Modernizing Educational Practice Katarzyna Papaja,Artur Swiateka,2016-02-08 Content and Language Integrated Learning (CLIL) is an innovative approach referring to educational settings where a language different from the learners' mother tongue is used as a medium of instruction. This other language is found to be used from kindergarten to the tertiary level, and the extent of its use may range from occasional foreign language texts in individual subjects to covering the whole curriculum. The changes in the technological, economic and social realities of the modern world have led, and still lead, to more frequent contact between people of different linguistic and cultural backgrounds. Globalisation has made the world interconnected; the world is rapidly becoming a mixed global village where the role of languages is extremely important. In such an integrated world, integrated learning is viewed as a modern form of educational delivery. CLIL represents an increasingly popular approach to language teaching and learning not only in Europe, but also in other countries such as Japan, Malaysia, China, and the United Arab Emirates. Even though CLIL is not of a uniform nature and varies across the world, one of the main arguments for its introduction is that it creates conditions for naturalistic language learning. This book represents selected presentations given at the Ustroń CLIL 2013 conference, which brought together academicians, researchers, teachers and educational authorities from all over the world, and provided them with the opportunity to exchange an interdisciplinary dialogue on CLIL methodologies, as well as the purely practical consequences of implementing such pedagogies in institutional educational practices at the primary, secondary or tertiary level. As such, collection embraces original contributions across a range of areas of CLIL.

How We Take Action Kelly Frances Davidson, Stacey Margarita Johnson, L. J. Randolph, 2023-05-01 *How We Take Action* brings together practical examples of social justice in language education from a wide range of contexts. Many language teachers have a desire to teach in justice-oriented ways, but perhaps also feel frustration at how hard it is to teach in ways that we did not experience ourselves as learners and have not observed as colleagues. As a profession, we need more ideas, more examples, and wider networks of allies in this work. This book includes the work of 59 different authors including teachers and researchers at every level from Pre-K to postsecondary, representing different backgrounds, languages, and approaches to classroom practice. Organized into three sections, some of the chapters in this collection report on classroom research while others focus on key practices and experiences. Section I is entitled *Inclusive and Empowering Classrooms*. In this section authors take a critical approach to classroom practices by breaking with the status quo or creating spaces where students experience safety, access, and empowerment in language learning experiences. Section II, *Integration of Critical*

Topics, addresses a variety of ways teachers can incorporate justice-oriented pedagogies in day-to-day instructional experiences. Social justice does not happen haphazardly; it requires careful, critical examination of instructional practices and intentional planning as instructors hope to enact change. Section III, Activism and Community Engagement, explores how teachers can empower students to become agents for positive change through the study of activism and constructive community engagement programs at local and global levels. ENDORSEMENTS: This volume brings an important diversity of voices, contexts, and collaborations to the ongoing conversations about social justice in language education. University experts in social justice in language education and nationally celebrated K-12 language teachers are included along with experienced practitioners whose voices are often not prioritized in scholarship. The volume serves as an invitation to the reader to engage, reflect, consider, and examine different approaches to teaching for social justice. Chapters bring in feminist pedagogies, critical pedagogies, LGBTQ affirming pedagogies, anti-bias and anti-racist approaches, decolonial lenses, critical media literacies, and more Everyone who picks up this volume will find at least one piece that immediately resonates with them, and then will be inevitably drawn in to the other engaging and thoughtful chapters. — Pamela M. Wesely, The University of Iowa This book is a must-read for those interested in social justice in language education. The range of authors, topics, languages, institutional contexts, and pedagogies is staggeringly impressive and will provide any reader with ideas and inspiration for taking action in and out of the language classroom. — Kate Paesani, University of Minnesota This excellent volume, replete with thoroughly researched strategies for promoting social justice in PK-16 world language instruction, could not have come at a more critical time in the United States when anti-democratic forces are mobilizing against equity and justice-oriented education. We in the field of language education are very fortunate to have this collection of work from more than 50 language learning scholars and practitioners, who remind us that making our classrooms more equitable, inclusive, and grounded in justice is part of doing our jobs more effectively. What's more, the volume clearly demonstrates its prioritization for inclusivity by providing robust support for those who teach young learners at the pre-kindergarten through grade 3 levels—a population woefully underrepresented in language teaching literature—and for topics that have been unjustly ignored in language education, such as racism, sexism, and the needs of LGBTQIA learners. This is a clear demonstration of the volume's uniqueness in its vast breadth of scope and attention, which is the book's most valuable feature and why it will serve our field wonderfully for many years to come. — Uju Anya, Carnegie Mellon University

Project-Based Learning Applied to the Language Classroom Juliana Franco Tavares/ Louise Emma Potter, 2018-03-05 In Project-Based Learning Applied to the Language Classroom, the authors propose a way to develop PBL in the language classrooms taking into account all of the obstacles and specifics involved in teaching a foreign language. It is about teaching English as a second or foreign language using Project-Based Learning (PBL). We approach this combination because many people seem to think about implementing PBL in their language classes and ask questions about how to do it, but feel that there aren't enough materials based on this methodology. In fact, most researchers and writers we have come across discuss the applications of PBL in the students' mother tongue to subjects such as Math, History, Literature, Social Studies, and Science. However, there are few published works about the specifics of PBL in foreign language classes. Besides, it seems obvious to us that the main difficulty in developing projects in a second or foreign language lies exactly on the fact that communication may be hindered when students do not have enough knowledge in the target language.

Children's Learning in Primary Schools Mike Cowdray, 2012-09-11 What does learning look like? What are different subjects really about? Why are transferable skills so important? How can we overcome the difficulties that children encounter in their learning? And what questions and prompts are likely to prove useful in helping children to get the most out of their lessons? The over-arching role of Teaching Assistants is to support teaching and learning in schools. To do this

effectively, they need to understand the curriculum content of all the subjects in which they provide support and know what learning outcomes are sought. This accessible book provides an overview of the knowledge, skills, understanding and attitudes that children learn in each subject in their primary years. Written with the non-subject specialist in mind, and drawing on research and best practice in the classroom, this extremely practical book aims to provide the reader with the information they need to: deliver focused lessons to individual pupils, groups, or the whole class; concentrate on the most important elements when making classroom resources; make valuable assessments of the children's learning, and keep useful records of their achievements, progress and difficulties; take a full part in discussions with colleagues – selecting objectives, devising interesting activities and delivering exciting lessons in each of the subjects. Including a wide range of examples and activities, this book will prove an invaluable companion for all students working on STLS and Foundation Degree courses, and Teaching Assistants currently working in primary schools.

Increasing Naturalness in the Language Learning Classroom Szilvia Szita, 2024-07-31 This volume links corpus research to classroom practice and critically assesses how the integration of a corpus-informed methodology affects pedagogical choices, teaching materials and classroom activities. Focusing on the language classroom, and drawing on examples from English, French, German and Hungarian, this book demonstrates that such methodology is applicable to languages with very different properties. Drawing on both larger, general and smaller, more specialised corpora, including both spoken and written data, this volume: presents the key features of natural language according to corpus linguistics, establishing principles and methods to observe and practice natural-sounding language use suggests the characteristics of a coherent, corpus-informed methodology and contrasts this with existing methodologies explores ways in which this methodology can enhance language learning and discusses the types of activities that are most effective explains how this methodology be integrated into teacher training Bridging the long-persisting gap between corpus-informed language teaching research and applied classroom reform, this book is key reading for researchers in applied linguistics and language pedagogy, as well as teacher trainers and practitioners.
