Reviews on New Drug Targets in Age-Related Disorders Paul C. Guest, 2021-03-16 Aging is an inevitable part of life, and is becoming a worldwide social, economic and health problem due to the fact that an increasing proportion of individuals in the advanced age category have a higher probability of developing age-related disorders. New therapeutic approaches are still in need to decrease or slow the effects of such diseases in this aging society. Advances in 'omic technologies such as genomics, transcriptomics, proteomics and metabolomics have significantly advanced our understanding of diseases in multiple medical areas. It is hoped that emerging hits from these analyses might be prioritized for further screening as potential novel drug targets for increasing the human healthspan in line with the lifespan, which will in turn lead to new therapeutic strategies and drug development projects by the pharmaceutical industry. This new book presents a series of reviews describing studies which have resulted in the identification of potential new drug targets for age-related disorders. Much of this information has come from 'omic comparisons of healthy and disease states or from testing the effects of potential new therapeutic approaches. Each chapter will be presented in the context of specific chronic diseases or different therapeutic strategies, providing important information on disease mechanisms related to the aging process. This book will be of interest to researchers in the areas of aging and chronic disease, as well as clinical scientists, physicians, and major drug companies. With contributors from Australia, Brazil, Canada, France, Germany, India, Iran, Iraq, South Africa, South Korea, Thailand, Ukraine, United Kingdom, United States of America, Uruguay and Vietnam, this is a timely follow up to Guest's previous book *Reviews on New Drug Targets in Age-Related Disorders*.

Vietnam War James H. Willbanks, 2017-11-16 This detailed two-volume set considers the Vietnam War, one of America's longest and bloodiest wars, from a topical perspective, addressing the main characters and key events of the war and supplying many relevant primary source documents. The Vietnam War not only claimed the lives of nearly 60,000 Americans and more than a million Vietnamese, but the prolonged conflict also resulted in a firestorm of protest at home that shook the foundations of the country and made U.S. citizens question the moral principles and motivations behind our foreign policy and military actions. Written in a very accessible style by recognized authorities on the war, *Vietnam War: A Topical Exploration and Primary Source Collection* provides students and general readers with a complete overview of the conflict in Vietnam—a broad topic that remains an important part of the American history and world history curriculum. Using a topical approach to cover all aspects of the war, the set enables students to see the complete picture of the conflict through its presentation of reference entries and documents arranged in cohesive, compelling chapters. Examples of the primary documents in the set include Communist Party: Evaluation of the Tet Offensive (1968) and President Richard Nixon's Speech on Vietnamization (1969). These primary sources are augmented by oral histories of soldiers who fought in the Tet Offensive. Additionally, maps and images in each section enhance the aesthetic appeal of the book and heighten students' understanding of the material. Readers will come away with both a strong comprehension of the Vietnam War as well as an appreciation for how significant this proxy conflict was as a lead-up event to the global Cold War.

Super Slick Tom Feigel, 2024-07-16 100% of author royalties are being donated to the Tunnel to Towers Foundation Helicopters loom large in how we picture the Vietnam War. Kilgore's birds coming in hot (and Wagnerian) out of the rising

sun in Apocalypse Now. The infantry/helicopter assault at Ia Drang in the climax of We Were Soldiers. A chopper flying over green rice paddies, with a teenaged door gunner manning a .50-cal. A slick dropping into an LZ whirling with purple smoke. We can only imagine it. Tom Feigel lived it, as a twenty-year-old crew chief in a Huey. Super Slick is the story of his year in Vietnam. Tom Feigel grew up a typical post-World War II kid who wrestled in high school, had a steady girl, and loved working on cars—and then everything changed. Less than a year out of high school, he was drafted into the army and assigned to aviation, ultimately to helicopters. In Vietnam in 1970, he first worked as a “hangar rat,” part of the ground crew responsible for maintaining the company's thirty Hueys—the Warriors and Thunderbirds—of the 336th Assault Helicopter Company, which operated in southern South Vietnam, in the Mekong Delta and U Minh Forest. In short order, Feigel volunteered for a flight mission to replace the rotors of a damaged chopper—which led to his becoming a crew chief on a transport slick called Warrior 21. Before long, he and 21's crew asked the company commander for permission to re-outfit their ship for thicker, more dangerous missions—and they ended up flying an up-gunned helicopter call sign Super Slick, tasked with similar missions but into more dangerous zones. Feigel's memoir recounts the thick and thin of helicopter combat in Vietnam. Heart-pumping missions into hot landing zones (sometimes inserting and extracting Navy SEALs). Adrenaline-fueled flights into enemy-infested jungles and free-fire zones. Low-level reconnaissance. “Hash and trash” runs to deliver supplies to far-flung units. Terrifying nighttime operations where trees posed nearly as much danger as the enemy. Razor-thin margins between life and death. It was dangerous; it was thrilling. The crews loved it; the crews hated it. They were proud of it. And they never wanted to do it again. Super Slick is as close as you can get to being inside a Huey—to hearing the radio chatter, feeling the thrum of the rotors, the pounding of the door guns.

Requiem Horst Faas, Tim Page, Peter Arnett, 1997 Between the French Indochina war of the fifties and the fall of Phnom Penn and Saigon in 1975, 134 photographers from different nations were killed. Horst Faas, two-times Pulitzer Prize winner and Chief Photographer for The Associated Press in Saigon at the height of the war, and Tim Page, another veteran who had been badly wounded, have gathered many thousands of photos from the Western agencies and from archives in Hanoi and Ho Chi Minh City. These have now been assembled to form both a monument to the dead and a record of the most terrifying war photography ever taken. Never again will the media have the kind of access to the war zone that was offered to the photographers in Vietnam. In many cases the photographers tried to get as close as possible, then paid the price.

The Encyclopedia of the Vietnam War Bloomsbury Publishing, 2011-05-20 Now in its second edition, this comprehensive study of the Vietnam War sheds more light on the longest and one of the most controversial conflicts in U.S. history. The Vietnam War lasted more than a decade, was the longest war in U.S. history, and cost the lives of nearly 60,000 American soldiers, as well as millions of Vietnamese—many of whom were uninvolved civilians. The lessons learned from this tragic conflict continue to have great relevance in today's world. Now in its second edition, The Encyclopedia of the Vietnam War: A

Political, Social, and Military History adds an entire additional volume of entries to the already exhaustive first edition, making it the most comprehensive reference available about one of the most controversial events in U.S. history. Written to provide multidimensional perspectives into the conflict, it covers not only the American experience in Vietnam, but also the entire scope of Vietnamese history, including the French experience and the Indochina War, as well as the origins of the conflict, how the United States became involved, and the extensive aftermath of this prolonged war. It also provides the most complete and accurate order of battle ever published, based upon data compiled from Vietnamese sources. This latest release delivers even more of what readers have come to expect from the editorship of Spencer C. Tucker and the military history experts at ABC-CLIO.

The Vietnam Run Michael Gillen,2023-03-28 On the same day the Japanese surrender ended World War II, Vietnamese nationalists declared independence from France. Within weeks, France sought to reestablish colonial rule. American merchant seamen arriving in French ports to ship GIs back to the U.S. were dismayed when French troops bound for Vietnam came aboard instead. Many of these seamen objected because American veterans awaited transport home and because they

flew in the face of Allied war aims of national self-determination. Later, with the Vietnam War effort dependent on Merchant Marine logistical support, seamen were among the first to protest U.S. involvement. With firsthand recollections, this book tells the story, from deadly encounters with mines, rockets and gunfire to evacuations of refugees and to rescues of boat people in the South China Sea.
