Trends in the Systematics of Bacteria and Fungi Paul Bridge,David Smith,Erko Stackebrandt,2020-12-09 Methods in microbial systematics have developed and changed significantly in the last 40 years. This has resulted in considerable change in both the defining microbial species and the methods required to make reliable identifications. Developments in information technology have enabled ready access to vast amounts of new and historic data online. Establishing both the relevance, and the most appropriate use, of this data is now a major consideration when undertaking identifications and systematic research. This book provides some insights into how current methods and resources are being used in microbial systematics, together with some thoughts and suggestions as to how both methodologies and concepts may develop in the future.

Periodontia B.M Eley,M. Soory,J.D. Atlas of Diagnostic Imaging in Dermatology Clarissa Canella Moraes do Carmo,2025-07-27 Dermatologic ultrasonography is an important method, being essential for diagnosing pathologic conditions. However, diagnostic imaging in dermatology goes far beyond ultrasonography. Other image modalities are also available such as radiography, computed tomography, magnetic resonance imaging using surface coil with specific sequences. These techniques allow for 3D imaging reconstructions, which can be used to create 3D-printed anatomical models, and support biomodeling for detailed anatomical analysis and surgical planning. This book intends to guide dermatologists and radiologists to dermatologic radiological

imaging. For each lesion it describes: Epidemiology, Clinical presentation, Histopathology, Radiological signs on radiography, computed tomography, ultrasonography and MRI, where applicable. All images are accompanied by schematics and illustrations. It also includes 3D imaging reconstructions and videos for further clarity.

Writing Journalism History Otávio Daros, 2024-08-19 This book examines the trajectory of the historical knowledge about journalism produced by its scholars in Brazil, from the early accounts originating from the Brazilian Historical and Geographic Institute in the 19th century to the specialized academic field at the turn of the 21st century. The history of journalism historiography shows that during the Empire and the Old Republic, the press was idealized as a means of education and a form of mirror of events. After the New State, there was a tendency to view it as an instrument for manipulating public opinion and a suspicious documentary source in the eyes of historians. Finally, with the end of the Military Regime, and with the emergence of the area of communication studies, it came to be analyzed as an element of mediation of public debate and a space for sociability. Regarding this last phase, Daros argues that despite aspirations to subordinate journalism history to communication history, the field still lacks more significant historiographical undertakings beyond print media. This volume is aimed at scholars of journalism studies and media history, the historiography of the press and journalism, the history of historiography, and Brazilian historiography.

Multi-electronic Processes in Collisions Involving Charged Particles and Photons with Atoms and Molecules

Antonio Carlos Fontes dos Santos, 2018-10-03 This volume describes the advanced research on the behavior of electrons in ionized atoms and molecules. Readers will learn about relevant techniques used and experimental results for different electron and molecular theories. The information presented in the book is useful for scholars and researchers involved in nuclear and atomic physics programs. Topics covered in the volume include: -Ionization experiments -Kinetic energy studies of photoexcited carbon dichloride and tetrachloride molecules -Selective excision of biomolecules in electron transfer experiments -Particle and antiparticle collisions with rare gases -Multiple scattering in electron Rutherford scattering spectroscopy -Four-body effects in the $6\text{He}58 + 58\text{Ni}$ scattering -Twin atoms from doubly excited states of the hydrogen molecule.

Advances in Bioinformatics and Computational Biology Marcilio C.P. de Souto, Maricel G. Kann, 2012-08-10 This book constitutes the refereed proceedings of the 7th Brazilian Symposium on Bioinformatics, BSB 2012, held in Campo Grande, Brazil, in August 2012. The 16 regular papers presented were carefully reviewed and selected for inclusion in this book. It also contains a joint paper from two of the guest speakers. The Brazilian Symposium on Bioinformatics covers all aspects of bioinformatics and computational biology, including sequence analysis; motifs, and pattern matching; biological databases, data management, data integration, and data mining; biomedical text mining; structural, comparative, and functional genomics; personal genomics; protein structure, modeling, and simulation; gene identification, regulation and

expression analysis; gene and protein interaction and networks; molecular docking; molecular evolution and phylogenetics; computational systems biology; computational proteomics; statistical analysis of molecular sequences; algorithms for problems in computational biology; applications in molecular biology, biochemistry, genetics, medicine, microbiology and associated subjects.

Aspects of Brazilian Floristic Diversity Maria Franco Trindade Medeiros, Bárbara de Sá Haiad, 2022-10-30 *Aspects of Brazilian Floristic Diversity: From Botany to Traditional Communities* offers a unique approach in floristic diversity of the Neotropical region, specifically encompassing the Brazilian flora. This volume combines both theoretical and applied aspects of scientific making knowledge in different perspectives of Botanical Science. In this volume, botanical specialists discuss the many different approaches of taxonomic, reproductive, ecological and ethnobotanical aspects of Brazilian floristic diversity, thereby enlightening the global interest in Neotropical species, in particular those from the Brazilian territory. The book addresses relevant questions from many points of view, including anatomy, reproduction, palinology, conservation and ethnobotany, creating an in-depth perception of the flora in its complexity constitution. The book provides a comprehensive outlook on Botany Sciences, considering the history and traditional knowledge of plants, and relating it to contemporary problems and concerns of flora conservation today. With this current perspective, this book reaches a vast audience from the research lines of Botany, and encompasses a broader and interdisciplinary understanding of *Aspects of Brazilian Floristic Diversity*.

The Invention of the Favela Licia do Prado Valladares, 2019-04-29 For the first time available in English, Licia do Prado Valladares's classic anthropological study of Brazil's vast, densely populated urban living environments reveals how the idea of the favela became an internationally established—and even attractive and exotic—representation of poverty. The study traces how the term “favela” emerged as an analytic category beginning in the mid-1960s, showing how it became the object of immense popular debate and sustained social science research. But the concept of the favela so favored by social scientists is not, Valladares argues, a straightforward reflection of its social reality, and it often obscures more than it reveals. The established representation of favelas undercuts more complex, accurate, and historicized explanations of Brazilian development. It marks and perpetuates favelas as zones of exception rather than as integral to Brazil's modernization over the past century. And it has had important repercussions for the direction of research and policy affecting the lives of

millions of Brazilians. Valladares's foundational book will be welcomed by all who seek to understand Brazil's evolution into the twenty-first century.

Fermented Food Products A. Sankaranarayanan, N. Amaresan, D. Dhanasekaran, 2019-12-06 Fermented food play an important proactive role in the human diet. In many developing and under developed countries, fermented food is a cheap source of nutrition. Currently, more than 3500 different fermented foods are consumed by humans throughout the world; many are indigenous and produced in small quantities, however, the consumption of many fermented foods has gradually increased. Fermented Food Products presents in-depth insights into various microbes involved in the production of fermented foods throughout the world. It also focuses on recent developments in the fermented food microbiology field along with biochemical changes that are happening during the fermentation process. • Describes various fermented food products, especially indigenous products • Presents health benefits of fermented food products • Explains mechanisms involved in the production of fermented foods • Discusses molecular tools and its applications and therapeutic uses of fermented foods The book provides a comprehensive account about diversified ethnic fermented food products. Readers will get updated information regarding various types of fermented food products and will learn the effect these fermented food products have on human health.

Thorp and Covich's Freshwater Invertebrates Neusa Hamada, James H. Thorp, D. Christopher Rogers, 2018-08-30 Thorp and Covich's Freshwater Invertebrates, Fourth Edition: Keys to Neotropical Hexapoda, Volume Three, provides a guide for identifying and evaluating a key subphylum, hexapoda, for Central America, South America and the Antarctic. This book is essential for anyone working in water quality management, conservation, ecology or related fields in this region, and is developed to be the most modern and consistent set of taxonomic keys available. It is part of a series that is designed to provide a highly comprehensive, current set of keys for a given bioregion, with all keys written in a consistent style. This series can be used for a full spectrum of interested readers, from students, to university professors and government agencies. - Includes zoogeographic coverage of the entire Neotropics, from central México and the Caribbean Islands, to the tip of South America - Identifies aquatic springtails (Collembola) and insects to the genus level for many groups, and family or subfamily level for less well known taxa - Presents multiple keys, from higher to lower taxonomic levels that are appropriate for each users' level of scientific knowledge and needs - Provides a general introduction and sections on limitations, terminology and morphology, material preparation and preservation, and references

Accumulation & Innovation Renelson Ribeiro Sampaio, 2021-11-16 This work focuses on the experience of a Brazilian cassava starch agro-industry in developing its technological capabilities since 1917, when it was first established. Its main purpose is to explore how the process of technological progress which occurred along with that industrialization, especially regarding the starch industry, has been determined by the following variables: I) the pattern of capital accumulation, II) the

capability of the related technical base to both the promotion or absorption of technological changes, and III) firms' strategies towards innovation.

Systems of Innovation and Development José Eduardo Cassiolato, Helena Maria Martins Lastres, Maria Lucia Maciel, 2003-01-01 This book represents a significant contribution to the debates surrounding globalization and local systems of innovation. The diverse perspectives on global and local processes combined with original insights on developing countries should be of value to scholars and students of economics, social science, political science and business administration. The book should also be of interest to policymakers in governmental and non-governmental bodies, particularly international development agencies.

Regenerative Medicine - from Protocol to Patient Gustav Steinhoff, 2016-06-07 Regenerative medicine is the main field of groundbreaking medical development and therapy using knowledge from developmental and stem cell biology as well as advanced molecular and cellular techniques. This collection of volumes on Regenerative Medicine: From Protocol to Patient, aims to explain the scientific knowledge and emerging technology as well as the clinical application in different organ systems and diseases. International leading experts from all over the world describe the latest scientific and clinical knowledge of the field of regenerative medicine. The process of translating science of laboratory protocols into therapies is explained in sections on regulatory, ethical and industrial issues. This collection is organized into five volumes: (1) Biology of Tissue Regeneration, (2) Stem Cell Science and Technology, (3) Tissue Engineering, Biomaterials and Nanotechnology, (4) Regenerative Therapies I, and (5) Regenerative Therapies II. The textbook gives the student, the researcher, the health care professional, the physician and the patient a complete survey on the current scientific basis, therapeutical protocols, clinical translation and practiced therapies in regenerative medicine. Volume 4 first gives a survey on the historical background of science and development of regenerative therapies. Ethical, preclinical and regulatory issues for the introduction of new regenerative therapies are depicted as the current background for clinical translation. The clinical chapters describe the state of development for medical science, technology application, and clinical translation for the nervous system, head, and respiratory system.

Stuck in a Non-place Luiza Silva de Andrade, 2023-12-19 This book is the product of research conducted in the Brazilian Border with Bolívia in 2013, where a migrant temporary shelter hosted, under a humanitarian visa, hundreds of Haitians that had fled several stages of human insecurity back in their homeland. In order to survive and with the dream of leaving soon, migrants strategise their relationships and harness social navigation skills. This fieldwork was part of the Master of Social and Cultural Anthropology program at the Vrije Universiteit Amsterdam, for which the author was granted a VU Scholarship.

Meso-Cenozoic Brazilian Offshore Magmatism Anderson Costa Dos Santos, Peter Christian Hackspacher, 2021-12-03

Meso-Cenozoic Brazilian Offshore Magmatism: Geochemistry, Petrology and Tectonics presents detailed studies from different points-of-view on the geological—particularly magmatic—evolution of the Brazilian and South Atlantic Ocean offshore areas. This comprehensive book on geological events will help readers understand the holistic evolution of the area across geographical boundaries. Each chapter consists of an introduction, regional and local geology, methods, results, discussions, conclusions and supplementary material related to the geological development in island and seamounts in the Brazilian Platform and seafloor. - Integrates independent studies and research of the Brazilian offshore magmatism and tectonics into a single book - Includes new seamount and island data that was previously unavailable to the public - Introduces case studies to provide real-world examples of volcanism and scientific evolution

Brazilian researchers' activity in international publication Malyina Kazue Ono Leal, 2023-10-05 O estudo é baseado em coleta de dados junto a pesquisadores brasileiros com experiência em publicações de artigos acadêmicos em periódicos internacionais, e examina uma gama de práticas correntes, de acordo com a Teoria da Atividade de Engeström. A análise dessas práticas revela que há inúmeros e sérios conflitos dentro das atividades que compõem o objeto final, a publicação. Essas informações enfatizam a necessidade de políticas institucionais que apoiem o trabalho dos pesquisadores, tanto no campo da pesquisa quanto no letramento acadêmico em português e em língua estrangeira.
