QuickRead, Lea Schullery

**The Black Swan** Nassim Nicholas Taleb, 2007-04-17 The Black Swan is a standalone book in Nassim Nicholas Taleb's landmark Incerto series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don't understand. The other books in the series are Fooled by Randomness, Antifragile, and The Bed of Procrustes. A black swan is a highly improbable event with three principal characteristics: It is unpredictable; it carries a massive impact; and, after the fact, we concoct an explanation that makes it appear less random, and more predictable, than it was. The astonishing success of Google was a black swan; so was 9/11. For Nassim Nicholas Taleb, black swans underlie almost everything about our world, from the rise of religions to events in our own personal lives. Why do we not acknowledge the phenomenon of black swans until after they occur? Part of the answer, according to Taleb, is that humans are hardwired to learn specifics when they should be focused on generalities. We concentrate on things we already know and time and time again fail to take into consideration what we don't know. We are, therefore, unable to truly estimate opportunities, too vulnerable to the impulse to simplify, narrate, and categorize, and not open enough to rewarding those who can imagine the "impossible." For years, Taleb has studied how we fool ourselves into thinking we know more than we actually do. We restrict our thinking to the irrelevant and inconsequential, while large events continue to surprise us and shape our world. In this revelatory book, Taleb explains everything we know about what we don't know, and this second edition features a new philosophical and empirical essay, "On Robustness and Fragility," which offers tools to navigate and exploit a Black Swan world. Elegant, startling, and universal in its applications, The Black Swan will change the way you look at the world. Taleb is a vastly entertaining writer, with wit, irreverence, and unusual stories to tell. He has a polymathic command of subjects ranging from cognitive science to business to probability theory. The Black Swan is a landmark book—itsself a black swan. Praise for Nassim Nicholas Taleb "The most prophetic voice of all."—GQ Praise for The Black Swan "[A book] that altered modern thinking."—The Times (London) "A masterpiece."—Chris Anderson, editor in chief of Wired, author of The Long Tail "Idiosyncratically brilliant."—Niall Ferguson, Los Angeles Times "The Black Swan changed my view of how the world works."—Daniel Kahneman, Nobel laureate "[Taleb writes] in a style that owes as much to Stephen Colbert as it does to Michel de Montaigne. . . . We eagerly romp with him through the follies of confirmation bias [and] narrative fallacy."—The Wall Street Journal "Hugely enjoyable—compelling . . . easy to dip into."—Financial Times "Engaging . . . The Black Swan has

appealing cheek and admirable ambition.”—The New York Times Book Review From the Hardcover edition.

*The Black Swan* Mercedes Lackey, 2000-05-01 After his wife's untimely death, a powerful sorcerer dedicates his life to seeking revenge against all womankind. He turns his captives into beautiful swans—who briefly regain human form by the fleeting light of the moon. Only Odette, noblest of the enchanted flock, has the courage to confront her captor. But can she gain the allies she needs to free herself and the other swan-maidens from their magical slavery? A monumental tale of loyalty and betrayal, of magic good and evil, of love both carnal and pure, and of the duality of human nature, *The Black Swan* is a rich tapestry which is sure to become an all-time masterpiece of fantasy.

*The Black Swan: Second Edition* Nassim Nicholas Taleb, 2010-05-11 The most influential book of the past seventy-five years: a groundbreaking exploration of everything we know about what we don't know, now with a new section called “On Robustness and Fragility.” A black swan is a highly improbable event with three principal characteristics: It is unpredictable; it carries a massive impact; and, after the fact, we concoct an explanation that makes it appear less random, and more predictable, than it was. The astonishing success of Google was a black swan; so was 9/11. *The Black Swan* Rafael Sabatini, 1932

**The Black Swan** Raphael Sabatini, 2014-11-30 When Priscilla Harradine travels back to England on the Centaur she has no cause to expect her journey will be remotely eventful. But also on board is Charles de Bernis – a mysterious and intriguing buccaneer. Just as their friendship blossoms, a dark figure from de Bernis' past emerges to propel them into a thrilling and perilous adventure.

*The Black Swan* Philippa Carr, 1990

**The Black Swan** Eric Lybeck, 2017-07-05 Europeans once thought all swans were white, and white' was part of how they defined 'swan.' Then black swans were discovered, and the definition changed forever. In his 2007 book, Nicholas Taleb says the black swans of his title can appear at any time, in the form of financial crises, wars, and other unexpected events that have profound, irreversible consequences. He draws on philosophy, mathematics and economics to explain why we seldom prepare for these events adequately. The way our brains process knowledge, combined with the conventions of statistical modeling, lull us into believing the future will resemble the past. We must beware of, and be prepared for, the unexpected. Book jacket.

*Summary of The Black Swan By Nassim Nicholas Taleb - The Impact of the Highly Improbable* Ctprint, 2020-03-03

Summary of *The Black Swan* By Nassim Nicholas Taleb - *The Impact of the Highly Improbable* SYNOPSIS: *The Black Swan* (2010) offers insights into perceived randomness and the limitations we face in making predictions. Our over-reliance on methods that appeal to our intuition at the expense of accuracy, our basic inability to understand and define randomness, and even our biology itself all contribute to poor decision making, and sometimes to Black Swans - events thought to be impossible that redefine our understanding of the world. ABOUT THE AUTHOR: Nassim Nicholas Taleb is among the more prolific contemporary economists and thinkers, having written a number of critically acclaimed works such as *Fooled by Randomness*, and his numerous essays have been published in a number of magazines and journals. Taleb is a Distinguished Professor of Risk Engineering at New York University's Polytechnic Institute. DISCLAIMER: This book is not meant to replace the original book but to serve as a companion to it.

**Summary of The Black Swan by Nassim Nicholas Taleb** QuickRead, Lea Schullery, *The Impact of the Highly Improbable*. Just because you haven't seen something doesn't mean it doesn't exist, right? Well, Nassim Nicholas Taleb uses this exact logic to explain the Black Swans that happen in our society. A Black Swan is an improbable or highly unlikely event that has three principal characteristics. The first two are that it is unpredictable and it carries a massive impact. The third is the ability to construct an explanation after the fact to make it appear less random, and more predictable. Think of events like 9/11 or the invention of Google. These Black Swans, while unpredictable and impactful, could easily be explained in the moments following the event. Black Swans like these underlie almost everything about the world. But why can't we acknowledge them until after they occur? Well, according to Taleb, humans are simply hardwired to focus on the details rather than see the big picture. We concentrate only on what we know and understand; therefore, we are unable to conceptualize the impossible. As you read, you'll learn that we can learn a thing or two from turkeys, you'll see how a casino's greatest threat isn't high-rolling gamblers, and how focusing on what we don't know is critical for making informed decisions. **Summary of The Black Swan** ,2022-12-01 Summary of The Black Swan - a black swan is an extremely unlikely incident with three main characteristics: It's unpredictable; it has a significant impact; and, after the event, we construct an explanation that makes it appear less random and more predictable than it actually was. Google's meteoric rise, as 9/11, were black swan events. Black swans underpin essentially everything in our world, from the formation of religions to personal events. This summary will show you the main ideas of the book. Why do we wait until black swans appear before acknowledging their existence? Part of the answer is that humans are built to learn specifics when they should be learning generalities. We tend to focus on what we already know and frequently overlook what we don't know. As a result, we are unable to accurately assess opportunities, are too prone to the urge to simplify, narrate, and categorize, and are unable to reward people who can envision the impossible.
