*Legitimacy in International Law* Rudiger Wolfrum, Volker Röben, 2009-09-03 There has been intense debate in recent times over the legitimacy or otherwise of international law. This book contains fresh perspectives on these questions, offered at an international and interdisciplinary conference hosted by the Max Planck Institute for Comparative Law and International Law. At issue are questions including, for example, whether international law lacks legitimacy in general and

whether international law or a part of it has yielded to the facts of power.

Legitimacy in International Law Rüdiger Wolfrum, Volker Röben, 2008-02-26 In recent years the question of the legitimacy of international law has been discussed quite intensively. Such questions are, for example, whether international law lacks legitimacy in general; whether international law or a part of it has yielded to the facts of power; whether adherence to international legal commitments should be subordinated to self-defined national interests; whether international law or particular rules of it – such as the prohibition of the use of armed force – have lost their ability to induce compliance (compliance pull); and what is the relevance of non-enforcement or failure to obey for the legitimacy of that particular international norm? This book contains fresh perspectives on these questions, offered at an international and interdisciplinary conference hosted by the Max Planck Institute for Comparative Law and International Law.

The Individual in International Law Anne Peters, Tom Sparks, 2024 The Individual in International Law collects the work of esteemed scholars to examine the effects of humanisation on international law, and how individual status, rights, and obligations have changed the international legal system throughout history and into the present day.

Third-Party Liability of Classification Societies Jürgen Basedow, Wolfgang Wurmnest, 2006-03-30 Classification societies are charged with the technical supervision of maritime shipping to enhance the safety of life and property at sea by securing high technical standards of design, manufacture, construction and maintenance of seagoing vessels. Each and every shipping catastrophe caused by a technical defect reminds the maritime world of the central importance of the vessel's proper technical supervision. Correspondingly, the liability of classification societies has become a particularly discussed issue over the past years. Their contractual liability is usually limited by general terms and conditions incorporated in the classification rules and cases brought by typical contracting partners of classification societies, such as ship owners and ship yards, are not an issue in the current debate. However, one can note a substantial worldwide increase of actions brought by parties who are not in privity with classification societies. This study focuses on third-party liability of classification societies. It originates in an expert opinion on selected issues relating to third-party liability which the authors compiled for the German classification society Germanischer Lloyd AG. Driven by the highly interesting legal issues and unexplored shores in this area of law, we continued our research and are able to present a relatively comprehensive overview on the law on third-party liability of classification societies. Given the origins of our work, the discussion of limitations of liability clauses is based on the standard terms and conditions of the Germanischer Lloyd, version 2005.

*Compulsory Insurance and Compensation for Bunker Oil Pollution Damage* Ling Zhu, 2007-03-20 Oil tankers are not the only vessels that have caused oil pollution at sea. Numerous spills in the past have been of heavy fuel oil from non-tankers. However, the international liability and compensation regime covered only oil pollution damage caused by oil tankers. There was thus a need to bring the law on marine oil pollution responsive to oil pollution damage caused by non-tankers. In March

2001, the International Convention on Civil Liability for Bunker Oil Pollution Damage was adopted following a diplomatic conference at the International Maritime Organization. Though this convention has not yet come into force, its various aspects should already be considered as they will surely affect the maritime industry as a whole and the non-tanker sector, in particular. This book provides a timely and comprehensive study on the concept of compulsory insurance, its main purpose of ensuring compensation and its interrelations with other features such as the rule of strict liability and the limitation of liability under the convention.

**The Oxford Handbook of the Sources of International Law** Jean d'Aspremont, Samantha Besson, Sévrine Knuchel, 2017-10-19 The question of the sources of international law inevitably raises some well-known scholarly controversies: where do the rules of international law come from? And more precisely: through which processes are they made, how are they ascertained, and where does the international legal order begin and end? This is the static question of the pedigree of international legal rules and the boundaries of the international legal order. Second, what are the processes through which these rules are made? This is the dynamic question of the making of these rules and of the exercise of public authority in international law. The Oxford Handbook of the Sources of International Law is the very first comprehensive work of its kind devoted to the question of the sources of international law. It provides an accessible and systematic overview of the key issues and debates around the sources of international law. It also offers an authoritative theoretical guide for anyone studying or working within but also outside international law wishing to understand one of its most foundational questions. This Handbook features original essays by leading international law scholars and theorists from a range of traditions, nationalities and perspectives, reflecting the richness and diversity of scholarship in this area.

**Research Handbook on International Law and Social Rights** Christina Binder, Jane A. Hofbauer, Flávia Piovesan, Amaya Úbeda de Torres, 2020-08-28 This comprehensive Research Handbook offers a comparative overview of the history, nature and current status of social rights at the universal and regional level. Tracing their evolution from rather modest beginnings, to becoming the category of rights responding most accurately to the 21st century's policy objectives of poverty eradication and equitable resource allocation, this Research Handbook assesses the mechanisms used to enhance the implementation and enforcement of social rights.

**Social Dimensions of International Law** Rudolf Streinz, 2016-01-28 This book contains the presentations of a conference held in the form of a joint symposium in July 2012 in Munich which was hosted by the Faculty of Law of the University of Munich in cooperation with the Max-Planck Institute for Social Law and Social Policy. It had as its main topic "Social Dimensions of International Law" that served as a chapeau for presentations in both, public and private international law. The presentations cover various social dimensions of a wide field of international and domestic law: among others, International Human Rights Law, International Economic Law, International Environmental Law, Administrative Law,

Constitutional Law, International Law of Restitution, International and European Tort Law, Procedural Law and International Labour Law.

**Sovereign Financing and International Law** Carlos Espósito, Yuefen Li, Juan Pablo Bohoslavsky, 2013-10-03 The regulation of sovereign financing is a highly topical and significant issue, in the light of continuing global financial turmoil. This book assesses the role of international law in sovereign financing, addressing this issue from both legal and economic standpoints. It takes as a starting point the recent report 'Principles on Responsible Sovereign Lending and Borrowing' by the United Nations Conference on Trade and Development (UNCTAD). This report was endorsed by the United Nations General Assembly in its December 2011 Resolution on Debt, which emphasized the need for creditors and debtors to share responsibility for preventing unsustainable debt situations and encouraged all stakeholders to pursue the ongoing discussions within the framework of the UNCTAD Initiative. Investigating the legal and economic basis for the principles which were articulated in the report, the book develops a detailed and nuanced analysis of the controversial and complex issues they raise, including those concerning finance and credit rating agencies, contingent liabilities, debt management, corruption, fiduciary relations and duties, Collective Action Clauses, and the role of the EU and UN. Ultimately, it argues that the principles elaborated in the report correspond with general principles of international law, which provide a strong, pre-existing foundation upon which to build responsible principles for sovereign financing.

**International Law and Governance of Natural Resources in Conflict and Post-Conflict Situations** Daniëlla Damde Jong, 2015-06-26 Natural resource wealth is conducive to a country's development. Nevertheless, the last few decades have shown a harsher reality, where natural resources have also triggered, financed or fuelled a number of internal armed conflicts. Examples include the armed conflicts in Cambodia, Sierra Leone, Liberia and the Democratic Republic of the Congo, which have been financed with the exploitation of a variety of valuable natural resources, including diamonds, gold, timber, oil and cocoa. The aim of this book is to assess the contribution of international law in ensuring that natural resources are used to promote development and to achieve sustainable peace instead of financing armed conflict. For this purpose, the author discusses the international legal framework for the governance of natural resources in States in general, in situations of armed conflict and as part of conflict resolution and post-conflict peacebuilding efforts.

**The Elgar Companion to the Hague Conference on Private International Law** Thomas John, Rishi Gulati, Ben Koehler, 2020-12-25 This comprehensive Companion is a unique guide to the Hague Conference on Private International Law (HCCH). Written by international experts who have all directly or indirectly contributed to the work of the HCCH, this Companion is a critical assessment of, and reflection on, past and possible future contributions of the HCCH to the further development and unification of private international law.

**Research Methods in Private International Law** Xandra Kramer, Laura Carballo Piñeiro, 2024-05-02 This incisive

Research Handbook provides valuable insights into the various methodological approaches to Private International Law from regulatory and educational perspectives. It comprehensively unpacks central themes in the field including international jurisdiction, recognition and enforcement, and scrupulously analyses core debates whilst addressing legislative and policy issues.

**Crisis Narratives in International Law** Makane Moïse Mbengue, Jean D'Aspremont, 2021-11-15 This volume offers a series of short and highly self-reflective essays by leading international lawyers on the relation between international law and crises. It particularly shows that international law shapes the crises that it addresses as much as it is shaped by them. It critically evaluates the modes of intervention of international law in the problems of the world. Together these essays provide a unique stocktaking about the role, limits, and potential of international law as well as the worlds that are imagined through international lawyers' vocabularies.

*Baltic Yearbook of International Law, Volume 5 (2005)* Carin Laurin, 2005-10 The Baltic Yearbook of International Law is an annual publication containing contributions on topical issues in international law and related fields that are relevant to Baltic affairs and beyond. In addition to articles on different aspects of international law, each Yearbook focuses on a theme with particular importance to the development of international law.

**A Large Spectrum of Free Oscillations of the World Ocean Including the Full Ocean Loading and Self-attraction Effects** Malte Müller, 2008-11-25 In this book, data from a model ocean developed to compute free oscillations is used to analyze the LSA effect on tides and the synthesis of tides by free oscillation. It is also used to show the existence of six long-period planetary vorticity modes.

**The Hamburg Lectures on Maritime Affairs 2007 & 2008** Jürgen Basedow, Ulrich Magnus, Rüdiger Wolfrum, 2009-10-03 In 2007, the International Max Planck Research School for Maritime Affairs and the International Tribunal for the Law of the Sea (ITLOS), both based in Hamburg, decided to establish an annual lecture series, the Hamburg Lectures on Maritime Affairs – giving distinguished scholars and practitioners the opportunity to present and discuss recent developments in the field of maritime affairs. The present volume collects seven of the lectures held in 2007 and 2008 by Thomas A. Mensah, Krijn Haak, Sergio M. Carbone, Lorenzo Schiano di Pepe, Erik Røsæg, Frank Smeele, Carlos Esplugues Mota and Lucius Caflisch.

International Law in the New Age of Globalization Andrew Byrnes, Mika Hayashi, Christopher Michaelsen, 2013-03-27 This collection brings together a series of essays which address some of the challenges that globalization poses to the international legal order. The book examines the interaction of globalization and international law through four sub-themes: the adaptation of classical international legal tools to regulate and adjudicate community interests and conflicts in the era of globalization; coordinating dialogues and governance strategies within and between international legal systems and

institutions; globalization and the diversification of actors; and the exposure of State sovereignty to private actors and the need to preserve the regulatory powers of States. The volume will be of interest to international law scholars, practitioners and students, as well as to those working in the fields of international relations and globalization.
