*Diccionario de instrumentos musicales* Ramón Andrés,1995-01-01

**Diccionario de instrumentos musicales** Ramón Andrés,John Eliot Gardiner,2001 La música es uno de los patrimonios más valiosos y decisivos de la cultura occidental. Conocer sus raíces nos conduce al origen de un arte tan profundo como enigmático, y a familiarizarnos con nuestro propio pasado como civilización. La idea que preside la presente obra, original y única por su naturaleza, es ofrecer al lector la historia y evolución de los instrumentos musicales desde la Antigüedad hasta el meridiano del siglo XVIII, instrumentos que han sido y son trascendentes para el devenir de la música y destinatarios de un extraordinario repertorio que todavía está siendo descubierto por el gran público. Paradójicamente, la recuperación de la llamada «música antigua» constituye hoy uno de los rasgos más definitorios y relevantes del mundo musical. Prologadas por John Eliot Gardiner, estas páginas son un verdadero rescate en el que muchos compositores y obras de primera magnitud, constructores de instrumentos y teóricos que dieron el mayor esplendor al bien llamado arte de las Musas, vuelven a erigirse como protagonistas de un inigualable tesoro cultural. Actualizado con muchas nuevas entradas, revisado y corregido por el autor, este valioso diccionario, que ofrece una ingente información, cuenta, además, con unos detallados apéndices que muestran la relación entre música, pintura y literatura. Esta obra es una referencia imprescindible para los amantes de la música que, además, incluye no sólo la presencia de instrumentos cultos, sino también los folclóricos, que han contribuido a ese inestimable bien de los pueblos que es la música.

Los instrumentos musicales Alessandro Pierozzi, 2018-04-05 En un singular recorrido que conducirá al lector desde los albores de la humanidad hasta nuestros días, Alessandro Pierozzi lleva a cabo un dilatado y emocionante viaje en busca de la historia, desarrollo y repercusión de los medios por los que la música se hace escuchar: los instrumentos musicales. Técnica, construcción, acústica, formas de tocar, intérpretes, escuelas...: viento, cuerda, percusión. Estas páginas son el resultado de una intensa labor documental, de experiencias y conocimientos personales del autor y de aportaciones que notables solistas y profesores han transmitido con indudable generosidad. Como explica el director de orquesta Juan de Udaeta en el prólogo, «estamos ante una obra y un trabajo verdaderamente impresionantes de rigor y erudición que pretenden acercar al lector, sea músico o amante de la música, a la intrahistoria del arte musical». Un libro que, en expresión de Beethoven, rompe el silencio para mejorarlo.

The Musical Heritage of Al-Andalus Dwight Reynolds, 2020-12-31 The Musical Heritage of Al-Andalus is a critical account of the history of Andalusian music in Iberia from the Islamic conquest of 711 to the final expulsion of the Moriscos (Spanish Muslims converted to Christianity) in the early 17th century. This volume presents the documentation that has come down to us, accompanied by critical and detailed analyses of the sources written in Arabic, Old Catalan, Castilian, Hebrew, and Latin. It is also informed by research the author has conducted on modern Andalusian musical traditions in Morocco, Algeria, Tunisia, Egypt, Lebanon and Syria. While the cultural achievements of medieval Muslim Spain have been the topic of a large number of scholarly and popular publications in recent decades, what may arguably be its most enduring contribution – music – has been almost entirely neglected. The overarching purpose of this work is to elucidate as clearly as possible the

many different types of musical interactions that took place in medieval Iberia and the complexity of the various borrowings, adaptations, hybridizations, and appropriations involved.

*Manual de traducción inglés-castellano* Juan Gabriel López Guix,Jacqueline Minett Wilkinson,2019-11-26 Este manual ofrece una visión panorámica de la práctica traductora. Por medio de un enfoque deductivo, que va desde lo más general hasta lo más particular, propone un recorrido que se inicia en los aspectos más teóricos relacionados con la filosofía y el lenguaje; pasa por las características específicas de las dos lenguas de trabajo, así como por las principales líneas de reflexión teóricas sobre la traducción; y finaliza en una sistematización de los problemas con los que se ve constantemente enfrentado el traductor, al tiempo que se presentan algunas soluciones en un ámbito en el que abundan las excepciones.
