Li Shiqiao

City of Darkness Greg Girard, Ian Lambot, Charles Goddard, 1993 A photographic record of Kowloon Walled City - a city within a city, now demolished and its 35,000 inhabitants rehoused. Containing interviews and commentary, the book tells the city's history, and how the self-sufficient community lived and worked in so little space in such apparent harmony.

Fallen Glory James Crawford, 2017-03-07 "A narrative that spans seven millennia, five continents and even reaches into cyberspace. . . . I savored each page." —Henry Petroski, Wall Street Journal In *Fallen Glory*, James Crawford uncovers the biographies of some of the world's most fascinating lost and ruined buildings, from the dawn of civilization to the cyber era. The lives of these iconic structures are packed with drama and intrigue, featuring war and religion, politics and art, love and betrayal, catastrophe and hope. They provide the stage for a startling array of characters, including Gilgamesh, the Cretan Minotaur, Agamemnon, Nefertiti, Genghis Khan, Henry VIII, Catherine the Great, Adolf Hitler, and even Bruce Springsteen. The twenty-one structures Crawford focuses on include The Tower of Babel, The Temple of Jerusalem, The Library of Alexandria, The Bastille, Kowloon Walled City, the Berlin Wall, and the Twin Towers of the World Trade Center. Ranging from the deserts of Iraq, the banks of the Nile and the cloud forests of Peru, to the great cities of Jerusalem, Istanbul, Paris, Rome, London and New York, *Fallen Glory* is a unique guide to a world of vanished architecture. And, by picking through the fragments of our past, it asks what history's scattered ruins can tell us about our own future. "Witty and memorable . . . moving as well as myth-busting." —Times Literary Supplement (UK) "[An] elegant, charged book . . . A well-written prize for students of history, archaeology, and urban planning." —Kirkus Reviews, starred review "Astute, entertaining, and affecting." —Booklist "A lovely, wise book." —Alexander McCall Smith, New Statesman (UK) "A cabinet of curiosities, a book of wonders

with unexpected excursions and jubilant and haunting marginalia.” —Spectator (UK)

The Art of Systems Architecting Mark W. Maier, Eberhardt Rechtin, 2025-06-05 The Art of Systems Architecting, Fourth Edition, provides structured heuristics to improve the least structured, most art-like elements of systems design. It offers unique techniques to bridge the difference between scientific engineering and qualitative design along with comprehensive methods for combining architectural design with digital engineering. This book illustrates how to go from model-based systems architecture to model-based systems engineering and includes case studies of good and bad architectural decision-making in major systems. Changes to this edition include materials on architecture processes, architecture description frameworks, and integration with model-based systems engineering (MBSE) and digital engineering. The publication of the ANSI/IEEE 1471 and ISO/IEC 42010 standards on architecture description has provided common vocabulary and organizing methods for documenting architectures. This edition provides a practical application of these standards in architecting and integrating their concepts with a simple process framework. The rise of MBSE and digital engineering tools is in the process of revolutionizing the development of complex systems. The emphasis has been on detailed design descriptions and powerful analysis methods (for example, digital twins). Architects can make effective use of these methods and tools as well, and this new edition provides an integrated set of heuristics and modeling methods to do so. There are many other improvements and additions included to bring this textbook up to date. This book can be used as a reference book for engineers and managers involved in creating new systems, people responsible for developing mandated architecture descriptions, software architects, system architects, and systems engineers, or as a textbook in graduate engineering courses. Exercises are interspersed throughout the text, with some designed for self-testing and understanding and others intended to provide opportunities for long-term study and further exploration of the subject.

City P.D. Smith, 2012-06-19 For the first time in the history of the planet, more than half the population - 3.3 billion people - are now living in cities. Two hundred years ago only 3 per cent of the world's population were urbanites, a figure that had remained fairly stable (give or take the occasional plague) for about 1000 years. By 2030, 60 per cent of us will be urban dwellers. *City* is the ultimate handbook for the archetypal city and contains main sections on 'History', 'Customs and Language', 'Districts', 'Transport', 'Money', 'Work', 'Tourist Sites', 'Shops and markets', 'Nightlife', etc., and mini-essays on anything and everything from Babel, Tenochtitlán and Ellis Island to Beijing, Mumbai and New York, and from boulevards, suburbs, shanty towns and favelas, to skylines, urban legends and the sacred. Drawing on a wide range of examples from cities across the world and throughout history, it explores the reasons why people first built cities and why urban populations are growing larger every year. *City* is illustrated throughout with a range of photographs, maps and other illustrations.

The Urban Condition Ghent Urban Studies Team, 1999 What does the Western city at the end of the twentieth century look like? How did the modern metropolis of congestion and density turn into a posturban or even postsuburban cityscape?

What are edge cities and technoburbs? How has the social composition of cities changed in the postwar era? What do gated communities tell us about social fragmentation? Is public space in the contemporary city being privatized and militarized? How can the urban self still be defined? What role does consumer aestheticism have to play in this? These and many more questions are addressed by this uniquely conceived multidisciplinary study. The Urban Condition seeks to interfere in current debates over the future and interpretation of our urban landscapes by reuniting studies of the city as a physical and material phenomenon and as a cultural and mental (arte)fact. The Ghent Urban Studies Team responsible for the writing and editing of this volume is directed by Kristiaan Versluys and Dirk De Meyer at the University of Ghent, Belgium. It is an interdisciplinary research team of young academics that further consists of Kristiaan Borret, Bart Eeckhout, Steven Jacobs, and Bart Keunen. The collective expertise of GUST ranges from architectural theory, urban planning, and art history to philosophy, literary criticism and cultural theory.

Outlaws and Spies Conor McCarthy, 2020-03-18 Conor McCarthy shows how outlaw literature and espionage literature critique the use of legal exclusion as a means of supporting state power. Texts discussed range from the medieval Robin Hood ballads, Shakespeare's history plays and the Ned Kelly story to John le Carré, Don DeLillo, Ciaran Carson and William Gibson.

Architectural Exaptation Alessandro Melis, Telmo Pievani, Jose Antonio Lara-Hernandez, 2024-03-29 *Architectural Exaptation: When Function Follows Form* focuses on the significance and the originality of the study of exaptation. It presents exaptation as an opportunity to extend architectural design towards more sustainable approaches aimed at enforcing urban resilience. The use of exaptation's definition in architecture supports the heuristic value of cross-disciplinary studies on biology and architecture, which seem even more relevant in times of global environmental crises. This book aims to make a critique of the pre-existing and extensive paternalistic literature. Exaptation will be described as a functional shift of a structure that already had a prior, but different, function. In architecture, a functional shift of a structure that already had a function may apply to forms of decorative elements embedded in architectural components, and to both change of function of tectonic elements and the change of use of an architectural space. The book is illustrated with examples from around the globe, including China, Italy, Mexico, New Zealand, the USA and the UK, and looks at different civilizations and diverse historical periods, ranging from the urban to the architectural scale. Such examples highlight the potential and latent human creative capacity to change the use and functions, something that cities and buildings could consider when facing disturbances. Exaptation is shown as an alternative narrative to the simplifications of evolutionary puritanism. It also offers an innovative perspective and presents an opportunity to re-think the manner in which we design and redesign our cities. This book will be of interest to architecture, planning, urban design and biology researchers and students. Winner of the

'Gerd Albers Award 2024'. This award is for the best book contribution in the field of Urban Planning and is awarded by International Society of City and Regional Planners (ISOCARP).

Digital Culture & Society (DCS) Annika Richterich, Karin Wenz, Pablo Abend, Mathias Fuchs, Ramón Reichert, 2017-06-15 Digital Culture & Society is a refereed, international journal, fostering discussion about the ways in which digital technologies, platforms and applications reconfigure daily lives and practices. It offers a forum for inquiries into digital media theory, methodologies, and socio-technological developments. The fourth issue Making and Hacking sheds light on the communities and spaces of hackers, makers, DIY enthusiasts, and 'fabbers'. Academics, artists, and hackerspace members examine the meanings and entanglements of maker and hacker cultures – from conceptual, methodological as well as empirical perspectives. With contributions by Sabine Hielscher, Jeremy Hunsinger, Kat Braybrooke, Tim Jordan, among others, and an interview with Sebastian Kubitschko.

Understanding the Chinese City Li Shiqiao, 2014-04-29 This book teaches us to read the contemporary Chinese city. Li Shiqiao deftly crafts a new theory of the Chinese city and the dynamics of urbanization by: exploring the rise of stories of labour, finance and their hierarchies examining how the Chinese city has been shaped by the figuration of the writing system analyzing the continuing importance of the family and its barriers of protection against real and imagined dangers demonstrating how actual structures bring into visual being the networks of safety in personal and family networks. Understanding the Chinese City elegantly traces a thread between ancient Chinese city formations and current urban organizations, revealing hidden continuities that show how instrumental the past has been in forming the present. Rather than becoming obstacles to change, ancient practices have become effective strategies of adaptation under radically new terms.

The Making of Hong Kong Barrie Shelton, Justyna Karakiewicz, Thomas Kvan, 2013-03 Portrayed as the 'accidental pioneer of a new kind of urbanism', Hong Kong's evolution is traced from its pre-colonial and colonial origins to the contemporary vertical and volumetric metropolis of towers, podiums-and-towers, decks, bridges, escalators and other components of multi-level city living.

Drunk Tank Pink Adam Alter, 2014-02-25 A New York Times bestseller! A revelatory look at how our environment unconsciously yet dramatically shapes the judgments and decisions we make every day Most of us go through life believing that we are in control of the choices we make—that we think and behave almost independently from the world around us. But as Drunk Tank Pink illustrates, the truth is our environment shapes our thoughts and actions in myriad ways without our permission or even our knowledge. Armed with surprising data and endlessly fascinating examples, Adam Alter addresses the subtle but substantial ways in which outside forces influence us—such as color's influence on mood, our bias in favor of names with which we identify, and how sunny days can induce optimism as well as aggression. Drunk Tank Pink proves that

the truth behind our feelings and actions goes much deeper than the choices we take for granted every day.

Inhabitable Infrastructures CJ Lim, 2017-05-25 *Inhabitable Infrastructures: Science fiction or urban future?*, the follow up to *Food City* and *Smartcities* and *Eco-Warriors*, from one of the world's leading urban design and architectural thinkers, explores the potential of climate change-related multi-use infrastructures that address the fundamental human requirements to protect, to provide and to participate. The stimulus for the infrastructures derives from postulated scenarios and processes gleaned from science fiction and futurology as well as the current body of scientific knowledge regarding changing environmental impacts on cities. Science fiction is interdisciplinary by nature, aggregates the past and present, and evaluates both lay opinions and professional strategies in an attempt to develop foresight and to map possible futures. The research culminates in the creation of innovative multi-use infrastructures and integrated self-sustaining support systems that meet the challenges posed through climate change and overpopulation, and the reciprocal benefits of simultaneously addressing the threat and the shaping of cities. J. G. Ballard has written that the psychological realm of science fiction is most valuable in its predictive function, and in projecting emotions into the future. The knowledge from the book is widely transferable, constituting both solutions and speculative visions of future urban environments. The book is indispensable reading for professionals and students in the fields of urban design, architecture, engineering and environmental socio-politics.

The Concrete Dragon Thomas J. Campanella, 2012-03-20 China is the most rapidly urbanizing nation in the world, with an urban population that may well reach one billion within a generation. Over the past 25 years, surging economic growth has propelled a construction boom unlike anything the world has ever seen, radically transforming both city and countryside in its wake. The speed and scale of China's urban revolution challenges nearly all our expectations about architecture, urbanism and city planning. China's ambition to be a major player on the global stage is written on the skylines of every major city. This is a nation on the rise, and it is building for the record books. China is now home to some of the world's tallest skyscrapers and biggest shopping malls; the longest bridges and largest airport; the most expansive theme parks and gated communities and even the world's largest skateboard park. And by 2020 China's national network of expressways will exceed in length even the American interstate highway system. China's construction industry, employing a workforce equal to the population of California, has been erecting billions of square feet of housing and office space every year. But such extensive development has also meant demolition on a scale unprecedented in the peacetime history of the world. Nearly all of Beijing's centuries-old cityscape has been bulldozed in recent years, and redevelopment in Shanghai has displaced more families than 30 years of urban renewal in the United States. China's cities are also rapidly sprawling across the landscape, churning precious farmland into a landscape of superblock housing estates and single-family subdivisions laced with highways and big-box malls. In a mere generation, China's cities have undergone a metamorphosis that took 150 years to complete in the United States. *The Concrete Dragon: China's Urban Revolution and What it Means for the World* sheds light

on this extraordinary chapter in world urban history. The book surveys the driving forces behind the great Chinese building boom, traces the historical precedents and global flows of ideas and information that are fusing to create a bold new Chinese cityscape, and considers the social and environmental impacts of China's urban future. The Concrete Dragon provides a critical overview of contemporary Chinese urbanization in light of both China's past as well as earlier episodes of rapid urban development elsewhere in the world--especially that of the United States, a nation that itself once set global records for the speed and scale of its urban ambitions.

Steampunk London Helena Esser, 2024-07-25 Tracing the genre through fiction, visual art, film and videogames from the 1980s to the present, this book offers a comprehensive exploration of the intersection between neo-Victorianism, urban spaces and Steampunk. Characterised by its interplay between past and present and its anachronistic retro-speculation, Neo-Victorian-infused Steampunk remixes modern collective memory to produce a re-imagined vision of Victorian London. Investigating how Steampunk's re-calibrated Londons both source from and subvert Victorian discourse about the city, Steampunk London offers a deeper understanding of how a popular cultural memory of the Victorian past is shaped and transmitted in light of present-day identity politics. Covering key themes including retrofuturism, gender and sexuality, colonialism and postcolonialism, it considers such ideas as how early Steampunk synthesizes Victorian urban ethnography; how Victorian urban Gothic shapes shared transmedia memory to challenge reactionary, nostalgic meta-narratives; how Steampunk video games mobilize urban space as an immersive storytelling device with cities open to play; and how Steampunk interprets the modern metropolis as an opportunity for feminist and queer agency. Through examination of Victorian-era writers from Charles Dickens to Arthur Conan Doyle, the book digs into works of fiction and media alike, looking at *The Difference Engine*, *Soulless*, and *The League of Extraordinary Gentlemen*, *From Hell*, Guy Ritchie's *Sherlock Holmes*, cyberpunk classic *Blade Runner*, and *Assassin's Creed: Syndicate* and *The Order 1886*. An important intervention in the study of steampunk, Helena Esser demonstrates how the works explored invite participatory consumption and considers the genre's potential- and failures- to interrogate and challenge our relationship with the Victorian past.

Hong Kong Architecture 1945-2015 Charlie Q. L. Xue, 2016-06-13 This book focuses on the transformation from colonial to global - the formation, mechanism, events, works and people related to urban architecture. The book reveals hardships the city encountered in the 1950s and the glamour enjoyed in the 1980s. It depicts the public and private developments, and especially the public housing which has sheltered millions of residents. The author identifies the architects practising in the formative years and the representatives of a rising generation after the 1980s. Suffering from land shortage and a dense environment, the urban development of Hong Kong has in the past 70 years met the changing demands of fluctuating economic activities and a rising population. Architecture on the island has been shaped by social demands, the economy and technology. The buildings have been forged by the government, clients, planners, architects, many contractors and end-

users. The built environment nurtures our life and is visual evidence of the way the city has developed. Hong Kong is a key to East Asia in the Pacific Era. The book is a must-read for a thorough understanding the contemporary history and architecture of this oriental pearl. Endorsement: "Hong Kong sets an extreme example of hyper-density living. MTR's Kowloon Station project offered my firm the unique opportunity to contribute to a new type of fully integrated three dimensional transport mega-structure, conceived as a well-connected place for people to live, work and play. Through Charlie Xue's book, one can see how a compact city works and high density integrated development indicates a sustainable path for modern city making." Sir Terry Farrell, CBE, Principal, Farrells Well researched and refreshingly well structured, Charlie Xue's latest book comprehensively shows how Hong Kong's post-war urban architecture both tracks and symbolizes the former British colony's rise to success - a must read for architecture and culture buffs alike. Peter G. Rowe, Raymond Garbe Professor of Architecture and Urban Design, Harvard University Distinguished Service Professor. "An essential addition to the growing literature on Chinese architecture, the title of the book belies the full scope of Xue's extensive history. Covering Hong Kong's postwar transition from defeated colony to Pacific Age power house, Xue expertly traces the evolution of the city's ambitious and innovative programs of integrated high density urban design and infrastructure, as well as changing architectural fashions. In a time when many Western governments have all but abandoned public housing programs, Xue's book is a timely reminder of what can be achieved." Professor Chris Abel, author of Architecture and Identity, Architecture, technology and process and The Extended Self."/p>

Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. City Of Darkness Life In Kowloon Walled City : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the

literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and thrilling novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
