Archive Style Robin Kelsey,2007-06-05 This imaginative study of American visual culture reveals how the political predicaments of a few small bureaucracies once fostered pictures of an extraordinary style. U.S. geographical and geological surveys of the late nineteenth century produced photographs and drawings of topography, American Indians, geologic features, botanical specimens, and specialists at work in the field. Some of these pictures have long been celebrated for their anticipation of a modernist aesthetic, but Robin Kelsey, in this abundantly illustrated volume, traces their modernistic qualities to archival ingenuity. The technical and promotional needs of surveys, Kelsey argues, fostered the emergence of a taut, graphic pictorial style that imitated the informational clarity of diagrams and maps. As this book demonstrates, these pictures became sites of struggle as well as innovation when three brilliant survey artists and photographers subtly resisted the programs they were hired to serve. Discovering a politics of style behind the modernist look of survey pictures, Kelsey offers a fresh interpretation of canonical western expedition photographs by Timothy H. O'Sullivan and introduces two exceptional but largely forgotten sets of pictures: views of the U.S.-Mexico boundary from the 1850s by Arthur Schott and photographs of the Charleston earthquake of 1886 by C. C. Jones.

*Charles Darwin's Zoology Notes & Specimen Lists from H.M.S. Beagle* Charles Darwin,R. D. Keynes,2000 This transcription of notes made by Charles Darwin during the voyage of H.M.S. Beagle records his observations of animals and plants, and provides valuable insights into the intellectual development of one of the most influential scientists of all time. Darwin drew on many of these notes for his well-known Journal of Researches (1839), but the majority of them have

remained unpublished. This volume, which includes copies of his sketches and illustrations, provides numerous examples of his impeccable accuracy in describing the wide range of animals seen in the course of his travels, and of his analytical approach toward every one of his observations. Here are to be found the initial seeds of his theory of evolution, and of the fields of behavioral and ecological study of which he was one of the founding fathers.

**Darwin's Camera** Phillip Prodger, 2009-10-22 Darwin's Camera tells the extraordinary story of how Charles Darwin changed the way pictures are seen and made. In his illustrated masterpiece, Expression of the Emotions in Man and Animals (1871), Darwin introduced the idea of using photographs to illustrate a scientific theory--his was the first photographically illustrated science book ever published. Using photographs to depict fleeting expressions of emotion--laughter, crying, anger, and so on--as they flit across a person's face, he managed to produce dramatic images at a time when photography was famously slow and awkward. The book describes how Darwin struggled to get the pictures he needed, scouring the galleries, bookshops, and photographic studios of London, looking for pictures to satisfy his demand for expressive imagery. He finally settled on one the giants of photographic history, the eccentric art photographer Oscar Rejlander, to make his pictures. It was a peculiar choice. Darwin was known for his meticulous science, while Rejlander was notorious for altering and manipulating photographs. Their remarkable collaboration is one of the astonishing revelations in Darwin's Camera. Darwin never studied art formally, but he was always interested in art and often drew on art knowledge as his work unfolded. He mingled with the artists on the voyage of HMS Beagle, he visited art museums to examine figures and animals in paintings, associated with artists, and read art history books. He befriended the celebrated animal painters Joseph Wolf and Briton Riviere, and accepted the Pre-Raphaelite sculptor Thomas Woolner as a trusted guide. He corresponded with legendary photographers Lewis Carroll, Julia Margaret Cameron, and G.-B. Duchenne de Boulogne, as well as many lesser lights. Darwin's Camera provides the first examination ever of these relationships and their effect on Darwin's work, and how Darwin, in turn, shaped the history of art.

The Correspondence of Charles Darwin: Charles Darwin, 2014-01-23 This volume is part of the definitive edition of letters written by and to Charles Darwin, the most celebrated naturalist of the nineteenth century. Notes and appendixes put these fascinating and wide-ranging letters in context, making the letters accessible to both scholars and general readers. Darwin depended on correspondence to collect data from all over the world, and to discuss his emerging ideas with scientific colleagues, many of whom he never met in person. The letters are published chronologically: Volume 21 includes letters from 1873, the year in which Darwin received responses to his work on human and animal expression. Also in this year, Darwin

continued his work on carnivorous plants and plant movement, finding unexpected similarities between the plant and animal kingdoms, raised a subscription for his friend Thomas Henry Huxley, and decided to employ a scientific secretary for the first time - his son Francis.
