Resistance Shane Moran,2021-04-19 In Resistance: Sol Plaatje and South Africa, Shane Moran studies Sol Plaatje, the founding secretary of what was to become the African National Congress (ANC), and his work within the context of colonial politics and resistance. Arguing for a return to the study of one of the founders of anti-racism, Moran explores issues of land reform, human rights, and the legacy of colonialism. Through an in-depth analysis of Plaatje's resistance to racial domination, Moran examines the nature of the struggles that continue within and beyond South Africa today. In particular, Moran analyzes events from the beginning of the previous century that shaped post-1994 South Africa, such as the resolution of the ANC to expropriate land without compensation.

Climate Change, Gender Roles and Hierarchies Phuong Ha Pham, Donna L. Doane,2020-11-18 This book examines changing gender roles, relations and hierarchies in an ethnic minority community in Central Viet Nam. After decades of war, the community continued its self-sufficient way of life in this remote forested mountainous region, but in recent years has been forced to respond to severe climate threats combined with sudden and destabilizing socioeconomic and regulatory change. Through the use of both qualitative (interview-based) and quantitative research methods, the book offers insights into the complex interactions between climate, regulatory and socioeconomic changes – including, paradoxically, the emergence of significant problems for both the community and the environment in the wake of policies designed to protect the natural environment. Facing greatly increased food and livelihood insecurity, the women and men of the community were pushed into the mainstream market economy without being fully prepared to participate in an economy that is still very new to them. These sudden transitions caused major shifts in gender roles and hierarchies, opening up new possibilities for women to increase their social status in a highly patriarchal context, but also at a cost for both women and men as women's burdens increased and men's traditional roles and livelihoods were lost. The book examines recent trends, including unanticipated changes and new possible policy-related approaches, and draws international comparisons with other ethnic minority, indigenous and remote communities facing similar complex forces of change. This book will be of interest to scholars and postgraduate students of climate change, gender, environment, and public policy and development studies.

The Postcolonial World Jyotsna G. Singh, David D. Kim, 2016-10-04 The Postcolonial World presents an overview of the field and extends critical debate in exciting new directions. It provides an important and timely reappraisal of postcolonialism as an aesthetic, political, and historical movement, and of postcolonial studies as a multidisciplinary, transcultural field. Essays map the terrain of the postcolonial as a global phenomenon at the intersection of several disciplinary inquiries. Framed by an introductory chapter and a concluding essay, the eight sections examine: Affective, Postcolonial Histories Postcolonial Desires Religious Imaginings Postcolonial Geographies and Spatial Practices Human Rights and Postcolonial Conflicts Postcolonial Cultures and Digital Humanities Ecocritical Inquiries in Postcolonial Studies Postcolonialism versus Neoliberalism The Postcolonial World looks afresh at re-emerging conditions of postcoloniality in the twenty-first century and draws on a wide range of representational strategies, cultural practices, material forms, and affective affiliations. The volume is an essential reading for scholars and students of postcolonialism.

Environmental Planning Handbook Tom Daniels, 2017-11-08 Environmental protection is a global issue. But most of the action is happening at the local level. How can communities keep their air clean, their water pure, and their people and property safe from climate and environmental hazards? Newly updated, The Environmental Planning Handbook gives local governments, nonprofits, and citizens the guidance they need to create an action plan they can implement now. It's essential reading for a post-Katrina, post-Sandy world.

Understanding Italian Opera Tim Carter, 2015-09-16 Opera is often regarded as the pinnacle of high art. A Western genre with global reach, it is where music and drama come together in unique ways, supported by stellar singers and spectacular scenic effects. Yet it is also patently absurd -- why should anyone break into song on the dramatic stage? -- and shrouded in mystique. In this engaging and entertaining guide, renowned music scholar Tim Carter unravels its many layers to offer a thorough introduction to Italian opera from the seventeenth to the early twentieth centuries. Eschewing the technical musical detail that all too often dominates writing on opera, Carter begins instead where the composers themselves did: with the text. Walking readers through the relationship between music and poetry that lies at the heart of any opera, Carter then offers explorations of five of the most enduring and emblematic Italian operas: Monteverdi's *The Coronation of Poppea*;

Handel's *Julius Caesar in Egypt*; Mozart's *The Marriage of Figaro*; Verdi's *Rigoletto*; and Puccini's *La Bohème*. Shedding light on the creative collusions and collisions involved in bringing opera to the stage, the various, and varying, demands of the text and music, and the nature of its musical drama, Carter also shows how Italian opera has developed over the course of music history. Complete with synopses, cast lists, and suggested further reading for each work discussed, *Understanding Italian Opera* is a must-read for anyone with an interest in and love for this glorious art.

Victimology William G. Doerner, Steven P. Lab, 2017-03-16 *Victimology*, Eighth Edition, shows how to transform the current criminal's justice system into a victim's justice system. Doerner and Lab, both well-regarded scholars, write compellingly about the true scope of crime victims' suffering in the United States. They lay out the sources of evidence available to victimology researchers. In later chapters, theory is woven together with the description of each topic and illustrated with specific examples. The second part of the book addresses the full impact of victimization. Part III, *Types of Victimization*, details specific problems ranging from violent crimes, child and elder abuse, and property crime to crime in the workplace. The authors emphasize their concern with the extent of criminal victimization, explain how obstacles hinder the pursuit of justice, and introduce the idea that reforms have rendered the system much more victim-friendly. Appropriate for undergraduate as well as early graduate students in *Victimology* courses in *Criminology*, *Criminal Justice*, and *Sociology* programs, as well as *Justice Studies*, this book offers an instructor's manual with a test bank, as well as PowerPoint lecture slides and a companion site with student resources.

Einstein Himself Anthony McAuliffe, A more critical look at the man known today by most as one of the greatest scientists of all time. A unique and thought-provoking narrative quite at odds with the generally-accepted dogma. How exactly did Einstein rise to become so revered today? This is also the story of Mileva Maric, a little-known woman who just so happened to be Einstein's first wife. When Einstein presented his famous 'Annus Mirabilis' or 'Wonder Year' papers in 1905, Mileva was of equal training in the fields of mathematics and physics and indeed, more accomplished than Einstein in many other disciplines. "He seems more an intuitive physicist," stated Chaim Weizmann, a promoter of Einstein. "He is not an experimental physicist and though he is able to detect fallacies in the conceptions of physical science, he must turn his general outlines of theory over to someone else to work out." Historians report that Einstein collaborated with other scientists from 1907. In 1905, there was Mileva.

Keeping the Republic: Power and Citizenship in American Politics, 6th Edition The Essentials Christine Barbour, Gerald C. Wright, 2013-01-15 Every section and every feature in the book has one goal in mind: to get students to think critically and be skeptical of received wisdom. Serving as a true aid to teachers, each chapter is designed to build students' analytical abilities. By introducing them to the seminal work in the field and showing them how to employ the themes of power and citizenship, this proven text builds confidence in students who want to take an active part in their

communities and government to play their part in keeping the republic, and to consider the consequences of that engagement.

Political Expression and Conflict Transformation in Divided Societies Daniel Kirkpatrick, 2019-09-04 This book considers how the social construction of crime and the criminalising of political expression impact upon different stages in a violent political conflict. The freedom to express our political opinions is regarded as an essential human right throughout most of the world, and yet, in defence of our security, governments often place various restrictions on it. This book directly considers what these restrictions are in the context of deeply divided societies to understand how they impact upon intergroup relations in four different contexts: nonviolent movements, counter-insurgency, peace negotiations, and post-settlement peacebuilding. Drawing on an extensive body of original interviews and archival material, the volume analyses this relationship through an in-depth consideration of Northern Ireland and South Africa, followed by a wider analysis of Turkey, Sri Lanka, Belgium, and Canada. The overarching argument is that the implications of criminalising political expression depend on both its 'target' and the wider social reality it contributes towards. This book will be of much interest to students of conflict resolution, transitional justice, law, and International Relations.

Nature-Inspired Sensors Hossam Haick, 2024-10-24 Nature-Inspired Sensors presents and discusses the basic principles and latest developments in nature-inspired sensing and biosensing materials as well as the design and mechanisms for analyzing their potential in multifunctional sensing applications. The book starts with a comprehensive review of certain fundamental mechanisms in different living creatures, including humans, animals, and plants. It presents and discusses ways for imitating various nature-inspired structural features and their functional properties, such as hierarchical, interlocked, porous, and bristle-like structures and hetero-layered brick-and-mortar structures. It also highlights the utility of these structures and their properties for sensing functions, which include static coloration, self-cleaning, adhesive, underwater navigation and object detection, electric charge generation, and sensitive olfactory functions for detecting various substances. This is followed by an appraisal of accumulating knowledge and its translation from the laboratory to the point-of-care phase, using selective sensors as well as desktop and wearable artificial sensing devices, for example, electronic noses and electronic skins, in conjunction with AI-assisted data processing and decision-making in the targeted field of application. In addition, the book offers an insight into the challenges of continuing the development of nature-inspired smart sensing and biosensing technology and their wider availability, which can be substantially improved. It is a valuable reference for graduates, undergraduates, researchers, and working professionals in the fields of chemistry, materials science, and biomedical and environmental science. - Discusses the current strategies for fabricating nature-derived bio/chemical sensors - Presents ways to apply nature-derived bio/chemical sensors in real life - Describes the future of nature-derived bio/chemical sensors

Threshold Concepts in Women's and Gender Studies Christie Launius, Holly Hassel, 2022-03-30 Threshold Concepts in Women's and Gender Studies: Ways of Seeing, Thinking, and Knowing is a textbook designed primarily for introduction to Women's and Gender Studies courses, with the intent of providing both a skill- and concept-based foundation in the field. The third edition includes fully revised and expanded case studies and updated statistics; in addition, the content has been updated throughout to reflect significant news stories and cultural developments. The text is driven by a single key question: What are the ways of thinking, seeing, and knowing that characterize Women's and Gender Studies and are valued by its practitioners? This book illustrates four of the most critical concepts in Women's and Gender Studies—the social construction of gender, privilege and oppression, intersectionality, and feminist praxis—and grounds these concepts in multiple illustrations. Threshold Concepts in Women's and Gender Studies develops the key concepts and ways of thinking that students need to develop a deep understanding and to approach material like feminist scholars do, across disciplines.
