Química Theodore Lawrence Brown,2014 Química, la ciencia central ha sido el texto líder en química general durante décadas debido a la claridad de su redacción, su exactitud científica y su enfoque actualizado, así como por sus ejercicios sólidos y su consistencia en el nivel de cobertura. La decimosegunda edición es resultado de la revisión más ambiciosa de este libro hasta el momento, y de la incorporación de nuevas ideas sobre cómo enseñar química, sin perder las características relevantes que han distinguido a este libro. Los elementos gráficos se mejoraron para hacer accesible la química mediante la visualización de conceptos. Los diseños nuevos en las ilustraciones integran más estrechamente los materiales fotográficos en las figuras que transmiten los principios químicos, en tanto que la nueva sección titulada IMAGINE formula preguntas para contestarse al examinar las figuras. Cuenta asimismo con descripciones de estrategias de resolución de problemas y destaca muchas aplicaciones importantes de la química en la vida cotidiana. Química, la ciencia central ofrece las bases de la química moderna apoyadas en una serie de nuevas metodologías como el uso de Internet y de herramientas web, particularmente de MasteringChemistry®.
