Neuroscience and Crime Hans J. Markowitsch,2020-08-24 Until recently jurisprudence largely ignored neuroscientific findings. The advent of sophisticated methodologies in the neurosciences - in particular brain imaging techniques - reduced this unawareness, and findings, pointing to clear and unequivocal relations between brain structure and brain function on the one side and personality dimensions on the other, led to a growing interest of jurisprudence in brain research. The Special Issue is intended to provide an overview over the most recent findings and technological refinements in the field of crime related neuroscientific investigations. It covers genetics, functional brain imaging, mind reading, lie detection, and many other topics.

Mental Health in the Elderly H. Häfner,G. Moschel,N. Sartorius,2012-12-06 H. Häfner, G. Moschel, N. Sartorius The size of the world's population aged over 65 was estimated at about 250 million in 1980; by the year 2025 it is expected to grow to about 760 million (see Hauser, this volume). This sharp increase in life expectancy at birth, in some countries amounting to almost 100% in only a hundred years, has resulted from better nutrition and improved living conditions, hygiene and medical care. Not only life expectancy at birth, but also further life expectancy in advanced age has shown a clear, though more moderate increase. This increased life expectancy, together with a simultaneous fall in birth rates, has caused the mean age of the world population and, especially, the average age of the population of industrial nations to climb substantially in recent times, a development which will reach its peak only some decades from now. For these demographic reasons alone, health care authorities will have to devote more attention to the health problems of the elderly. The main task of medical research is to develop improved methods of disease prevention and treatment. Yet, because the full benefits of such research are only realized after many years of work, researchers have already begun to respond to demographic pressures by focussing part of their efforts on the study of illnesses characteristic of old age.

Interaction Between Mental and Physical Illness Rolf Öhman,Hugh L. Freeman,Annika Franck Holmkvist,Sören Nielzen,2012-12-06 The group of European Medical Research Councils (EMRC) was formed in 1971 and became a Standing Committee of the European Science Foundation (ESF) in 1975. EMRC is an association of medical research councils or equivalent organizations in Western Europe. The National Institutes of Health, the Israel Academy of Sciences, and the European Office of WHO are associated with EMRC and take an active part in its activities. The main aims of EMRC are to

exchange information on the research policies pursued by its member organizations and to initiate and stimulate international cooperation in biomedical research. Since this research is highly international in itself, EMRC concentrates its activities on furthering international collaboration in those fields where it can play a significant role as a complement of existing channels. Mental illness research has been judged by EMRC to fulfill these criteria. After a survey of the activities of the member organizations in mental illness research, EMRC decided in 1978 to set up a study group to analyze areas where EMRC could contribute. As a result of the work of the study group, five workshops have been arranged to define present knowledge in some specific areas and to delineate research needs. The present volume contains the proceedings of the fifth workshop, held in 1987 and dealing with interactions between mental and physical illness. EMRC hopes that this volume will contribute both to intensified research and to research cooperation on mental illnesses.

Cannabis: Potenzial und Risiko Eva Hoch, Chris Maria Friemel, Miriam Schneider, 2018-08-13 Dieses Buch fasst den aktuellen Forschungsstand zum Thema Cannabis zusammen. Hierfür wurden alle bedeutsamen, in den letzten 10 Jahren in deutscher und englischer Sprache publizierten Forschungsarbeiten systematisch recherchiert und ausgewertet. Dargestellt werden: - psychische, organische und soziale Risiken des Konsums pflanzlicher und synthetischer Cannabisprodukte zu Rauschzwecken, - Wirksamkeit, Verträglichkeit und Sicherheit von Cannabisarznei bei organischen und psychischen Erkrankungen, - Motive und Erwartungen eines nichtärztlich verordneten Gebrauchs von Cannabis im Sinne einer Selbstmedikation. Die Expertise liefert einen umfassenden Überblick über die aktuelle Literatur. Sie bewertet das therapeutische Potenzial und die Risiken von Cannabis entsprechend internationaler methodischer Vorgaben der evidenzbasierten Medizin. Die Expertise dient somit als solides Nachschlagewerk. Ihr Auftraggeber war das Bundesministerium für Gesundheit.

Neuro-Psychopharmacology B. Saletu, P. Berner, L. Hollister, 2013-10-22 Neuro-psychopharmacology covers the proceedings of the 11th Congress of the Collegium Internationale Neuro-psychopharmacologicum, held in Vienna on July 9-14, 1978. The book focuses on the processes, methodologies, and approaches in neuropsychopharmacology. The selection first offers information on the long-lasting effects of electroconvulsive therapy (ECT) on monoaminergic mechanisms and

enhanced monoamine behavioral responses following repeated electroconvulsive shock to rats and their relevance to ECT. The book also underscores the ECT effects on mineral metabolism and neuroendocrine function. The publication reviews the genetic components in the mechanism of action of lithium; genetics and lithium ion metabolism in affective disorders; and pharmacogenetics and the pharmacologic challenge strategy in clinical research. The text also examines the influence of peptides in affective disorders and HLA antigens in affective disorders and cycloid psychoses. Discussions also focus on the biological and clinical basis of the therapeutic effects of benzodiazepines; effects of benzodiazepines on the electrical activity of the central nervous system; and diazepam metabolism in healthy subjects and patients with heart failure, renal failure, and hepatic cirrhosis. The selection is a dependable reference for readers interested in neuropsychopharmacology.

Books of Abstracts of the 16th World Congress of the International Association for Child and Adolescent Psychiatry and Allied Professions (IACAPAP) H. Remschmidt, 2013-06-29 This book contains all of the abstracts of the 16th World Congress of the International Association for Child and Adolescent Psychiatry and Allied Professions (IACAPAP) held in Berlin, Aug 22-26, 2004. The abstracts are arranged according to the type of session (main lecture, state of the art lecture, symposium, workshop, course, or poster exhibition) and the day of the conference. The abstracts of the industry-sponsored sessions are also included. A subject index is provided to help track themes of special interest. The author index allows you to find the abstract authors and the address of the first author for direct contact. The general theme of the congress Facilitating Pathways: Care, Treatment and Prevention in Child and Adolescent Mental Health is quite inclusive and the contributions to the Congress, as reflected in the abstracts, cover the whole range of child and adolescent mental health endeavour, including all modern methods and trends in research and clinical application. The ways we understand and treat our patients are changing rapidly, and this too is reflected in the contributions to this volume, which give state-of-the-art information that should allow us to provide better care, treatment and prevention to children, adolescents and their care-givers everywhere in the world.

Kosten und Kostenwirksamkeit der gemeindepsychiatrischen Versorgung von Patienten mit Schizophrenie

Hans Joachim Salize, Wulf Rössler, 2013-03-12 Aufgrund der spezifischen Krankheitscharakteristika gilt die Schizophrenie als das kostenintensivste psychiatrische Krankheitsbild. Jedoch besteht erstaunliche Unkenntnis darüber, wie hoch die Kosten der gemeindenahen Versorgung von Patienten mit Schizophrenie zu beziffern sind, wie diese Kosten sich zusammensetzen und welche Folgen daraus erwachsen. Es ist mehr als überfällig, daß sich psychiatrische Versorgungsforschung dieser Thematik annimmt und empirisch gesicherte Erkenntnisse über die Kosten der Versorgung von chronisch psychisch Kranken erarbeitet. Hier besteht ein deutliches Defizit gegenüber Ländern mit vergleichbaren Versorgungsstandards. Die vorliegende Arbeit ist als Versuch zu verstehen, diese Lücke zu schließen.
