yuan,2019-02-04 This Key Concepts pivot discusses the significance of the ancient Chinese concept of xìng or 'Association' in defining Chinese civilization and thought through the centuries. An approach unique to literary creation in China, xìng highlights the importance Chinese civilization sets by the integration of intellect, emotion and will into a highly consistent concept across its personal and public spheres. The book explores how the concept has been a widely used creative technique even in the earliest collections of Chinese poems, using metaphor and symbolism to set the scene and indicate thoughts and emotions invested in the vehicle of metaphor, as well as its impact on Chinese literature and philosophy as a domain of multiple meanings in classical Chinese aesthetics.

Life-Practice Educology Lan Ye,2020-03-23 In Life-Practice Educology: A Contemporary Chinese Theory of Education Ye Lan presents the theory of a contemporary Chinese school of Educology. It consists of two main parts. The first part proposes a fully formulated view on Life-Practice School of Educology and expounds on current thinking in China that denies the independence of educology as a discipline. The second part explains both inherited and new understandings of the Life-Practice School of Educology, covering Chinese traditional culture and the current debate. It further refines the Chinese understanding of Education (jiaoyu 教育) as teaching the knowledge of nature and society, and cultivating a self-consciousness towards life.

On Sacred Grounds Thomas A. Wilson,2020-03-23 The sacred landscape of imperial China was dotted with Buddhist monasteries, Daoist temples, shrines to local deities, and the altars of the mandarin state. Prominent among the official shrines were the temples in every capital throughout the empire devoted to the veneration of Confucius. Twice a year members of the educated elite and officials in each area gathered to offer sacrifices to Confucius, his disciples, and the major scholars of the Confucian tradition. The worship of Confucius is one of the least understood aspects of Confucianism, even though the temple and the cult were highly visible signs of Confucianism's existence in imperial China. To many modern observers of traditional China, the temple cult is difficult to reconcile with the image of Confucianism as an ethical, humanistic, rational philosophy. The nine essays in this book are an attempt to recover the meaning and significance of the religious side of Confucianism. Among other subjects, the authors analyze the social, cultural, and political meaning attached to the cult; its history; the legends, images, and rituals associated with the worship of Confucius; the power of the descendants of Confucius, the main temple in the birthplace of Confucius; and the contemporary fate of temples to Confucius.

The Origins and Continuity of Chinese Sociology Tiankui Jing, 2022-11-14 This book examines the origins and basic concepts of sociology in China and traces the discipline's evolutionary trajectory. Building on the premise that qunxue, which goes back to Xunzi, is essentially the Chinese antecedent of modern/Western sociology, contributors try to show the distinctive ways qunxue addresses a wide range of both foundational and practical issues related to society using its own set of conceptual, analytical and methodological apparatus. The book argues that the rise of Chinese sociology will depend crucially on whether the rich heritage of traditional Chinese sociology can be fully appreciated and integrated with the Western tradition of learning. Following two preliminary chapters laying out qunxue's basic parameters, the four remaining chapters focus on its four primary concerns: cultivation of the self (xiushen), regulation of the family (qijia), governance of the state (zhiguo), and realization of universal peace (pingtianxia).

A Confucian Approach to Media Ethics Yayu Feng, 2025-01-23 A Confucian Approach to Media Ethics offers a comprehensive theorization of an approach to media ethics based on the moral philosophy that originated from China and that profoundly influenced East Asian countries. This book engages with foundational concepts from Confucian ethics and explicates a new framework that can be used for guiding media practices, as well as media ethics research and teaching. It suggests that the Confucian ideals of He (harmony), Zhong (equilibrium), and the notion of Junzi can be applied to guide intercultural media practices, and sets out a fresh model for ethics education centered on Xiuji (self-cultivation) that is different from the training-based and decision-making-centered model prevalent in the Western classrooms. This is also a framework that emphasizes both individual moral growth and the moral character of the broader professional community. Filling a gap in the conversation between Eastern and Western approaches to media ethics, this innovative and important volume will offer new perspectives to students and scholars of media ethics, communication studies, and comparative philosophy.

Sustainable Development: Asia-Pacific Perspectives Pak Sum Low, 2022-01-13 The Asia-Pacific region has been experiencing rapid development in the past 30 years, and issues relating to sustainable development will become increasingly important in the coming decades. This comprehensive overview presents sustainable development from the

perspectives of Asia and the Pacific, with contributions from more than 70 leading international experts. The first part focuses on the theories and practices of sustainable development, including national and regional perspectives, as well as international policies and law concerning climate change. The second part highlights the challenges and opportunities of sustainable development and poverty reduction amid the changing ecological, social, cultural, economic, and political environment in this region. These include issues such as the importance of science for sustainable development and related areas, including sustainable energy, stratospheric ozone depletion, climate change, land-use change, biodiversity, and disaster risk reduction. The volume is an invaluable reference for all researchers and policy makers with an interest in sustainable development.
