William J. Federer, William Joseph Federer

Von Braun Michael Neufeld, 2008-11-11 Curator and space historian at the Smithsonian's National Air and Space Museum delivers a brilliantly nuanced biography of controversial space pioneer Wernher von Braun. Chief rocket engineer of the Third Reich and one of the fathers of the U.S. space program, Wernher von Braun is a source of consistent fascination. Glorified as a visionary and vilified as a war criminal, he was a man of profound moral complexities, whose intelligence and charisma were coupled with an enormous and, some would say, blinding ambition. Based on new sources, Neufeld's biography delivers a meticulously researched and authoritative portrait of the creator of the V-2 rocket and his times, detailing how he was a man caught between morality and progress, between his dreams of the heavens and the earthbound realities of his life.

America's God and Country William J. Federer, William Joseph Federer, 1994 An Invaluable resource highlighting America's noble heritage, profound quotes from founding fathers, presidents, statesmen, scientists, constitutions, court decisions ... for use in speeches, papers, debates, essays ...

The Nazi Rocketeers Dennis Piskiewicz, 2007 Explores the development of the V-2 rocket. A sobering testimony to the consequences of corrupted genius.

Random Thoughts on Life, Love, Laughter and Living for Jesus Dave Maynard, 2021-09-22 This book was a long time coming. God had to take me through a lifetime of learning to prepare me for writing this book. There are three areas that He impressed upon me to write about. The first was to write about the life lessons that He has taught me. Things like how to be a better, more loving husband, how to take control of my life by planning for and accomplishing things, and how to use the gifts He has given me. The second was to make apologetics understandable. Apologetics is rationally and credibly defending the faith. I've had a passion for this ever since I've been a believer. Christianity is not just subjectively true. It's objectively true. It is factually true and can be proven so beyond a reasonable doubt. The third was to highlight some of the lesser-known Christians and how God used them to make a difference in our world. I hope the lessons contained in this book will bless you, as they have blessed me in learning them. But even more than that, I hope they will draw you closer to Jesus.

Destined for the Stars Catherine L. Newell, 2019-06-05 Where did humanity get the idea that outer space is a frontier waiting to be explored? *Destined for the Stars* unravels the popularization of the science of space exploration in America

between 1944 and 1955, arguing that the success of the US space program was due not to technological or economic superiority, but was sustained by a culture that had long believed it was called by God to settle new frontiers and prepare for the inevitable end of time and God's final judgment. Religious forces, Newell finds, were in no small way responsible for the crescendo of support for and interest in space exploration in the early 1950s, well before Project Mercury—the United States' first human spaceflight program—began in 1959. In this remarkable history, Newell explores the connection between the art of Chesley Bonestell—the father of modern space art whose paintings drew inspiration from depictions of the American West—and the popularity of that art in Cold War America; Bonestell's working partnership with science writer and rocket expert Willy Ley; and Ley and Bonestell's relationship with Wernher von Braun, father of both the V-2 missile and the Saturn V rocket, whose millennial conviction that God wanted humankind to leave Earth and explore other planets animated his life's work. Together, they inspired a technological and scientific faith that awoke a deep-seated belief in a sense of divine destiny to reach the heavens. The origins of their quest, Newell concludes, had less to do with the Cold War strife commonly associated with the space race and everything to do with the religious culture that contributed to the invention of space as the final frontier.

Thinking about Science Ferric C. Fang, Arturo Casadevall, 2023-10-09 Thinking about Science: Good Science, Bad Science, and How to Make It Better A riveting exploration of the world of science, diving headfirst into its triumphs and tribulations. Penned by seasoned microbiologists Ferric C. Fang and Arturo Casadevall, this book offers a comprehensive analysis of the scientific enterprise through various lenses, including historical, philosophical, and personal. From their unique vantage points as researchers, clinicians, and educators, Fang and Casadevall dissect the intricate mechanisms of science, shedding light on its strengths and weaknesses. Through engaging historical anecdotes, personal narratives, and insightful academic studies, they present a candid evaluation of science's performance, including a thought-provoking examination of its role during the COVID-19 pandemic. A must-read for anyone curious about the present predicaments and future potential of science, *Thinking about Science: Good Science, Bad Science, and How to Make It Better* is more than just a book; it's a roadmap to understanding and improving the scientific endeavor for the benefit of society at large. The authors have given us a thoughtful description of science and the joy of discovery, an unflinching diagnosis of where improvements are needed, and recommendations for remedies well worth considering. Scientists, science and society would benefit if this book were read by both future and established scientists, as well as the administrators, policymakers, and regulators who are in a position to help us do better. Michael Kalichman, UC San Diego With a deep understanding of the profound impact of

science on society, the authors provide thought-provoking perspectives on changes in the scientific enterprise that will support sustainable, equitable practices, and engender public trust. An engaging read for everyone with an interest in science or science policy. Stanley Maloy, San Diego State University

Messing About in Quotes Gyles Brandreth, 2018-10-04 Become a dazzling wit or enjoy a good laugh with this entertaining collection of humorous quotations, carefully handpicked and edited by writer and broadcaster Gyles Brandreth. From Art to Bores, Tennis to Wine, this little dictionary contains over 2,700 of the best quotations, from witty one-liners and funny phrases to pithy comments and unintended humour. If you live to be one hundred you've got it made. Very few people die past that age. - George Burns I thought coq au vin was love in a lorry. - Victoria Wood Champagne, if you are seeking the truth, is better than a lie-detector. - Graham Greene The trouble with a book is that you never know what's in it until it's too late. - Jeanette Winterson

New Food Product Development Gordon W. Fuller, 1994-02-23 This book provides an objective overview of the hectic, often chaotic, and frequently unpredictable new food product development process. The stages of development are described from the vantage points of the technologist, marketer, and senior management by an author who has worn all three hats. The book covers the various stages of product development, including generating and sifting ideas against the company's objectives, the consumers' perceived needs and expectations, the competitiveness of the marketplace, the technologist's ability to create and manufacture a safe product within budget, and test marketing. Problems facing both small and large companies are confronted and solutions are proposed. Test marketing and the evaluation of such tests are discussed with some new suggestions for interpreting the criteria used. A chapter on organization presents ideas for fostering creativity and avoiding communication and personality conflicts. Trends in new ingredients and technologies to assist in the design of new products are given full coverage. The last chapter is devoted to the future, with stimulating discussion of new challenges to current trends in the industry.

Chart Shapes Wanda Sellar, 2021-01-29 Do you know the Bowl from the Basket shape in a natal chart? Did you realise just how much information you can gain from examining the actual pattern of the planets in the chart? No matter how knowledgeable we are about astrology, natal chart analysis can still present a challenge - however, understanding chart shapes could make all the difference. In this fascinating study, Wanda Sellar pinpoints an effective route into the astrological labyrinth using a concept which was pioneered by Marc Edmund Jones and then followed by Robert Jansky in the last century. Each chart shape has its own central theme: a Locomotive shape has its starting point with the leading planet which may be in any house or sign, a See-Saw shape begins with the core opposition, a Wedge with the confining trine. Not all charts fit neatly into one of the idealised patterns, and those that take a little coaxing are still a revelation in interpretation. Sometimes it is the planet that stands outside the idealised shape that reveals the core of the personality. This treasure trove

includes a multitude of worked case histories, including Arnold Schwarzenegger, Mata Hari, George Blake, Bobby Fischer, Harrison Ford and Agatha Christie. This fascinating and accessible book is suitable for all levels.

Rockets Into Space Frank H. Winter, 1990 Since ancient times, men and women have dreamed of soaring among the stars, but only in this century has that dream been realized. In *Rockets into Space*, Frank Winter tells the fascinating story of the modern launch vehicle, from the mythological musings of the Babylonians and Greeks to the present-day reality of manned and unmanned space flight. In concise yet comprehensive chapters dense with anecdotal detail, Winter tracks the theoretical formulations and technological breakthroughs that have charted the evolution of rocket propulsion and vehicle design. He pays particular attention to the remarkable contributions of pioneers Konstantin Tsiolkovsky, Robert Goddard, Hermann Oberth, Eugen Sänger, and Sergei Korolev, whose genius and vision paved the way for later innovation. He describes the clandestine development of the V-2 rocket in Germany, under the technical leadership of Wernher von Braun, and its dramatic impact on postwar rocket research and satellite development in the United States and the Soviet Union. He also chronicles the complex events of the last three decades, which have produced ever more sophisticated rockets capable of launching larger payloads, from weapons to weather and communications satellites. Finally, he surveys exotic propulsion systems--nuclear, electric, solar, photon, laser--that lie on the frontiers of science today but that will shape the spaceflight and space policy decisions of tomorrow. *Rockets into Space* is an authoritative, entertaining guidebook for all who are interested in the history of space travel.

More Everything Forever Adam Becker, 2025-04-22 This wild and utterly engaging narrative (Melanie Mitchell) shows why Silicon Valley's heartless, baseless, and foolish obsessions—with escaping death, building AI tyrants, and creating limitless growth—are about oligarchic power, not preparing for the future Tech billionaires have decided that they should determine our futures for us. According to Elon Musk, Jeff Bezos, Sam Altman, and more, the only good future for humanity is one powered by technology: trillions of humans living in space, functionally immortal, served by superintelligent AIs. In *More Everything Forever*, science journalist Adam Becker investigates these wildly implausible and often profoundly immoral visions of tomorrow—and shows why, in reality, there is no good evidence that they will, or should, come to pass. Nevertheless, these obsessions fuel fears that overwhelm reason—for example, that a rogue AI will exterminate humanity—at the expense of essential work on solving crucial problems like climate change. What's more, these futuristic visions cloak a hunger for power under dreams of space colonies and digital immortality. The giants of Silicon Valley claim that their ideas are based on science, but the reality is darker: they come from a jumbled mix of shallow futurism and racist pseudoscience. *More Everything Forever* exposes the powerful and sinister ideas that dominate Silicon Valley, challenging us to see how

foolish, and dangerous, these visions of the future are.

The Mystery of Life What'S It All About? David E. Peebles,2018-03-15 Have you ever seriously considered the most difficult and puzzling questions presented to our minds during this mortal sojourn through an often difficult and challenging existence? Who am I? Where did I come from? Why am I here? Where am I going? And perhaps the most important question of all: What is my purpose for living? In this ultra-modern, digital world of today many people have become so preoccupied with the daily pursuits of life and the addictive overuse of time-consuming technology that many of them rarely pause to seriously consider what life is actually all about. In writing The Mystery of Life it has been my hope and my goal to personally challenge each reader to consider many relevant facts and to follow a line of evidence pointing toward a worldview that is often overlooked and too easily marginalized. We live in an aggressive, technology-driven world where the wild pursuit of power, prestige, possession, and pleasure has become the driving influence ruling over many of our lives. What does your worldview look like? Is there enough evidence to support it beyond reasonable doubt? If not, then I invite you to consider a vast body of mounting evidence that could lead toward a more accurate discernment of an often confusing existence. The view of life that we have each come to know will strongly influence everything we do, say, and become in this world. Based on a remarkable consensus of evidence, perhaps we should consider a worldview understanding that will ultimately avail our hearts and minds of the personal fulfillment and satisfaction we have always longed for and often dreamed of. We owe it to ourselves to seriously consider where the evidence is leading us. Isn't it about time to discover the answers to our most persistent and pressing questions. The Mystery of Life is presented as a literary expose addressing the questions of origin, meaning, morality and destiny.

Essentials of Clinical Research Stephen P. Glasser,2014-06-02 In its extensively revised and updated Second Edition, this book provides a solid foundation for readers interested in clinical research. Discussion encompasses genetic, pharmacoepidemiologic and implementation research. All chapters have been updated with new information and many new tables have been added to elucidate key points. The book now offers discussion on how to handle missing data when analyzing results, and coverage of Adaptive Designs and Effectiveness Designs and new sections on Comparative Effectiveness Research and Pragmatic Trials. Chapter 6 includes new material on Phase 0 Trials, expanded coverage of Futility Trials, a discussion of Medical Device approval, Off Label Drug use and the role of the FDA in regulating advertising. Additional new information includes the role of pill color and shape in association with the placebo effect and an examination of issues surrounding minority recruitment. The final chapter offers a new section on manuscript preparation along with a discussion of various guidelines being adopted by journals: CONSORT, STROBE, PRISMA, MOOSE and others; and coverage of Conflicts of Interest, Authorship, Coercive Citation, and Disclosures in Industry-Related Associations. Building on the

strengths of its predecessor in its comprehensive approach and authoritative advice, the new edition offers more of what has made this book a popular, trusted resource for students and working researchers alike.

Congressional Record United States. Congress,1977 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Building Hitler's Missiles Volkhard Bode, Gerhard Kaiser, 2008 The Aggregat 4 (A4) was the German Wehrmacht's first long range missile, regarded as suitable for war use since 1940. Werner von Braun, had been working towards a rocket capable of bearing a 750kg explosive charge over a minimum distance of 200 to 300 kilometers, hitting the enemy target with the greatest possible accuracy. The primary purpose of the Aggregat 4 was to terrorize the British, reducing London to rubble. This book provides a unique account of the development and combat history of Hitler's devastating missiles, detailing a wealth of previously unseen material, making this book a must for World War II historians and enthusiasts of strategic analysis alike. 100 photos
