English for Aircraft Philip Shawcross, 1993

Global Aviation English Research Eric Friginal, Malila Prado, Jennifer Roberts, 2024-11-14 Advocating for best practices within aviation English language research, this volume offers deeper insights into the practical, policy-based, and societal contexts in which International Civil Aviation Organization (ICAO) language standards are embedded. English is the official language for international pilot-air traffic controller (ATC) communications, mandated by the ICAO. It is also the de facto universal common language for all other forms of communication, including the language of maintenance technicians (and maintenance manuals), aeronautical engineers, cabin crew, ground staff, and aviation business professionals. In this book, renowned academic experts and aviation professionals come together to explore a variety of research trends, providing an effective and efficient analysis of the language needs of the aviation industry, its future directions, and an extended look at linguistic principles in action. Chapters engage in detail with research data, case studies, and concrete examples of interactional tasks, transactional exchanges and radiotelephony. They also examine the common vocabulary and phrasal patterns in aviation discourse required to communicate successfully in various roles and contexts within the aviation industry. The result is a meaningful contribution to the global development and improvement of standards of aviation research; investigations of the role of language in aviation accidents; and research into language as a human factor in aviation communications, customer service, and intercultural (mis)communication.

*English in Global Aviation* Eric Friginal, Elizabeth Mathews, Jennifer Roberts, 2019-11-14 Taking readers step-by-step through the major issues surrounding the use of English in the global aviation industry, this book provides a clear introduction to turning research into practice in the field of English for Specific Purposes (ESP), specifically Aviation English, and a valuable case study of applied linguistics in action. With both cutting-edge research and evidence-based practice, the critical role of English in aviation is explored across a variety of contexts, including the national and global policies impacting training and language assessment for pilots, air-traffic controllers, ground staff, and students. *English in Global Aviation* teaches readers how to apply linguistic research to real world, practical settings. The book uses a range of corpus-based findings and related research to provide an effective analysis of the language needs of the aviation industry and an extended look at linguistic principles in action. Readers are presented with case studies, transcriptions, radiotelephony, and a clear

breakdown of the common vocabulary and phrasal patterns of aviation discourse. Students and teachers of both linguistics and aviation will discover the requirements and challenges of successful intercultural communication in this industry, as well as insights into how to teach, develop, and assess aviation English language courses.

**Key Issues in English for Specific Purposes in Higher Education** Yasemin Kırkgöz, Kenan Dikilitaş, 2018-01-08 This volume offers research-based studies on English for Specific Purposes in higher education from across the world. By drawing on international studies, the book brings together diverse ESP practices and aspects of relevant issues in the development of ESP programs, teachers and learners in a coherent fashion. There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world. Knowledge of ESP is an important factor in subject matter learning by students, and also closely related to the performance of university graduates in the relevant sectors. Careful planning and efficient implementation are essential to ensure the quality of the language learning process. For a variety of reasons, it proves difficult to maintain ESP instruction in higher education. These reasons include the incompetence of teachers, lack of materials for that specific context, as well as lack of opportunities for ESP teachers to develop their skills. The chapters in this book, taken from a wide variety of countries, shed light on the diversity of current practices and issues surrounding ESP.
