What is the difference between no-cache and no-store in Cache ... 95 I don't find get the practical difference between Cache-Control:no-store and Cache-Control:no-cache. As far as I know, no-store means that no cache device is allowed to cache that response. In the other hand, no-cache means that no cache device is allowed to serve a cached response without validate it first with the source. **What's with all the cache/nocache stuff and weird filenames?** The .nocache.js file contains JavaScript code that resolves the Deferred Binding configurations (such as browser detection, for instance) and then uses a lookup table generated by the GWT Compiler to locate one of the .cache.html files to use.
