

Night Falls Fast Understanding Suicide

Donald E. Morse, Kálmán Matolcsy

Night Falls Fast Kay Redfield Jamison, 2011-01-12 Critical reading for parents, educators, and anyone wanting to understand the tragic epidemic of suicide—"a powerful book [that] will change people's lives—and, doubtless, save a few (Newsday). The first major book in a quarter century on suicide—and its terrible pull on the young in particular—Night Falls Fast is tragically timely: suicide has become one of the most common killers of Americans between the ages of fifteen and forty-five. From the author of the best-selling memoir, *An Unquiet Mind*—and an internationally acknowledged authority on depression—Dr. Jamison has also known suicide firsthand: after years of struggling with manic-depression, she tried at age twenty-eight to kill herself. Weaving together a historical and scientific exploration of the subject with personal essays on individual suicides, she brings not only her remarkable compassion and literary skill but also all of her knowledge and research to bear on this devastating problem. This is a book that helps us to understand the suicidal mind, to recognize and come to the aid of those at risk, and to comprehend the profound effects on those left behind.

Night Falls Fast Kay Redfield Jamison, 1999-03

Understanding Suicide B. Fincham, S. Langer, J. Scourfield, M. Shiner, 2011-07-26 Sociologists have debated suicide since the early days of the discipline. This book assesses that body of work and breaks new ground through a qualitatively-driven, mixed method 'sociological autopsy' of one hundred suicides that explores what can be known about suicidal lives.

Understanding Suicide in the United States Meaghan Stacy, Jay Schulkin, 2023-10-26 Integrates multiple perspectives and ecological levels to educate, destigmatize, and enhance motivation around suicide and prevention.

How Not to Kill Yourself Clancy Martin, 2024-03-26 FINALIST FOR THE KIRKUS PRIZE FOR NONFICTION • ONE OF TIME'S 100 MUST-READ BOOKS OF THE YEAR • ONE OF THE NEW YORK TIMES BOOK REVIEW'S CRITICS' PICKS • ONE OF THE BOSTON GLOBE'S 55 BOOKS WE LOVED THIS YEAR • ONE OF KIRKUS'S BEST NONFICTION BOOKS OF THE YEAR • An intimate, insightful, at times even humorous blend of memoir and philosophy that examines why the thought of death is so compulsive for some while demonstrating that there's always another solution—from the acclaimed writer and philosophy professor, based on his viral essay, "I'm Still Here." "A deep meditation that searches through Martin's past looking for answers about why he is the way he is, while also examining the role suicide has played in our culture for centuries, how it has evolved, and how philosophers have examined it." —Esquire "A rock for people who've been troubled by

suicidal ideation, or have someone in their lives who is.” —The New York Times “If you’re going to write a book about suicide, you have to be willing to say the true things, the scary things, the humiliating things. Because everybody who is being honest with themselves knows at least a little bit about the subject. If you lie or if you fudge, the reader will know.” The last time Clancy Martin tried to kill himself was in his basement with a dog leash. It was one of over ten attempts throughout the course of his life. But he didn’t die, and like many who consider taking their own lives, he hid the attempt from his wife, family, coworkers, and students, slipping back into his daily life with a hoarse voice, a raw neck, and series of vague explanations. In *How Not to Kill Yourself*, Martin chronicles his multiple suicide attempts in an intimate depiction of the mindset of someone obsessed with self-destruction. He argues that, for the vast majority of suicides, an attempt does not just come out of the blue, nor is it merely a violent reaction to a particular crisis or failure, but is the culmination of a host of long-standing issues. He also looks at the thinking of a number of great writers who have attempted suicide and detailed their experiences (such as David Foster Wallace, Yiyun Li, Akutagawa, Nelly Arcan, and others), at what the history of philosophy has to say both for and against suicide, and at the experiences of those who have reached out to him across the years to share their own struggles. The result combines memoir with critical inquiry to powerfully give voice to what for many has long been incomprehensible, while showing those presently grappling with suicidal thoughts that they are not alone, and that the desire to kill oneself—like other self-destructive desires—is almost always temporary and avoidable.

The SAGE Encyclopedia of Abnormal and Clinical Psychology Amy Wenzel, 2017-03-16 Abnormal and clinical psychology courses are offered in psychology programs at universities worldwide, but the most recent major encyclopedia on the topic was published many years ago. Although general psychology handbooks and encyclopedias include essays on abnormal and clinical psychology, such works do not provide students with an accessible reference for understanding the full scope of the field. The SAGE Encyclopedia of Abnormal and Clinical Psychology, a 7-volume, A-Z work (print and electronic formats), is such an authoritative work. Its more than 1,400 entries provide information on fundamental approaches and theories, various mental health disorders, assessment tools and psychotherapeutic interventions, and the social, legal, and cultural frameworks that have contributed to debates in abnormal and clinical psychology. Key features include: 1,400 signed articles contained in 7 volumes and available in choice of print and/or electronic formats Although organized A-to-Z, front matter includes a Reader’s Guide grouping related entries thematically Back matter includes a Chronology, Resource Guide, Bibliography, and detailed Index Entries conclude with References/Further Readings and Cross-References to related entries The Index, Reader’s Guide themes, and Cross-References between and among entries all combine to provide robust search-and-browse features in the electronic version.

Mad Muse Jeffrey Berman, 2019-09-03 Many of the well-respected scholarly studies of autobiographical writing have little or nothing to say about mental illness. This book uncovers the mysterious relationship between mood disorders and creativity

through the lives of seven writers, demonstrating how mental illness is sometimes the driving force behind creativity.

Extreme Overvalued Beliefs Tahir Rahman, 2024 *Extreme Overvalued Beliefs* makes a profound argument that most violent targeted attacks are incorrectly classified as motivated by delusions or obsessions. Drawing on exceptionally clear and vivid details of crimes such as the JFK assassination and the January 6th US Capitol attack, the monograph illuminates three easily understood cognitive drivers of targeted attacks, arguing that we must embrace these in order to thwart future incendiary acts.

The Dynamics of Murder R. Barri Flowers, 2012-11-26 In recent years, there has been a surge in school shootings, workplace homicides, hate violence, and deadly terrorist attacks in the United States. This has resulted in a greater focus on homicidal behavior, its antecedents, ways to recognize warning signs of at-risk victims and offenders, and preventive measures. It has also led to increased efforts by lawmakers to create and pass tough crime legislation as well as improved federal, state, and local law enforcement response to murder and other violent crimes. *The Dynamics of Murder: Kill or Be Killed* is a multifaceted probe of murder offenses, offenders, victims, and characteristics of homicide in American society. This book breaks new ground in homicide studies by examining issues generally ignored or neglected among researchers. Topics include murders occurring in the workplace and in schools, those perpetrated by gangs and terrorists, those incited

by bias, and intimate and intrafamilial murders. The book discusses sexual killers, serial and mass murderers, and suicide. It also examines psychological and sociological theories on murder and violence, as well as the increasing role the Internet plays in these crimes. Case studies of actual murderers are included, including serial killers Gerald and Charlene Gallego, mass murderer Byran Koji Uyesugi, the murder/suicide case of Sahel Kazemi, and the intrafamilial murders committed by Charles Stuart and Sarah Marie Johnson. A comprehensive exploration of the crime of murder in American society, this fascinating study is an essential resource for researchers, criminologists, and other professionals in a wide range of disciplines.

A Mother's Reckoning Sue Klebold, 2016-02-15 The acclaimed New York Times bestseller by Sue Klebold, mother of one of the Columbine shooters, about living in the aftermath of Columbine. On April 20, 1999, Eric Harris and Dylan Klebold walked into Columbine High School in Littleton, Colorado. Over the course of minutes, they would kill twelve students and a teacher and wound twenty-four others before taking their own lives. For the last sixteen years, Sue Klebold, Dylan's mother, has lived with the indescribable grief and shame of that day. How could her child, the promising young man she had loved and raised, be responsible for such horror? And how, as his mother, had she not known something was wrong? Were there subtle signs she had missed? What, if anything, could she have done differently? These are questions that Klebold has

grappled with every day since the Columbine tragedy. In *A Mother's Reckoning*, she chronicles with unflinching honesty her journey as a mother trying to come to terms with the incomprehensible. In the hope that the insights and understanding she has gained may help other families recognize when a child is in distress, she tells her story in full, drawing upon her personal journals, the videos and writings that Dylan left behind, and on countless interviews with mental health experts. Filled with hard-won wisdom and compassion, *A Mother's Reckoning* is a powerful and haunting book that sheds light on one of the most pressing issues of our time. And with fresh wounds from the Newtown and Charleston shootings, never has the need for understanding been more urgent. All author profits from the book will be donated to research and to charitable organizations focusing on mental health issues. — Washington Post, Best Memoirs of 2016

Madness in Contemporary British Theatre Jon Venn, 2021-08-30 This book considers the representation of madness in contemporary British theatre, examining the rich relationship between performance and mental health, and questioning how theatre can potentially challenge dominant understandings of mental health. Carefully, it suggests what it means to represent madness in theatre, and the avenues through which such representations can become radical, whereby theatre can act as a site of resistance. Engaging with the heterogeneity of madness, each chapter covers different attributes and logics, including: the constitution and institutional structures of the contemporary asylum; the cultural idioms behind hallucination; the means by which suicide is apprehended and approached; how testimony of the mad person is interpreted and encountered. As a study that interrogates a wide range of British theatre across the past 30 years, and includes a theoretical interrogation of the politics of madness, this is a crucial work for any student or researcher, across disciplines, considering the politics of madness and its relationship to performance.

The Mythic Fantasy of Robert Holdstock Donald E. Morse, Kálmán Matolcsy, 2014-01-10 Robert Holdstock was a prolific writer whose oeuvre included horror, fantasy, mystery and the novelization of films, often published under pseudonyms. These twelve critical essays explore Holdstock's varied output by displaying his works against the backdrop of folk and fairy tales, dissecting their spatiotemporal order, and examining them as psychic fantasies of our unconscious life or as exempla of the sublime. The individual novels of the Mythago Wood sequence are explored, as is Holdstock's early science fiction and the Merlin Codex series.

Behavioural Analysis of Crime Donna Youngs, 2016-04-15 The intense interest in 'offender profiling' generated by FBI special agents, gave rise to an explosion of studies in a new area called 'investigative psychology' by its originator David Canter. This develops understanding of offenders' behaviour that can be harnessed to improve investigations. In this rapidly developing area much has been learnt about what offenders reveal about themselves through their styles of offending. Beyond criminals' actions the location of their crimes can also reveal where the offender lives or which offences can be linked as part of the same series. Investigative psychologists also explore how to interview witnesses and suspects and assess

the veracity of accounts given. The variation in criminal style across crimes as diverse as arson, burglary, hostage negotiation, serial killing and sexual assault is reviewed, using narrative theory and criminals' emotional experience when offending as the basis for explaining these variations. This provides a framework for drawing inferences about offenders' characteristics. Studies in investigative psychology require a special methodology, developed by David Canter to allow scientific explorations in such a challenging field, previously assumed not to be open empirical study. The practical potential and applications of the research are given, as well as a selection of commentaries on the cutting edge debates that are driving the future of the investigative psychology. This new discipline is of relevance to forensic psychologists in many different settings, criminologists and law enforcement agencies, bringing together work that lays out current achievements and sets the agenda for future research in the field.

The American Psychiatric Publishing Textbook of Suicide Assessment and Management Robert I. Simon, Robert E. Hales, 2007-04-02 Providing clinically useful information for mental health professionals encountering patients at risk, The American Psychiatric Publishing Textbook of Suicide Assessment and Management calls on the authority of 40 expert contributors reflecting a wide range of clinical and forensic experience.

Suicidal Jesse Bering, 2020-10-23 For much of his thirties, Jesse Bering thought he was probably going to kill himself. He was a successful psychologist and writer, with books to his name and bylines in major magazines. But none of that mattered. The impulse to take his own life remained. At times it felt all but inescapable. Bering survived. And in addition to relief, the fading of his suicidal thoughts brought curiosity. Where had they come from? Would they return? Is the suicidal impulse found in other animals? Or is our vulnerability to suicide a uniquely human evolutionary development? In *Suicidal*, Bering answers all these questions and more, taking us through the science and psychology of suicide, revealing its cognitive secrets and the subtle tricks our minds play on us when we're easy emotional prey. Scientific studies, personal stories, and remarkable cross-species comparisons come together to help readers critically analyze their own doomsday thoughts while gaining broad insight into a problem that, tragically, will most likely touch all of us at some point in our lives. But while the subject is certainly a heavy one, Bering's touch is light. Having been through this himself, he knows that sometimes the most effective response to our darkest moments is a gentle humor, one that, while not denying the seriousness of suffering, at the same time acknowledges our complicated, flawed, and yet precious existence. Authoritative, accessible, personal, profound—there's never been a book on suicide like this. It will help you understand yourself and your loved ones, and it will change the way you think about this most vexing of human problems.
