Evaluaciones nacionales del rendimiento académico Volumen 1 Vincent Greaney,Thomas Kellaghan,2016-02-02 La evaluación efectiva del desempeño de los sistemas educativos es un componente clave en la formulación de políticas para optimizar el desarrollo del capital humano en todo el mundo. Los cinco libros de la serie Evaluaciones nacionales del rendimiento académico presentan conceptos clave de las evaluaciones nacionales de los niveles de rendimiento estudiantil, desde las cuestiones normativas que deben abordarse cuando se diseña y se lleva a cabo las evaluaciones, hasta el desarrollo de las pruebas, el muestreo, la depuración de datos, las estadísticas, la redacción de informes y el uso de los resultados para mejorar la calidad de la educación. Este primer volumen describe los fines y las características de las evaluaciones nacionales, así como las cuestiones relacionadas con su diseño, su puesta en práctica, su análisis y su comunicación. Describe también las principales evaluaciones internacionales, regionales y nacionales llevadas a cabo en una serie de países. El libro va dirigido principalmente a gobiernos nacionales, regionales y estatales, instituciones de investigación y

universidades.

Evaluaciones nacionales del rendimiento académico Volumen 4 Gerry Shiel,Fernando Cartwright,2016-04-18

Análisis de los datos de una evaluación nacional del rendimiento académico es el cuarto de cinco volúmenes de la serie Evaluaciones nacionales del rendimiento académico. Otros volúmenes han descrito los procedimientos de una evaluación hasta llegar a la fase de preparación de los datos para su análisis estadístico, el tema del presente volumen. Los análisis precisos que se lleven a cabo dependerán de las necesidades de información de los responsables políticos y los gestores educativos. En la mayoría de las evaluaciones nacionales, estas necesidades tienen que ver con la calidad del aprendizaje estudiantil, los factores relacionados con el aprendizaje, las cuestiones de equidad, y en algunos casos, la transformación de los resultados educativos con el paso del tiempo. El volumen 4, que consta de dos partes, explica detalladamente los pasos necesarios para el análisis de los datos recopilados en una evaluación nacional. La 1.^a parte ofrece una introducción general a los análisis estadísticos llevados a cabo normalmente en las evaluaciones a gran escala, midiendo la tendencia central y la dispersión de los puntajes de los alumnos, así como las relaciones entre variables. La 2.^a parte describe el programa IATA (Item and Test Analysis), que utiliza la Teoría Clásica de las Pruebas y la Teoría de Respuesta al α ?tem para establecer escalas sobre las que determinar los puntajes de los alumnos. Se describe en detalle los pasos del análisis de las administraciones de las pruebas piloto y las pruebas definitivas. Un CD complementario contiene ejercicios especialmente diseñados y ficheros de datos de respaldo para ambas partes del volumen. Este libro será de interés para los especialistas en evaluaciones en gobiernos nacionales, regionales y locales, instituciones de investigación y universidades.

Química. Fundamentos experimentales Robert W. Parry, 1973 Este libro es una versión autorizada del célebre libro original CHEM Study, cuya versión española se ha difundido por los Centros de Enseanza donde se cursan estudios de nivel medio y preuniversitario. Tanto en este libro, como en el CHEM, la experimentación es el vehículo para presentar la Química, tal como es hoy en día. Los principios unificadores se desarrollan a partir de la observación experimental. Así, la Química

aparece como una Ciencia y no como una masa de información. El objetivo principal de este libro es lograr fundamentalmente el hito de la Ciencia moderna: desarrollo del principio a partir de la observación.

Evaluaciones nacionales del rendimiento académico Volumen 3 Vincent Greaney, Thomas Kellaghan, 2016-03-23

Implementing a National Assessment of Educational Achievement, the third volume in the five-part National Assessments of Educational Achievement series, focuses on practical issues in the implementation of a national assessment. These include the representation of key educational stakeholders, required personnel and facilities, and the sequence of administrative activities in implementing an assessment. Particular attention is focused on sampling, such as defining the population to be assessed, elements of sampling theory, and the selection of schools and students to take part in an assessment. Readers are guided through the selection of a sample by working on a set of concrete tasks presented in the text, using data files in an accompanying CD. One section of Volume 3 is devoted to typical tasks involved in preparing, validating and managing data. Users are expected to develop competence in data preparation skills by carrying out the practical exercises in the CD. They are also shown how to complete important pre-analysis steps such as compute survey weights, calculate means and their sampling errors, and how to deal with non-responses and oversize and undersize schools. This volume is intended primarily for teams who are responsible for conducting national assessments and graduate students interested in technical aspects of large-scale surveys.
